Winner of the Wilfrid Eggleston Award for Nonfiction *Selected as a Most Anticipated Book of Fall by The Globe and Mail and The Toronto Star* An insightful and perspective-shifting new book, from a celebrated journalist, about reclaiming identity and revealing the surprising history of the Muslim diaspora in the west—from the establishment of Canada’s first mosque through to the long-lasting effects of 9/11 and the devastating Quebec City mosque shooting. “Until recently, Muslim identity was imposed on me. But I feel different about my religious heritage in the era of ISIS and Trumpism, Rohingya and Uyghur genocides, ethnonationalism and misinformation. I’m compelled to reclaim the thing that makes me a target. I’ve begun to examine Islam closely with an eye for how it has shaped my values, politics, and connection to my roots. No doubt, Islam has a place within me. But do I have a place within it?” Omar Mouallem grew up in a Muslim household, but always questioned the role of Islam in his life. As an adult, he used his voice to criticize what he saw as the harms of organized religion. But none of that changed the way others saw him. Now, as a father, he fears the challenges his children will no doubt face as Western nations become increasingly nativist and hostile toward their heritage. In *Praying to the West*, Mouallem explores the unknown history of Islam across the Americas, traveling to thirteen unique mosques in search of an answer to how this religion has survived and thrived so far from the place of its origin. From California to Quebec, and from Brazil to Canada’s icy north, he meets the members of fascinating communities, all of whom provide different perspectives on what it means to be Muslim. Along this journey he comes to understand that Islam has played a fascinating role in how the Americas were shaped—from industrialization to the changing winds of politics. And he also discovers that there may be a place for Islam in his own life, particularly as a father, even if he will never be a true believer. Original, insightful, and beautifully told, *Praying to the West* reveals a secret history of home and the struggle for belonging taking place in towns and cities across the Americas, and points to a better, more inclusive future for everyone.

mettler toledo wildcat: *Stalin* Ronald Grigor Suny, 2022-03-29 This biography of the young Stalin is more than the story of how a revolutionary was made: it is the first serious investigation, using the full range of Russian and Georgian archives, to explain Stalin's evolution from a romantic and idealistic youth into a hardened political operative. Suny takes seriously the first half of Stalin's life: his intellectual development, his views on issue of nationalities and nationalism, and his role in the Social Democratic debates of the late nineteenth and early twentieth centuries. This book narrates an almost tragic downfall; we see Stalin transform from a poor provincial seminarian, who wrote romantic nationalist poetry, into a fearsome and brutal ruler. Many biographers of Stalin turn to shallow psychological analysis in seeking to explain his embrace of revolution, focusing on the beatings he suffered at the hands of his father or his hero-worship of Lenins, or sensationalizing Stalin's involvement in violent activity. Suny seeks to show Stalin in the complex context of the oppressive tsarist police-state in which he lived and debates and party politics that animated the revolutionary circles in which he moved. Though working from fragmentary evidence from disparate sources, Suny is able to place Stalin in his intellectual and political context and reveal, not only a different analysis of the man's psychological and intellectual transformation, but a revisionist history of the revolutionary movements themselves before 1917--
