solutions webquest answer key: The Whole-Brain Child Daniel J. Siegel, Tina Payne Bryson, 2011-10-04 NEW YORK TIMES BESTSELLER • More than 1 million copies in print! • The authors of No-Drama Discipline and The Yes Brain explain the new science of how a child's brain is wired and how it matures in this pioneering, practical book. "Simple, smart, and effective solutions to your child's struggles."—Harvey Karp, M.D. In this pioneering, practical book, Daniel J. Siegel, neuropsychiatrist and author of the bestselling Mindsight, and parenting expert Tina Payne Bryson offer a revolutionary approach to child rearing with twelve key strategies that foster healthy brain development, leading to calmer, happier children. The authors explain—and make accessible—the new science of how a child's brain is wired and how it matures. The "upstairs brain," which makes decisions and balances emotions, is under construction until the mid-twenties. And especially in young children, the right brain and its emotions tend to rule over the logic of the left brain. No wonder kids throw tantrums, fight, or sulk in silence. By applying these discoveries to everyday parenting, you can turn any outburst, argument, or fear into a chance to integrate your child's brain and foster vital growth. Complete with age-appropriate strategies for dealing with day-to-day struggles and illustrations that will help you explain these concepts to your child, The Whole-Brain Child shows you how to cultivate healthy emotional and intellectual development so that your children can lead balanced, meaningful, and connected lives. "[A] useful child-rearing resource for the entire family . . . The authors include a fair amount of brain science, but they present it for both adult and child audiences."—Kirkus Reviews "Strategies for getting a youngster to chill out [with] compassion."—The Washington Post "This erudite, tender, and funny book is filled with fresh ideas based on the latest neuroscience research. I urge all parents who want kind, happy, and emotionally healthy kids to read The Whole-Brain Child. This is my new baby gift."—Mary Pipher, Ph.D., author of Reviving Ophelia and The Shelter of Each Other "Gives parents and teachers ideas to get all parts of a healthy child's brain working together."—Parent to Parent

solutions webquest answer key: The Nutshell Studies of Unexplained Death Corinne May Botz, 2004-09-28 The Nutshell Studies of Unexplained Death offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.
