addis admas: Visions of Zion Erin C. MacLeod, 2014 In reggae song after reggae song Bob Marley and other reggae singers speak of the Promised Land of Ethiopia. Repatriation is a must they cry. The Rastafari have been travelling to Ethiopia since the movement originated in Jamaica in 1930s. They consider it the Promised Land, and repatriation is a cornerstone of their faith. Though Ethiopians see Rastafari as immigrants, the Rastafari see themselves as returning members of the Ethiopian diaspora. In *Visions of Zion*, Erin C. MacLeod offers the first in-depth investigation into how Ethiopians perceive Rastafari and Rastafarians within Ethiopia and the role this unique immigrant community plays within Ethiopian society. Rastafari are unusual among migrants, basing their movements on spiritual rather than economic choices. This volume offers those who study the movement a broader understanding of the implications of repatriation. Taking the Ethiopian perspective into account, it argues that migrant and diaspora identities are the products of negotiation, and it illuminates the implications of this negotiation for concepts of citizenship, as well as for our understandings of pan-Africanism and south-south migration. Providing a rare look at migration to a non-Western country, this volume also fills a gap in the broader immigration studies literature.

Some essays are based on Master theses from the Department, and others on fieldwork. Seminars and meetings formed part of the research with and about children. addis admas: *Reconfiguring Ethiopia: The Politics of Authoritarian Reform* Jon Abbink, Tobias Hagmann, 2016-04-22 This book takes stock of political reform in Ethiopia and the transformation of Ethiopian society since the adoption of multi-party politics and ethnic federalism in 1991. Decentralization, attempted democratization via ethno-national representation, and partial economic liberalization have reconfigured Ethiopian society and state in the past two decades. Yet, as the contributors to this volume demonstrate, 'democracy' in Ethiopia has not changed the authority structures and the culture of centralist decision-making of the past. The political system is tightly engineered and controlled from top to bottom by the ruling Ethiopian Peoples' Revolutionary Democratic Front (EPRDF). Navigating between its 1991 announcements to democratise the country and its aversion to power-sharing, the EPRDF has established a de facto one-party state that enjoys considerable international support. This ruling party has embarked upon a technocratic 'developmental state' trajectory ostensibly aimed at 'depoliticizing' national policy and delegitimizing alternative courses. The contributors analyze the dynamics of authoritarian state-building, political ethnicity, electoral politics and state-society relations that have marked the Ethiopian polity since the downfall of the socialist Derg regime. Chapters on ethnic federalism, 'revolutionary democracy', opposition parties, the press, the judiciary, state-religion, and state-foreign donor relations provide the most comprehensive and thought-provoking review of contemporary Ethiopian national politics to date. This book is based on a special issue of the Journal of Eastern African Studies.

addis admas: Urban Issues in Rapidly Growing Cities Mintesnot G. Woldeamanuel, 2020-02-19 This book critically assesses the complex urban issues, planning challenges and development opportunities of rapidly growing cities, using Addis Ababa as a case study. Just like other developing cities, Addis Ababa is undergoing numerous natural and policy-driven changes. This book analyses the effect of these changes on urban management to allow better understanding of the conceptual frameworks that define the everyday functions of rapidly growing cities. It demonstrates that rapid urban growth has simultaneously created opportunities for economic development in the developing world as well as social, environmental and cultural challenges causing a mismatch between demand and the supply of services. The author argues that, by combining indigenous knowledge and practices and contemporary planning principles, developing countries can overcome challenges concerning environmental and public health, transport congestion, rising rents and house prices and

lack of open space. Foregrounding the experience of everyday citizens of the city, this book aids our understanding of the nature of rapidly growing cities and outlines what needs to be done so that the city meets the needs of the people. A unique contribution to the literature on cities of the developing world, this book will be of interest to students and scholars of Urban Studies, Planning, Development Studies and African Studies.

addis admas: The Ethnopolitics of Ethnofederalism in Ethiopia Jan Erk, 2017-12-01 Ethiopia is the darling of development economists: since 2005, the country's economic growth rate has consistently been over the 10% mark. Ethiopia is also a regional superpower with political influence across East Africa and the Horn. Furthermore, the African Union has its headquarters in the capital Addis Ababa, which further underscores the country's growing international profile. On top of everything, since 1995 Ethiopia has a federal constitution explicitly committed to granting political autonomy to all ethnic groups within the country. Ethiopia's federalism has also direct relevance to the country's neighbours, Eritrea, Somalia, Kenya, South Sudan, and Djibouti who have ethnic kin across the borders with Ethiopia. Yet, despite the generous promises to the country's ethnic groups stated in the constitution, not everything is well. As marked by the recent unrest throughout various regions of the country, the federal constitution's promises and the reality do not always perfectly align. But there is a shortage of even-handed scholarly analyses of this complex country, and in particular, its unique federal system. Based on chapters focusing on different parts of the federal system, the collection takes stock of the last 20 years and distils lessons and insights for a broader international/comparative readership. The chapters originally published in *Ethnopolitics and Regional & Federal Studies*.

addis admas: Separation of Powers in African Constitutionalism Charles M. Fombad, 2016-03-03 The new series Stellenbosch Handbooks in African Constitutional Law will engage with contemporary issues of constitutionalism in Africa, filling a notable gap in African comparative constitutional law. Separation of Powers in African Constitutionalism is the first in the series, examining one of the critical measures introduced by African constitutional designers in their attempts to entrench an ethos of constitutionalism on the continent. Taking a critical look at the different ways in which attempts have been made to separate the different branches of government, the Handbook examines the impact this is having on transparent and accountable governance. Beginning with an overview of constitutionalism in Africa and the different influences on modern African constitutional developments, it looks at the relationship between the legislature and the executive as well as the relationship between the judiciary and the political branches. Despite differences in approaches between the different constitutional cultures that have influenced developments in Africa, there remain common problems. One of these problems is the constant friction in the relationship between the three branches and the resurgent threats of authoritarianism which clearly suggest that there remain serious problems in both constitutional design and implementation. The book also studies the increasing role being played by independent constitutional institutions and how they complement the checks and balances associated with the traditional three branches of government.

addis admas: *Religion and Law in Ethiopia* Mohammed Abdo, 2021-05-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this convenient resource provides systematic information on how Ethiopia deals with the role religion plays or can play in society, the legal status of religious communities and institutions, and the legal interaction among religion, culture, education, and media. After a general introduction describing the social and historical background, the book goes on to explain the legal framework in which religion is approached. Coverage proceeds from the principle of religious freedom through the rights and contractual obligations of religious communities; international, transnational, and regional law effects; and the legal parameters affecting the influence of religion in politics and public life. Also covered are legal positions on religion in such specific fields as church financing, labour and employment, and matrimonial and family law. A clear and comprehensive overview of relevant legislation and legal doctrine make the book an invaluable reference source and very useful guide. Succinct and practical, this book will prove to be of great value to practitioners in the myriad instances where a law-related religious interest arises in Ethiopia. Academics and researchers will appreciate its value as a thorough but concise treatment of the legal aspects of diversity and multiculturalism in which religion plays such an important part.

addis admas: Media, Conflict, and the State in Africa Nicole Stremlau, 2018-08-09 Countries emerging from violent conflict face difficult challenges about what the role of media should be in political transitions, particularly when attempting to build a new state and balance a difficult legacy. Media, Conflict, and the State in Africa discusses how ideas, institutions and interests have shaped media systems in some of Africa's most complex state and nation-building projects. This timely book comes at a turbulent moment in global politics as waves of populist protests gain traction, and concerns continue to grow about fake news, social media echo chambers, and the increasing role of both traditional and new media in waging wars or influencing elections. Focusing on comparative cases from a historical perspective and the choices and ideas that informed the approaches of some of Africa's leaders, including guerrilla commanders Yoweri Museveni of Uganda and Meles Zenawi of Ethiopia, Nicole Stremlau offers a unique political insight into the

development of contemporary media systems in Africa.

Da Costa, 2017-05-15 Jerónimo Lobo was the last survivor of the small band of Jesuit Fathers who tried, with a measure of success, to reconcile Ethiopia to the Church of Rome. The narrative begins with Lobo's ordination in 1621 and ends seventeen years later. Chosen to serve in India he reached that country after being involved with a naval fight against the Dutch and English off Mozambique. Selected for the Ethiopian mission, he made a remarkable attempt to reach the country from the Somali coast, and eventually made his way to Bailul in the Red Sea and across the Danakil desert. He spent nine years in Ethiopia, principally in the north and in the neighbourhood of the source of the Blue Nile. Exiled when the Emperor restored the authority of the Ethiopian Church, he was handed over to the Turks at Massawa. After suffering much hardship and danger he regained India. Sent to Europe to advocate intervention on behalf of the Ethiopian Catholics, his ship was wrecked on the South African coast. The castaways built two boats, one of which succeeded in rounding the Cape and arriving at Luanda. Here Lobo embarked on a ship carrying slaves to the Spanish main which was captured by the Dutch. Lobo was marooned on an island but contrived to make his way to Cartagena and Havana and so to Europe. His diplomatic business took him to Madrid and Rome, but his plea for armed assistance for the Ethiopian Catholics did not succeed. Translated by Donald M. Lockhart.

addis admas: *The Oxford Handbook of Africa and Economics* Célestin Monga, Justin Yifu Lin, 2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved. These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments. While intellectually charming and often elegantly formulated, that conventional wisdom is actually contradicted by historical evidence and common sense. It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure. In fact, the argument underlining that reasoning is tautological, and the policy prescriptions derived from it are fatally teleological: low-income countries are by definition those where such ingredients are missing. None of today's high-income countries started its growth process with the required and complete list of growth ingredients. Unless one truly believes that the continent of Africa-and most developing countries-are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism, the conventional view must be re-examined, debated, and questioned. This volume-the second of the *Oxford Handbook of Africa and Economics*-reassesses the economic policies and practices observed across the continent since independence. It offers a collection of analyses by some of the leading economists and development thinkers of our time, and reflects a wide range of perspectives and viewpoints. Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book.

addis admas: *Language Policy in Ethiopia* Mekonnen Alemu Gebre Yohannes, 2021-03-22 This book examines the interplay and tensions between hegemonic and counter-hegemonic language policy and processes in Tigray, a regional state of Ethiopia, in the period of pre- and post-1991. Viewing language use and language policy as dynamic social and ideological processes, the book

presents Ethiopia as an example of language policy creation and implementation over time, in a highly volatile political context. The case of Ethiopia is unique in that different language policies and practices were put in place as the country's leaders changed through political takeovers. Declared language policies were not always implemented, and those implemented were often protested. The book starts with an overview and review of language policy and planning, followed by a chapter on the history of such planning in Ethiopia. It then presents the methodology used for the study, and examines the appropriation of hegemonic LPP, patterns of resistance, schools and public sites as centers of resistance, and the emergence and development of specific patterns of language use in different regions of the country. The book ends with recommendations for future research, and draws the overall conclusion that since LPP is a dynamic and multilayered contextual process, official or de facto language policy is often undermined by overt or covert unofficial language policies, ideologies, mechanisms, and agents that result in different patterns of language use.

addis admas: Legal Pluralism in Ethiopia Susanne Epple, Getachew Assefa, 2020-07-31 Being a home to more than 80 ethnic groups, Ethiopia has to balance normative diversity with efforts to implement state law across its territory. This volume explores the co-existence of state, customary, and religious legal forums from the perspective of legal practitioners and local justice seekers. It shows how the various stakeholders' use of negotiation, and their strategic application of law can lead to unwanted confusion, but also to sustainable conflict resolution, innovative new procedures and hybrid norms. The book thus generates important knowledge on the conditions necessary for stimulating a cooperative co-existence of different legal systems.

Wossenu Yimam, Mulu Nega, 2012 The main purpose of this study was to explore current issues surrounding Ethiopian private higher education institutions (PHEIs) and assess the impact of regulatory practices on the smooth operation of PHEIs. The findings of the study revealed that PHEIs are making significant contribution towards increasing access to higher education and creating employment opportunities. However, there were concerns among stakeholders on the quality of education provided by PHEIs. The application of government regulatory frameworks was also found to be more stringent on PHEIs than on their counterparts in the public sector.

This volume draws together various scholars from different parts of the world examining facets of the new visualization of wars and crisis in a range of innovative ways. All the contributors here pose questions concerned with the significance of visual political works today, and ask how images and personas have developed and been appropriated by others with their own distinct political agendas.
