It is a book that readers will cherish and hold close as a personal favorite, and that scholars will cite for years to come. ---David Román, University of Southern California What is it about performance that draws people to sit and listen attentively in a theater, hoping to be moved and provoked, challenged and comforted? In *Utopia in Performance*, Jill Dolan traces the sense of visceral, emotional, and social connection that we experience at such times, connections

Haines, 2020-09 Never Leaving Laramie takes readers from a small university town in Wyoming into the human and natural landscapes of remote and dangerous areas in the world. John Haines bicycles across Tibet and kayaks the length of West Africa's Niger River. He rides the Trans-Siberian train across the former Soviet Union and survives a traumatic train accident in the Czech Republic. For two decades, the author lived a restless life exploring pockets of the world in transition, always finding a route back to Laramie, the home that shaped him--a place he loved but needed to leave, and in the end never left.

laramie project pdf: Blood Done Sign My Name Timothy B. Tyson, 2007-12-18 The "riveting"* true story of the fiery summer of 1970, which would forever transform the town of Oxford, North Carolina—a classic portrait of the fight for civil rights in the tradition of To Kill a Mockingbird *Chicago Tribune On May 11, 1970, Henry Marrow, a twenty-three-year-old black veteran, walked into a crossroads store owned by Robert Teel and came out running. Teel and two of his sons chased and beat Marrow, then killed him in public as he pleaded for his life. Like many small Southern towns, Oxford had barely been touched by the civil rights movement. But in the wake of the killing, young African Americans took to the streets. While lawyers battled in the courthouse, the Klan raged in the shadows and black Vietnam veterans torched the town's tobacco warehouses. Tyson's father, the pastor of Oxford's all-white Methodist church, urged the town to come to terms with its bloody racial history. In the end, however, the Tyson family was forced to move away. Tim Tyson's gripping narrative brings gritty blues truth and soaring gospel vision to a shocking episode of our history. FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD "If you want to read only one book to understand the uniquely American struggle for racial equality and the swirls of emotion around it, this is it."—Milwaukee Journal Sentinel "Blood Done Sign My Name is a most important book and one of the most powerful meditations on race in America that I have ever read."—Cleveland Plain Dealer "Pulses with vital paradox . . . laramie project pdf: The Book of Matt Stephen Jimenez, 2013-09-24 “Methamphetamine was a huge part of this case . . . It was a horrible murder driven by drugs.” — Prosecutor Cal Rerucha, who convicted Matthew Shepard's killers On the night of October 6, 1998, twenty-one-year-old Matthew Shepard left a bar with two alleged “strangers,” Aaron McKinney and Russell Henderson. Eighteen hours later, Matthew was found tied to a log fence on the outskirts of town, unconscious and barely alive. Overnight, a politically expedient myth took the place of important facts. By the time Matthew died a few days later, his name was synonymous with anti-gay hate. *The Book of Matt*, first published in 2013, demonstrated that the truth was in fact far more complicated – and daunting. Stephen Jimenez’s account revealed primary documents that had been under seal, and gave voice to many with firsthand knowledge of the case who had not been heard from, including members of law enforcement. In his Introduction to this updated edition, journalist Andrew Sullivan writes: “No one wanted Steve Jimenez to report this story, let alone go back and back to Laramie, Wyoming, asking awkward questions, puzzling over strange discrepancies, re-interviewing sources, seeking a deeper, more complex truth about the ghastly killing than America, it turned out, was prepared to hear. It was worse than that, actually. Not only did no one want to hear more about it, but many were incensed that the case was being re-examined at all.” As a gay man Jimenez felt an added moral imperative to tell the story of Matthew’s murder honestly, and his reporting has been thoroughly corroborated. “I urge you to read [The Book of Matt] carefully and skeptically,” Sullivan writes, “and to see better how life rarely fits into the neat boxes we want it to inhabit. That Matthew Shepard was a meth dealer and meth user says nothing that bad about him, and in no way mitigates the hideous brutality of the crime that killed him; instead it shows how vulnerable so many are to the drug’s escapist lure and its astonishing capacity to heighten sexual pleasure so that it’s the only thing you want to live for. Shepard was a victim twice over: of meth and of a fellow meth user.”

laramie project pdf: Bitterroot Susan Devan Harness, 2020-03-01 2019 High Plains Book Award (Creative Nonfiction and Indigenous Writer categories) 2021 Barbara Sudler Award from History Colorado In *Bitterroot* Susan Devan Harness traces her journey to understand the complexities and struggles of being an American Indian child adopted by a white couple and living in the rural American West. When Harness was fifteen years old, she questioned her adoptive father about her “real” parents. He replied that they had died in a car accident not long after she was born—except they hadn’t, as Harness would learn in a conversation with a social worker a few years later. Harness’s search for answers revolved around her need to ascertain why she was the target of racist remarks and why she seemed always to be on the outside looking in. New questions followed her through college and into her twenties when she started her own family. Meeting her biological family in her early thirties generated even more questions. In her forties Harness decided to get serious about finding answers when, conducting oral histories, she talked with other transracial

adoptees. In her fifties she realized that the concept of “home” she had attributed to the reservation existed only in her imagination. Making sense of her family, the American Indian history of assimilation, and the very real—but culturally constructed—concept of race helped Harness answer the often puzzling questions of stereotypes, a sense of nonbelonging, the meaning of family, and the importance of forgiveness and self-acceptance. In the process *Bitterroot* also provides a deep and rich context in which to experience life.

laramie project pdf: *Knots and Links* Dale Rolfsen, 2003 Rolfsen's beautiful book on knots and links can be read by anyone, from beginner to expert, who wants to learn about knot theory. Beginners find an inviting introduction to the elements of topology, emphasizing the tools needed for understanding knots, the fundamental group and van Kampen's theorem, for example, which are then applied to concrete problems, such as computing knot groups. For experts, Rolfsen explains advanced topics, such as the connections between knot theory and surgery and how they are useful to understanding three-manifolds. Besides providing a guide to understanding knot theory, the book offers 'practical' training. After reading it, you will be able to do many things: compute presentations of knot groups, Alexander polynomials, and other invariants; perform surgery on three-manifolds; and visualize knots and their complements. It is characterized by its hands-on approach and emphasis on a visual, geometric understanding. Rolfsen offers invaluable insight and strikes a perfect balance between giving technical details and offering informal explanations. The illustrations are superb, and a wealth of examples are included. Now back in print by the AMS, the book is still a standard reference in knot theory. It is written in a remarkable style that makes it useful for both beginners and researchers. Particularly noteworthy is the table of knots and links at the end. This volume is an excellent introduction to the topic and is suitable as a textbook for a course in knot theory or 3-manifolds. Other key books of interest on this topic available from the AMS are *The Shoelace Book: A Mathematical Guide to the Best (and Worst) Ways to Lace your Shoes* and *The Knot Book*.

laramie project pdf: *October Mourning* Leslea Newman, 2020-09-01 A masterful poetic exploration of the impact of Matthew Shepard’s murder on the world. On the night of October 6, 1998, a gay twenty-one-year-old college student named Matthew Shepard was kidnapped from a Wyoming bar by two young men, savagely beaten, tied to a remote fence, and left to die. Gay Awareness Week was beginning at the University of Wyoming, and the keynote speaker was Lesléa Newman, discussing her book *Heather Has Two Mommies*. Shaken, the author addressed the large audience that gathered, but she remained haunted by Matthew’s murder. *October Mourning*, a novel in verse, is her deeply felt response to the events of that tragic day. Using her poetic imagination, the author creates fictitious monologues from various points of view, including the fence Matthew was tied to, the stars that watched over him, the deer that kept him company, and Matthew himself. More than a decade later, this stunning cycle of sixty-eight poems serves as an illumination for readers too young to remember, and as a powerful, enduring tribute to Matthew Shepard’s life. Back matter includes an epilogue, an afterword, explanations of poetic forms, and resources.

laramie project pdf: Blueprint Robert Plomin, 2019-07-16 A top behavioral geneticist argues DNA inherited from our parents at conception can predict our psychological strengths and weaknesses. This “modern classic” on genetics and nature vs. nurture is “one of the most direct and unapologetic takes on the topic ever written” (Boston Review). In *Blueprint*, behavioral geneticist Robert Plomin describes how the DNA revolution has made DNA personal by giving us the power to predict our psychological strengths and weaknesses from birth. A century of genetic research shows that DNA differences inherited from our parents are the consistent lifelong sources of our psychological individuality—the blueprint that makes us who we are. Plomin reports that genetics explains more about the psychological differences among people than all other factors combined. Nature, not nurture, is what makes us who we are. Plomin explores the implications of these findings, drawing some provocative conclusions—among them that parenting styles don't really affect children's outcomes once genetics is taken into effect. This book offers readers a unique insider's view of the exciting synergies that came from combining genetics and psychology.

To date, there are no comprehensive Pre-K-12 texts for literacy teacher educators and theorists to use to show successful models of how practicing classroom teachers affirm differential (a)gender bodied realities across curriculum and schooling practices. This book aims to highlight how these enactments can be made readily conscious to teachers as a reminder that gender normativity has established violent and unstable social and educational climates for the millennial generation of lesbian, gay, bisexual, transgender, intersex, (a)gender/(a)sexual, gender creative, and questioning youth.

Stenberg, Charlotte Hogg, 2020-03-03 In June 2015, Bree Newsome scaled the flagpole in front of South Carolina's state capitol and removed the Confederate flag. The following month, the Confederate flag was permanently removed from the state capitol. Newsome is a compelling example of a twenty-first-century woman rhetor, along with bloggers, writers, politicians, activists, artists, and everyday social media users, who give new meaning to Aristotle's ubiquitous definition of rhetoric as the discovery of the “available means of persuasion.” Women's persuasive acts from the first two decades of the twenty-first century include new technologies and repurposed old ones, engaged not only to persuade, but also to tell their stories, to sponsor change, and to challenge cultural forces that repress and oppress. *Persuasive Acts: Women's Rhetorics in the Twenty-First Century* gathers an expansive array of voices and texts from well-known figures including Hillary Rodham Clinton, Malala Yousafzai, Michelle Obama, Lindy West, Sonia Sotomayor, and Chimamanda Ngozi Adichie, so that readers may converse with them, and build rhetorics of their own. Editors Shari J. Stenberg and Charlotte Hogg have compiled timely and provocative rhetorics that represent critical issues and rhetorical affordances of the twenty-first century.

laramie project pdf: Fun Home Alison Bechdel, 2007 A fresh and brilliantly told memoir from a cult favorite comic artist, marked by gothic twists, a family funeral home, sexual angst, and great

books. This breakout book by Alison Bechdel is a darkly funny family tale, pitch-perfectly illustrated with Bechdel's sweetly gothic drawings. Like Marjane Satrapi's *Persepolis*, it's a story exhilaratingly suited to graphic memoir form. Meet Alison's father, a historic preservation expert and obsessive restorer of the family's Victorian home, a third-generation funeral home director, a high school English teacher, an icily distant parent, and a closeted homosexual who, as it turns out, is involved with his male students and a family babysitter. Through narrative that is alternately heartbreaking and fiercely funny, we are drawn into a daughter's complex yearning for her father. And yet, apart from assigned stints dusting caskets at the family-owned fun home, as Alison and her brothers call it, the relationship achieves its most intimate expression through the shared code of books. When Alison comes out as homosexual herself in late adolescence, the denouement is swift, graphic -- and redemptive.

laramie project pdf: A Face to Meet the Faces Stacey Lynn Brown, Oliver De la Paz, 2012 The literary tradition of persona, of writing poems in voices or from perspectives other than the poet's own, is ancient in origin and contemporary in practice. The embodiment of different voices is a moment of true empathy, as the author moves beyond his or her own margins to fully inhabit the character, personality, and mindset of another human being. While there are a great number of poems written in persona, there are no current anthologies that collect and celebrate the diverse writers who work in this mode today. Stacey Lynn Brown and Oliver de la Paz have selected a superb collection of approximately two hundred persona poems. These poems embody characters from popular culture, history, the Bible, literature, mythology, and their diversity is reflective of the wide range of authors working in this genre. The anthology also contains brief explanatory notes written by the poets to help historicize and contextualize their characters and personae.

Ocean Studies Board, Board on Chemical Sciences and Technology, Board on Earth Sciences and Resources, Board on Agriculture and Natural Resources, Board on Energy and Environmental Systems, Board on Atmospheric Sciences and Climate, Committee on Developing a Research Agenda for Carbon Dioxide Removal and Reliable Sequestration, 2019-04-08 To achieve goals for climate and economic growth, negative emissions technologies (NETs) that remove and sequester carbon dioxide from the air will need to play a significant role in mitigating climate change. Unlike carbon capture and storage technologies that remove carbon dioxide emissions directly from large point sources such as coal power plants, NETs remove carbon dioxide directly from the atmosphere or enhance natural carbon sinks. Storing the carbon dioxide from NETs has the same impact on the atmosphere and climate as simultaneously preventing an equal amount of carbon dioxide from being emitted. Recent analyses found that deploying NETs may be less expensive and less disruptive than reducing some emissions, such as a substantial portion of agricultural and land-use emissions and some transportation emissions. In 2015, the National Academies published *Climate Intervention: Carbon Dioxide Removal and Reliable Sequestration*, which described and initially assessed NETs and sequestration technologies. This report acknowledged the relative paucity of research on NETs and recommended development of a research agenda that covers all aspects of NETs from fundamental science to full-scale deployment. To address this need, *Negative Emissions Technologies and Reliable Sequestration: A Research Agenda* assesses the benefits, risks, and sustainable scale potential for NETs and sequestration. This report also defines the essential components of a research and development program, including its estimated costs and potential impact.

laramie project pdf: *Undoing Gender* Judith Butler, 2004-10-22 *Undoing Gender* constitutes Judith Butler's recent reflections on gender and sexuality, focusing on new kinship, psychoanalysis and the incest taboo, transgender, intersex, diagnostic categories, social violence, and the tasks of social transformation. In terms that draw from feminist and queer theory, Butler considers the norms that govern--and fail to govern--gender and sexuality as they relate to the constraints on recognizable personhood. The book constitutes a reconsideration of her earlier view on gender performativity from *Gender Trouble*. In this work, the critique of gender norms is clearly situated within the framework of human persistence and survival. And to do one's gender in certain ways sometimes implies undoing dominant notions of personhood. She writes about the New Gender Politics that has emerged in recent years, a combination of movements concerned with transgender, transsexuality, intersex, and their complex relations to feminist and queer theory.

laramie project pdf: *Close Range* Annie Proulx, 2007-12-01 From the Pulitzer Prize-winning and bestselling author of *The Shipping News* and *Accordion Crimes* comes one of the most celebrated short story collections of our time. Annie Proulx's masterful language and fierce love of Wyoming are evident in this collection of stories about loneliness, quick violence, and wrong kinds of love. In *The Mud Below*, a rodeo rider's obsession marks the deepening fissures between his family life and self-imposed isolation. In *The Half-Skinned Steer*, an elderly fool drives west to the ranch he grew up on for his brother's funeral, and dies a mile from home. In *Brokeback Mountain*, the difficult affair between two cowboys survives everything but the world's violent intolerance. These are stories of desperation, hard times, and unlikely elation, set in a landscape both brutal and magnificent. Enlivened by folk tales, flights of fancy, and details of ranch and rural work, they juxtapose Wyoming's traditional character and attitudes—confrontation of tough problems, prejudice, persistence in the face of difficulty—with the more benign values of the new west. Stories in *Close Range* have appeared in *The New Yorker*, *The Atlantic Monthly*, *Harper's*, and *GQ*. They have been selected for the O. Henry Stories 1998 and *The Best American Short Stories* of the Century and have won the National Magazine Award for Fiction. This is work by an author writing at the peak of her craft.

laramie project pdf: *Surveillance Valley* Yasha Levine, 2018-02-06 The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter

Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy, but using new information technology to understand their motives and anticipate their movements. This idea -- using computers to spy on people and groups perceived as a threat, both at home and abroad -- drove ARPA to develop the internet in the 1960s, and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech-industry giants like Google, Facebook, and Amazon, revealing how these companies spy on their users for profit, all while doing double duty as military and intelligence contractors. Levine shows that the military and Silicon Valley are effectively inseparable: a military-digital complex that permeates everything connected to the internet, even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden. With deep research, skilled storytelling, and provocative arguments, *Surveillance Valley* will change the way you think about the news -- and the device on which you read it.

laramie project pdf: Mainstream AIDS Theatre, the Media, and Gay Civil Rights Jacob Juntunen, 2016-01-29 This book demonstrates the political potential of mainstream theatre in the US at the end of the twentieth century, tracing ideological change over time in the reception of US mainstream plays taking HIV/AIDS as their topic from 1985 to 2000. This is the first study to combine the topics of the politics of performance, LGBT theatre, and mainstream theatre's political potential, a juxtaposition that shows how radical ideas become mainstream, that is, how the dominant ideology changes. Using materialist semiotics and extensive archival research, Juntunen delineates the cultural history of four pivotal productions from that period—Larry Kramer's *The Normal Heart* (1985), Tony Kushner's *Angels in America* (1992), Jonathan Larson's *Rent* (1996), and Moises Kaufman's *The Laramie Project* (2000). Examining the connection between AIDS, mainstream theatre, and the media reveals key systems at work in ideological change over time during a deadly epidemic whose effects changed the nation forever. Employing media theory alongside nationalism studies and utilizing dozens of reviews for each case study, the volume demonstrates that reviews are valuable evidence of how a production was hailed by society's ideological gatekeepers. Mixing this new use of reviews alongside textual analysis and material study—such as the theaters' locations, architectures, merchandise, program notes, and advertising—creates an uncommonly rich description of these productions and their ideological effects. This book will be of interest to scholars and students of theatre, politics, media studies, queer theory, and US history, and to those with an interest in gay civil rights, one of the most successful social movements of the late twentieth century.
