manila exposed: Postcolonial Urbanism Ryan Bishop, John Phillips, Wei Wei Yeo, 2013-01-11 A common assumption about cities throughout the world is that they are essentially an elaboration of the Euro-American model. Postcolonial Urbanism demonstrates the narrowness of this vision. Cities in the postcolonial world, the book shows, are producing novel forms of urbanism not reducible to Western urbanism. Despite being heavily colonized in the past, Southeast Asia has been largely ignored in discussions about postcolonial theory and in general considerations of global urbanism. An international cast of contributors focuses on the heavily urbanized world region of Southeast Asia to investigate the novel forms of urbanism germinating in postcolonial settings such as Indonesia, Thailand, Singapore, Hanoi, and the Philippines. Offering a mix of theoretical perspectives and empirical accounts, Postcolonial Urbanism presents a panoramic view of the cultures, societies, and politics of the postcolonial city.

manila exposed: State and Society in the Philippines Patricio N. Abinales, Donna J. Amoroso, 2017-07-06 This clear and nuanced introduction explores the Philippines' ongoing and deeply charged dilemma of state-society relations through a historical treatment of state formation and the corresponding conflicts and collaboration between government leaders and social forces. Patricio N. Abinales and Donna J. Amoroso examine the long history of institutional weakness in the Philippines and the varied strategies the state has employed to overcome its structural fragility and strengthen its bond with society. The authors argue that this process reflects the country's recurring dilemma: on the one hand is the state's persistent inability to provide essential services, guarantee peace and order, and foster economic development; on the other is the Filipinos' equally enduring suspicions of a strong state. To many citizens, this powerfully evokes the repression of the 1970s and the 1980s that polarized society and cost thousands of lives in repression and resistance and billions of dollars in corruption, setting the nation back years in economic development and profoundly undermining trust in government. The book's historical sweep starts with the politics of the pre-colonial era and continues through the first year of Rodrigo Duterte's controversial presidency.

manila exposed: Exposed Stacy Alaimo, 2016-10-15 Opening with the statement "The anthropocene is no time to set things straight," Stacy Alaimo puts forth potent arguments for a material feminist posthumanism in the chapters that follow. From trans-species art and queer animals to naked protesting and scientific accounts of fishy humans, Exposed argues for feminist

posthumanism immersed in strange agencies and scale-shifting ethics. Including such divergent topics as landscape art, ocean ecologies, and plastic activism, Alaimo explores our environmental predicaments to better understand feminist occupations of transcorporeal subjectivity. She puts scientists, activists, artists, writers, and theorists in conversation, revealing that the state of the planet in the twenty-first century has radically transformed ethics, politics, and what it means to be human. Ultimately, *Exposed* calls for an environmental stance in which, rather than operating from an externalized perspective, we think, feel, and act as the very stuff of the world.

manila exposed: The Dyess Story - The Eye-Witness Account Of The DEATH MARCH FROM BATAAN [Illustrated Edition] Lt.-Colonel William Dyess, 2014-08-15 [Illustrated with over 30 photos of the author, his unit, escape, his kit etc.] As General MacArthur sailed away from the Philippines vowing to return, he left behind him many American soldiers that had been swept up by the victorious Japanese tide of invasion. One such man was Lt.-Colonel William Edwin 'Ed' Dyess, he and his unit of the 21st Pursuit squadron flew their obsolete P-40 Warhawks against the superior Japanese fighters until no more planes remained. Undaunted he fought on as an infantryman before his eventual capture by the Japanese his deeds of selfless bravery were legendary, including giving his own plane to a fellow aviator so he could fly to safety. Dyess and his brave men deserved a better fate than that which awaited them at the hands of their Japanese captors on the infamous Bataan Death March. Driven north from Bataan, the American and Philippino prisoners were beaten, starved and prodded at the tip of the bayonet toward prison camps that had been callously unprovided with the basic means of existence. In the only successful mass prison escape, Dyess along with his men broke out of their prison camp and made contact with resistance groups. After a time waging further Guerilla operations, Dyess and two other American servicemen were evacuated by submarine to Australia. As Dyess recuperated the American Government knowing the effect that the truth of the atrocities committed by the Japanese would galvanize public opinion allowed the release of his story via the *Chicago Tribune*. The story created a huge storm of outrage directed at the Japanese and of respect and admiration for Dyess and his fellow soldiers who had endured so

much on their behalf. Dyess returned to active service as soon as was possible but tragically died in an airplane accident in 1943, a hero to his men and country. A tragically vivid and gruelling account of one of the most heroic escape stories yet told.

manila exposed: *Turn Down the Heat* A Report for the World Bank by the Potsdam Institute for Climate Impact Research and Analytics., 2013-06-19 This report focuses on the risks of climate change to development in Sub-Saharan Africa, South East Asia and South Asia. Building on the 2012 report, *Turn Down the Heat: Why a 4°C Warmer World Must be Avoided*, this new scientific analysis examines the likely impacts of present day, 2°C and 4°C warming on agricultural production, water resources, and coastal vulnerability. It finds many significant climate and development impacts are already being felt in some regions, and that as warming increases from present day (0.8°C) to 2°C and 4°C, multiple threats of increasing extreme heat waves, sea-level rise, more severe storms, droughts and floods are expected to have further severe negative implications for the poorest and most vulnerable. The report finds that agricultural yields will be affected across the three regions, with repercussions for food security, economic growth, and poverty reduction. In addition, urban areas have been identified as new clusters of vulnerability with urban dwellers, particularly the urban poor, facing significant vulnerability to climate change. In Sub-Saharan Africa, under 3°C global warming, savannas are projected to decrease from their current levels to approximately one-seventh of total land area and threaten pastoral livelihoods. Under 4°C warming, total hyper-arid and arid areas are projected to expand by 10 percent. In South East Asia, under 2°C warming, heat extremes that are virtually absent today would cover nearly 60-70 percent of total land area in northern-hemisphere summer, adversely impacting ecosystems. Under 4°C warming, rural populations would face mounting pressures from sea-level rise, increased tropical cyclone intensity, storm surges, saltwater intrusions, and loss of marine ecosystem services. In South Asia, the potential sudden onset of disturbances to the monsoon system and rising peak temperatures would put water and food resources at severe risk. Well before 2°C warming occurs, substantial reductions in the frequency of low snow years is projected to cause substantial reductions in dry season flow, threatening agriculture. Many of the worst climate impacts could still be avoided by holding warming below 2°C, but the window for action is closing rapidly. Urgent action is also needed to build resilience to a rapidly warming world that will pose significant risks to agriculture, water resources, coastal infrastructure, and human health.
