self study bible course pdf: The Fourfold Gospel J. W. McGarvey, Philip Y. Pendleton, 2010-03

The classic Harmony of the Gospels by J. W. McGarvey and Philip Y. Pendleton with interspersed comments. Attractively re-typeset, this enduring work is a valuable resource to modern Bible students. In most commentaries a fifth or sixth of the space is taken up in drawing distinctions between the texts of the four Gospels, while in this work these distinctions are placed before the reader's eye, where he can see them for himself at a glance. Moreover, in other commentaries, which give the text, another sixth or seventh of the work is taken up in reprinting in the notes that portion of the text concerning which the commentator wishes to speak. Our interjected method avoids all this needless repetition, and makes it possible for us to present the comment with the least preliminary verbiage or introductory setting. Time is also saved because the reader does not have to look back and forth from the text at the top to the comment at the bottom of the page. Again, other commentaries lose a large amount of space by using the King James text. Those which preceded the revision waste space correcting the translation and modernizing its English: those published since the revision suffer a similar waste by drawing endless comparisons between the two texts. By choosing the American revision as the basis for our work, we have a text which needs but little explanation or apology, and we are thereby enabled to employ the reader's time and strength to his best advantage. --Excerpted from the Introduction

self study bible course pdf: Deep Learning Ian Goodfellow, Yoshua Bengio, Aaron Courville, 2016-11-10 An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. "Written by three experts in the field, Deep Learning is the only comprehensive book on the subject." —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. self study bible course pdf: Sacred Scripture Daniel L. Smith-Christopher, J. Patrick Mullen,

2013 (©2013) The Subcommittee on the Catechism, United States Catholic Bishops, has found that this catechetical high school text is in conformity with the Catechism of the Catholic Church and fulfills the requirements of Elective Course A of the Doctrinal Elements of a Curriculum Framework for the Development of the Catechetical Materials for Young People of High School Age. Sacred Scripture: A Catholic Study of God's Word presents the Bible to students as a living source of God's Revelation to us. It gathers the two covenants of Scripture and the seventy-two books of the Bible under the umbrella of Church teaching, which holds that in Sacred Scripture, God speaks only one single Word, his one Utterance in whom he expresses himself completely (CCC, 102). This introduction to the biblical texts is both a companion for prayerful study and a survey of the context, message, and authorship of each book. It also provides students with a plan for reading and studying the Bible in concert with the Holy Spirit and Church teaching. The text provides historical context for biblical literature and its analysis is mindful that Scripture must be read within the living Tradition of the Church; in so doing, the text examines the relationship between Scripture and the doctrines of the Catholic faith. While modern historical-critical scholarship is not ignored, the text is balanced by emphasis on the multiple senses of Scripture: literal, spiritual, allegorical, moral, and anagogical.
