Two lonely veterans in Hanoi meet years after the war has ended through a newspaper dating service. A psychic assists the search for the body of a long-vanished soldier. The father of a girl suffering from dioxin poisoning struggles with corrupt local officials. The twenty short stories collected in Other Moons range from the intensely personal to narratives that deal with larger questions of remembrance, trauma, and healing. By a diverse set of authors, including many veterans, they span styles from social realism to tales of the fantastic. Yet whether describing the effects of Agent Orange exposure or telling ghost stories, all speak to the unresolved legacy of a conflict that still haunts Vietnam. maria celebrates brazil pdf: *The Archive and the Repertoire* Diana Taylor, 2003-09-12 In *The Archive and the Repertoire* preeminent performance studies scholar Diana Taylor provides a new understanding of the vital role of performance in the Americas. From plays to official events to grassroots protests, performance, she argues, must be taken seriously as a means of storing and transmitting knowledge. Taylor reveals how the repertoire of embodied memory—conveyed in gestures, the spoken word, movement, dance, song, and other performances—offers alternative perspectives to those derived from the written archive and is particularly useful to a reconsideration of historical processes of transnational contact. *The Archive and the Repertoire* invites a remapping of the Americas based on traditions of embodied practice. Examining various genres of performance including demonstrations by the children of the disappeared in Argentina, the Peruvian theatre group Yuyachkani, and televised astrological readings by Univision personality Walter Mercado, Taylor explores how the archive and the repertoire work together to make political claims, transmit traumatic memory, and forge a new sense of cultural identity. Through her consideration of performances such as Coco Fusco and Guillermo Gómez-Peña's show *Two Undiscovered Amerindians Visit . . .*, Taylor illuminates how scenarios of discovery and conquest haunt the Americas, trapping even those who attempt to dismantle them. Meditating on events like those of September 11, 2001 and media representations of them, she examines both the crucial role of performance in contemporary culture and her own role as witness to and participant in hemispheric dramas. *The Archive and the Repertoire* is a compelling demonstration of the many ways that the study of performance enables a deeper understanding of the past and present, of ourselves and others.

maria celebrates brazil pdf: The Googolization of Everything Siva Vaidhyanathan, 2012-03-13 In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—To organize the world's information and make it universally accessible—and its much-quoted motto, Don't be evil. In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googolization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the evil it pledged to avoid.

maria celebrates brazil pdf: We Are All Cannibals Claude Lévi-Strauss, 2016-03-15 On Christmas Eve 1951, Santa Claus was hanged and then publicly burned outside of the Cathedral of Dijon in France. That same decade, ethnologists began to study the indigenous cultures of central New Guinea, and found men and women affectionately consuming the flesh of the ones they loved. Everyone calls what is not their own custom barbarism, said Montaigne. In these essays, Claude Lévi-Strauss shows us behavior that is bizarre, shocking, and even revolting to outsiders but consistent with a people's culture and context. These essays relate meat eating to cannibalism, female circumcision to medically assisted reproduction, and mythic thought to scientific thought.

They explore practices of incest and patriarchy, nature worship versus man-made material obsessions, the perceived threat of art in various cultures, and the innovations and limitations of secular thought. Lévi-Strauss measures the short distance between complex and primitive societies and finds a shared madness in the ways we enact myth, ritual, and custom. Yet he also locates a pure and persistent ethics that connects the center of Western civilization to far-flung societies and forces a reckoning with outmoded ideas of morality and reason.

maria celebrates brazil pdf: Homo Deus Yuval Noah Harari, 2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

maria celebrates brazil pdf: The Anti-Black City Jaime Amparo Alves, 2018-02-13 An important new ethnographic study of São Paulo's favelas revealing the widespread use of race-based police repression in Brazil While Black Lives Matter still resonates in the United States, the movement has also become a potent rallying call worldwide, with harsh police tactics and repressive state policies often breaking racial lines. In *The Anti-Black City*, Jaime Amparo Alves delves into the dynamics of racial violence in Brazil, where poverty, unemployment, residential segregation, and a biased criminal justice system create urban conditions of racial precarity. *The Anti-Black City* provocatively offers race as a vital new lens through which to view violence and marginalization in the supposedly "raceless" São Paulo. Ironically, in a context in which racial ambiguity makes it difficult to identify who is black and who is white, racialized access to opportunities and violent police tactics establish hard racial boundaries through subjugation and death. Drawing on two years of ethnographic research in prisons and neighborhoods on the periphery of this mega-city, Alves documents the brutality of police tactics and the complexity of responses deployed by black residents, including self-help initiatives, public campaigns against police violence, ruthless gangs, and self-policing of communities. *The Anti-Black City* reveals the violent and racist ideologies that underlie state fantasies of order and urban peace in modern Brazil. Illustrating how "governing through death" has become the dominant means for managing and controlling ethnic populations in the neoliberal state, Alves shows that these tactics only lead to more marginalization, criminality, and violence. Ultimately, Alves's work points to a need for a new approach to an intractable problem: how to govern populations and territories historically seen as "ungovernable."

maria celebrates brazil pdf: Catholic Missionaries and Their Work with the Poor Albino Barrera, 2018-12-21 This book explores the vital role of faith-based organizations (FBOs) in

compensating for the market's and government's inability to provide vital services. Its key theoretical contribution is the notion that poverty is the result of a triadic failure—when markets, government, and civil society become dysfunctional at the same time. Using data on Catholic missionaries' development work, this study presents the various ways by which FBOs mitigate market and government failures in healthcare, education, and social services, and in the process build and strengthen civil society. This study has two main objectives. First, it aims to present an overview of missionaries' development work, evaluating the socioeconomic significance of their faith-based development work. In addition, various comparative advantages and disadvantages have been imputed to FBOs in the religion-development literature, and we assess to what extent missionaries actually exhibit these posited qualities in practice. Second, the groundwork is laid for future religion-development scholars by presenting a theoretical framework and a method for evaluating the role and contributions of FBOs in the larger community. This is an important investigation of contemporary worldwide Christianity and its relationship with development. As such, it will interest scholars of religious studies and missiology, as well as development economics, public service and the political economy.

Scholars and pastoral leaders from Chile, Bolivia, Brazil, Mexico, the United States, and Canada, and Indigenous peoples of Mapuche, Chiquitano, Tzeltal Maya, Oglala Sioux, Mi'kmaw, and Anishinaabe-Ojibwe reflect on the possibility of constructing decolonial theology and pastoral praxis, and on the urgent need for transformation of church structures and old theology. The book opens new horizons for different ways of thinking and acting, and for the emergence of a truly intercultural theology.
