somewhere over the rainbow score: *The Songs of Hollywood* Philip Furia, Laurie Patterson, 2010-04-07 From *Over the Rainbow* to *Moon River* and from Al Jolson to Barbra Streisand, *The Songs of Hollywood* traces the fascinating history of song in film, both in musicals and in dramatic movies such as *High Noon*. Extremely well-illustrated with 200 film stills, this delightful book sheds much light on some of Hollywood's best known and loved repertoire, explaining how the film industry made certain songs memorable, and highlighting important moments of film history along the way. The book focuses on how the songs were presented in the movies, from early talkies where actors portrayed singers performing the songs, to the Golden Age in which characters burst into expressive, integral song--not as a performance but as a spontaneous outpouring of feeling. The book looks at song presentation in 1930s classics with Fred Astaire and Ginger Rogers and in 1940s gems with Judy Garland and Gene Kelly. The authors also look at the decline of the genre since 1960, when most original musicals were replaced by film versions of Broadway hits such as *My Fair Lady*.

somewhere over the rainbow score: *Wicked* Paul R. Laird, 2011-06-24 In 2004, the original Broadway production of *Wicked* earned 10 Tony nominations, including best musical. Based on the best-selling novel by Gregory Maguire, the show continues to run on Broadway and has touring companies throughout the United States and around the world. In *Wicked: A Musical Biography*, author Paul Laird explores the creation of this popular Broadway musical through an examination of draft scripts, interviews with major figures, and the study of primary musical sources such as sketches, drafts, and completed musical scores. Laird brings together an impressive amount of detail on the creation of *Wicked*, including a look at Maguire's novel, as well as the original source

material, *The Wizard of Oz*. This volume also offers a history of the show's genesis along with examinations of the draft scenarios and scripts that demonstrate the show's development. Laird also explores Stephen Schwartz's life and work, providing an analysis of the composer and lyricist's work on the show through song drafts, sketches, and musical examples. Laird also surveys the show's critical reception in New York and London, noting how many critics failed to appreciate its qualities or anticipate its great success. The unusual nature of *Wicked*'s story—dominated by two strong female leads—is also placed in the context of Broadway history. A unique look into a successful Broadway production, *Wicked: A Musical Biography* will be of interest to musicologists, theatre scholars, students, and general readers alike.

somewhere over the rainbow score: *The Spectre of Sound* Kevin Donnelly, 2019-07-25 This book is a major new study - dealing with notions of film music as a device that desires to control its audience, using a most powerful thing: emotion. The author emphasises the manipulative and ephemeral character of film music dealing not only with traditional orchestral film music, but also looks at film music's colonisation of television, and discusses pop music in relation to films, and the historical dimensions to ability to possess audiences that have so many important cultural and aesthetic effects. It challenges the dominant but limited conception of film music as restricted to film by looking at its use in television and influence in the world of pop music and the traditional restriction of analysis to 'valued' film music, either from 'name' composers' or from the 'golden era' of Classical Hollywood. Focusing on areas as diverse as horror, pop music in film, ethnic signposting, television drama and the soundtrack without a film- this is an original study which expands the range of writing on the subject.
