standard of excellence pdf: *Finding What Works in Health Care* Institute of Medicine, Board on Health Care Services, Committee on Standards for Systematic Reviews of Comparative Effectiveness Research, 2011-07-20 Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In *Finding What Works in Health Care* the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. *Finding What Works in Health Care* also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research.

standard of excellence pdf: *Governing in a Global World* Maria J. D'Agostino, Marilyn Marks Rubin, 2017-11-28 *Governing in a Global World* captures the panorama of women governing around the world. Even though the modern era marks history's greatest advancements for women, worldwide they hold fewer than 30 percent of decision-making positions and are often missing from negotiating tables where policies are made and conflicts resolved. The opening chapters present trends and context for studying women in public service by focusing on path-setters across the globe, the status of women in the world's executive and legislative bodies, and their participation in public service across several nations. Later chapters examine power, leadership and representation of women in public service, with several chapters looking at women governing from a regional perspective in the Middle East, Sub Sahara Africa, Latin America, and China. The final chapter presents empirical evidence that shows how policies to increase women's representation in the public arena reduce gender inequality more than any other policy intervention. Taken together, the chapters illustrate the worldwide importance of, and challenges to, promoting gender equality and women governing.
