sergio linhares: Evolution Education and the Rise of the Creationist Movement in Brazil

Kristin Cook, Alandeom W. Oliveira, 2019-09-15 Evolution Education and the Rise of the Creationist Movement in Brazil examines how larger societal forces such as religion, media, and politics have shaped Brazil's educational landscape and impacted the teaching and learning of evolution within an increasingly polarized discourse in recent years. To this end, Alandeom W. Oliveira and Kristin Cook have assembled a number of educational scholars and practitioners, many of whom are based in Brazil, to provide up-close and in-depth accounts of classroom-based evolution instruction, teacher preparation programs, current educational policies, and commonly used school curricula. Contributors also present information on Brazilian teachers' and students' attitudes toward—and understanding of— evolution, emergent (mis)conceptions of evolution, and international comparisons of evolution acceptance and understanding in Brazil compared to other countries. Across the three sections of this book, readers see a nation navigating the complexity of multiple spheres of thought about evolution and its role in the K-12 and postsecondary curriculum. Suggesting the rise of an influential creationist movement in Brazil, this book illuminates the dynamic sociological processes at play in the educational sphere of Latin America in a globalized era that allows for rapid worldwide travel of competing ideologies. Scholars of Latin American studies, religion, education, sociology, and political science will find this book especially useful.

sergio linhares: No Timber Without Trees Duncan Poore, 2013-11-05 Much of the world's tropical timber is still supplied from natural forest, but under current systems of management the forests are rapidly becoming exhausted. Unless management practices change to become genuinely sustainable, neither the forests nor the essential contribution of the timber industry to many economies will survive. Duncan Poore reviews the extent to which natural forests are already being sustainably managed for timber production, and looks at how these practices can be enlarged. He places management for timber in the wider context of tropical forest conservation and outlines a strategy for further action. Thoroughly researched and accessibly written, this book will be useful for everyone working or interested in the subject of tropical forests. Foreword by Dato Dr B.C.Y. sergio linhares: **Fragile Governance and Local Economic Development** Sergio Montero, Karen Chapple, 2018-08-17 Much of our understanding of local economic development is based on large urban agglomerations as nodes of innovation and competitive advantage, connecting territories to global value chains. However, this framework cannot so easily be applied to peripheral regions and secondary cities in either the Global South or the North. This book proposes an alternative way of looking at local economic development based on the idea of fragile governance and three variables: associations and networks; learning processes; and leadership and conflict management in six Latin American peripheral regions. The case studies illustrate the challenges of governance in small and intermediate cities in Latin America, and showcase strategies that are being used to achieve a more resilient and territorial vision of local economic development. This book will be of interest to students and researchers of local economic development, urban and regional studies, and political economy in Latin America as well as to policy-makers and practitioners interested in local and regional economic development policy.

sergio linhares: For Land and Liberty Merle L. Bowen, 2021-04-22 For Land and Liberty is a comparative study of the history and contemporary circumstances concerning Brazil's quilombos (African-descent rural communities) and their inhabitants, the quilombolas. The book examines the disposition of quilombola claims to land as a site of contestation over citizenship and its meanings for Afro-descendants, as well as their connections to the broader fight against racism. Contrary to the narrative that quilombola identity is a recent invention, constructed for the purpose of qualifying for opportunities made possible by the 1988 law, Bowen argues that quilombola claims are historically and locally rooted. She examines the ways in which state actors have colluded with large landholders and modernization schemes to appropriate quilombo land, and further argues that, even when granted land titles, quilombolas face challenges issuing from systemic racism. By analyzing the quilombo movement and local initiatives, this book offers fresh perspectives on the resurgence of movements, mobilization, and resistance in Brazil.

sergio linhares: Biographical dictionary of refugees of nazi fascism in Brazil Casa Stefan Zweig, 2022-04-27 They were musicians, writers, painters, actors, scientists, mathematicians,

architects, doctors, photographers, dancers, businessmen and even circus clowns, police officers and football coaches. All refugees from nazi fascism, who sought salvation from 1933 onwards. They are remembered in 300 illustrated biographies, representing the thousands of fugitives who made or remade their lives and careers in Brazil and contributed so much to Brazilian society. Each trajectory, an epic, from birth and training in the Old World, the terrible dangers and sufferings faced with the arrival of Nazism, the struggles and adventures to escape, obtain visas and embark towards freedom. sergio linhares: Slave Life in Rio de Janeiro, 1808-1850 Mary C. Karasch, 2019-01-29 Rio de Janeiro in the first half of the nineteenth century had the largest population of urban slaves in the Americas—primary contributors to the atmosphere and vitality of the city. Although most urban historians have ignored these inhabitants of Rio, Mary Karasch's generously illustrated study provides a comprehensive description and analysis of the city's rich Afro-Cariocan culture, including its folklore, its songs, and accounts of its oral history. Professor Karasch's investigation of the origins of Rio's slaves demonstrates the importance of the Central Africaness of the slave population to an understanding of its culture. Challenging the thesis of the comparative mildness of the Brazilian slave system, other chapters discuss the marketing of Africans in the Valongo, the principal slave market, and the causes of early slave mortality, including the single greatest killer, tuberculosis. Also examined in detail are adaptation and resistance to slavery, occupations and roles of slaves in an urban economy, and art, religion, and associational life. Mary C. Karasch is Associate Professor of History at Oakland University in Rochester, Michigan. Originally published in 1987. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. sergio linhares: Marxist Historiographies Q. Edward Wang, Georg G. Iggers, 2015-07-16 Marxist Historiographies is the first book to examine the ebb and flow of Marxist historiography from a global and cross-cultural perspective. Since the eighteenth century, few schools of historical thought have exerted a more lasting impact than Marxism, and this impact extends far beyond the Western world within which it is most commonly analysed. Edited by two highly respected authors in the field, this book deals with the effect of Marxism on historical writings not only in parts of Europe, where it originated, but also in countries and regions in Africa, Asia, North and South America and the Middle East. Rather than presenting the chapters geographically, it is structured with respect to how Marxist influence was shown in the works of historians in a particular area. This title takes a dual approach to the subject; some chapters are national in scope, addressing the Marxist impact on historical practices within a country, whereas others deal with the varied expressions of Marxist historiography throughout a wider region. Taking a truly global perspective on this topic, Marxist Historiographies demonstrates clearly the breadth and depth of Marxism's influence in historical writing throughout the world and is essential reading for all students of historiography.

sergio linhares: Brazilian Crops in the Global Market Herbert S. Klein, Francisco Vidal Luna, 2023-09-17 This book comprehensively examines the development of Brazilian agriculture by focusing on the crops which evolved from national products to international commodities on a

massive scale. It traces the transformation of Brazil from a country with low-yield levels in 1950 to its current position as a leading world producer. The first section of the book examines the modernization of Brazilian agriculture through a government programme which transformed traditional agriculture through subsidized credit, guaranteed prices, stock purchases, land utilization laws, modern research, new technology and major support for exports. It also explores the changing structures of agricultural production and farm ownership over time, analysing national censuses from 1920 to 2017 to illustrate the increasing efficiency of Brazil's agricultural workers. The book then discusses the history and evolution of the major Brazilian crops in detail, starting with the newer export crops such as soybeans, maize and cotton, before focusing on the traditional sugar and coffee industries. The final section of the book examines two other major areas of agroindustry: forestry and the evolution of the pastoral industries, as well as the growth of a meat exporting sector. The authors also explore questions of sustainability in the context of today's climate challenges, and the role of Brazilian agriculture in the world market going forward. This wide-ranging study will be of interest to a range of academics, including those working in agricultural economics, economic history, the history of Latin America and the history of agriculture more broadly.

sergio linhares: *Brazilian Agrarian Social Movements* Rebecca Tarlau, Anthony Pahnke, 2018-02-02 Contradictions between impressive levels of economic growth and the persistence of poverty and inequality are perhaps nowhere more evident than in rural Brazil. While Brazil might appear to be an example of the potential harmony between large-scale, export-oriented agribusiness and small-scale family farming, high levels of rural resistance contradict this vision. In this volume, individual contributions from a variety of researchers across the field highlight seven key characteristics of contemporary Brazilian resistance that have broader resonance in the region and beyond: the growth of international networks, the changing structure of state-society collaboration, the deepening of territorial claims, the importance of autonomy, the development of alternative economies, continued opposition to dispossession, and struggles over the meaning of nature. By analyzing rural mobilization in Brazil, this collection offers a range of insights relevant to rural contention globally. Each contribution in this title increases our understanding of alternative agricultural production, large-scale development projects, education, race and political parties in the contemporary agrarian context. This book was previously published as a special issue of the *Journal of Peasant Studies*.

sergio linhares: *Laborers and Enslaved Workers* Marcelo Badaró Mattos, 2017-09-01 From the middle of the nineteenth century until the 1888 abolition of slavery in Brazil, Rio de Janeiro was home to the largest urban population of enslaved workers anywhere in the Americas. It was also the site of an incipient working-class consciousness that expressed itself across seemingly distinct social categories. In this volume, Marcelo Badaró Mattos demonstrates that these two historical phenomena cannot be understood in isolation. Drawing on a wide range of historical sources, Badaró

Mattos reveals the diverse labor arrangements and associative life of Rio's working class, from which emerged the many strategies that workers both free and unfree pursued in their struggles against oppression.

sergio linhares: Why Forests? Why Now? Frances Seymour, Jonah Busch, 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. *Why Forests? Why Now?* synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

When a small team of investigators discovered that a black market currency dealer was operating out of a Brazilian petrol station, they could never have imagined that their work would destroy the government and lead to the impeachment of two presidents. As the trail leads further and further into the centre of power, the search for the truth and pursuit of justice become ever more crucial. Taut and riveting, with more plot twists than the most compelling political thriller, *The Mechanism* is an essential work of non-fiction that exposes the rotteness caused when politicians and big businesses believe they are above the law.

sergio linhares: *Legalizing Identities* Jan Hoffman French, 2009-06-01 Anthropologists widely agree that identities--even ethnic and racial ones--are socially constructed. Less understood are the processes by which social identities are conceived and developed. Legalizing Identities shows how law can successfully serve as the impetus for the transformation of cultural practices and collective

identity. Through ethnographic, historical, and legal analysis of successful claims to land by two neighboring black communities in the backlands of northeastern Brazil, Jan Hoffman French demonstrates how these two communities have come to distinguish themselves from each other while revising and retelling their histories and present-day stories. French argues that the invocation of laws by these related communities led to the emergence of two different identities: one indigenous (Xoco Indian) and the other quilombo (descendants of a fugitive African slave community). With the help of the Catholic Church, government officials, lawyers, anthropologists, and activists, each community won government recognition and land rights, and displaced elite landowners. This was accomplished even though anthropologists called upon to assess the validity of their claims recognized that their identities were constructed. The positive outcome of their claims demonstrates that authenticity is not a prerequisite for identity. French draws from this insight a more sweeping conclusion that, far from being evidence of inauthenticity, processes of construction form the basis of all identities and may have important consequences for social justice.

sergio linhares: Colonial Legacies Jeremy Adelman, 2012-12-06 More than other Atlantic societies, Latin America is shackled to its past. This collection is an exploration of the binding historical legacies--the making of slavery, patrimonial absolutist states, backward agriculture and the imprint of the Enlightenment--with which Latin America continues to grapple. Leading writers and scholars reflect on how this heritage emerged from colonial institutions and how historians have tackled these legacies over the years, suggesting that these deep encumbrances are why the region has failed to live up to liberal-capitalist expectations. They also invite discussion about the political, economic and cultural heritages of Atlantic colonialism through the idea that persistence is a powerful organizing framework for understanding particular kinds of historical processes.
