It begins with a young man, Candide, who is living a sheltered life in an Edenic paradise and being indoctrinated with Leibnizian optimism (or simply Optimism) by his mentor, Pangloss. The work describes the abrupt cessation of this lifestyle, followed by Candide's slow, painful disillusionment as he witnesses and experiences great hardships in the world. Voltaire concludes with Candide, if not rejecting optimism outright, advocating a deeply practical precept, we must cultivate our garden, in lieu of the Leibnizian mantra of Pangloss, all is for the best in the best of all possible worlds. Candide is characterized by its sarcastic tone, as well as by its erratic, fantastical and fast-moving plot. A picaresque novel it parodies many adventure and romance clichés, the struggles of which are caricatured in a tone that is mordantly matter-of-fact. Still, the events discussed are often based on historical happenings, such as the Seven Years' War and the 1755 Lisbon earthquake. As philosophers of Voltaire's day contended with the problem of evil, so too does Candide in this short novel, albeit more directly and humorously. Voltaire ridicules religion, theologians, governments, armies, philosophies, and philosophers through allegory; most conspicuously, he assaults Leibniz and his optimism. As expected by Voltaire, Candide has enjoyed both great success and great scandal. Immediately after its secretive publication, the book was widely banned because it contained religious blasphemy, political sedition and intellectual hostility hidden under a thin veil of naïveté. However, with its sharp wit and insightful portrayal of the human condition, the novel has since inspired many later authors and artists to mimic and adapt it. Today, Candide is recognized as Voltaire's magnum opus and is often listed as part of the Western canon; it is arguably taught more than any other work of French literature. It was listed as one of The 100 Most Influential Books Ever Written.

In the tradition of Tom Wolfe and Hunter S. Thompson, Stephen Marshall, a Sundance Award-winning director and co-founder of Guerrilla News Network, hits the road and travels from the front lines of the Iraq war, through the wasteland of the former Communist Eastern bloc, into a coke-dusted sex party of Britain's intellectual elite, and into the minds of America's most influential liberal figures. Marshall finds America's most powerful liberals, all part of the same baby boomer generation that has dominated US political life since their voices broke in the 1960s, pushing a new form of "liberal interventionism" that threatens to use force to bring political freedom to oppressed people. But is the democracy they are exporting to the world really what they say it is? Or have liberals buckled under the pressure of America's declining fortunes and taken on the role of good cop to the conservatives' bad? Featuring interviews with Christopher Hitchens, Gore Vidal, David Horowitz, Lewis Lapham, John Avlon, The Economist's John Micklethwait, Guardian Editor-in-Chief Alan Rusbridger, and best-selling authors Thomas Friedman, Paul Berman, and John Perkins.
