sunjata pdf: *Translation Revisited* Mamadou Diawara, Elísio S. Macamo, Jean-Bernard Ouédraogo, 2019-01-17 How realistic is it to expect translation to render the world intelligible in a context shaped by different historical trajectories and experiences? Can we rely on human universals to translate through the unique and specific webs of meaning that languages represent? If knowledge production is a kind of translation, then it is fair to assume that the possibility of translation has largely rested on the idea that Western experience is the repository of these human universals against the background of which different human experiences can be rendered intelligible. The problem with this assumption, however, is that there are limits to Western claims to universalism, mainly because these claims were at the service of the desire to justify imperial expansion. This book addresses issues arising from these claims to universalism in the process of producing knowledge about diverse African social realities. It shows that the idea of knowledge production as translation can be usefully deployed to inquire into how knowledge of Africa translates into an imperial attempt at changing local norms, institutions and spiritual values. Translation, in this sense, is the normalization of meanings issuing from a local historical experience claiming to be universal. The task of producing knowledge of African social realities cannot be adequately addressed without a prior critical engagement with how translation has come to shape our ways of rendering Africa intelligible.

sunjata pdf: *African Dominion* Michael A. Gomez, 2018-01-01 A groundbreaking history that

puts early and medieval West Africa in a global context Pick up almost any book on early and medieval world history and empire, and where do you find West Africa? On the periphery. This pioneering book, the first on this period of the region's history in a generation, tells a different story. Interweaving political and social history and drawing on a rich array of sources, including Arabic manuscripts, oral histories, and recent archaeological findings, Michael Gomez unveils a new vision of how categories of ethnicity, race, gender, and caste emerged in Africa and in global history more generally. Scholars have long held that such distinctions arose during the colonial period, but Gomez shows they developed much earlier. Focusing on the Savannah and Sahel region, Gomez traces the exchange of ideas and influences with North Africa and the Central Islamic Lands by way of merchants, scholars, and pilgrims. Islam's growth in West Africa, in tandem with intensifying commerce that included slaves, resulted in a series of political experiments unique to the region, culminating in the rise of empire. A major preoccupation was the question of who could be legally enslaved, which together with other factors led to the construction of new ideas about ethnicity, race, gender, and caste—long before colonialism and the transatlantic slave trade. Telling a radically new story about early Africa in global history, *African Dominion* is set to be the standard work on the subject for many years to come.

sunjata pdf: Reading Africa into American Literature Keith Cartwright, 2014-10-17 The literature often considered the most American is rooted not only in European and Western culture but also in African and American Creole cultures. DuBois, Alex Haley, Zora Neale Hurston, Ralph Ellison, William Faulkner, Joel Chandler Harris, Herman Melville, Toni Morrison, and many others in the context of the history, spiritual traditions, folklore, music, linguistics, and politics out of which they were written. Cartwright grounds his study of American writings in texts from the Senegambian/Old Mali region of Africa. Pinn, 2019-09-25 Kendrick Lamar has established himself at the forefront of contemporary hip-hop culture. Artistically adventurous and socially conscious, he has been unapologetic in using his art form, rap music, to address issues affecting black lives while also exploring subjects fundamental to the human experience, such as religious belief. This book is the first to provide an interdisciplinary academic analysis of the impact of Lamar's corpus. In doing so, it highlights how Lamar's music reflects current tensions that are keenly felt when dealing with the subjects of race, religion and politics. Starting with Section 80 and ending with DAMN., this book deals with each of Lamar's four major projects in turn. A panel of academics, journalists and hip-hop practitioners show how religion, in particular black spiritualities, take a front-and-center role in his work. They also observe that his astute and biting thoughts on race and culture may come from an African American perspective, but many find something familiar in Lamar's lyrical testimony across great chasms of social and geographical difference. This sophisticated exploration of one of popular culture's emerging icons reveals a complex and multi faceted engagement with religion, faith, race, art and culture. As such, it will be vital reading for anyone working in religious, African American and hip-hop studies, as well as scholars of music, media and popular culture.

sunjata pdf: African Voices on Slavery and the Slave Trade: Volume 1, The Sources Alice Bellagamba, Sandra E. Greene, Martin A. Klein, 2013-05-13 Though the history of slavery is a central topic for African, Atlantic world and world history, most of the sources presenting research in this area are European in origin. To cast light on African perspectives, and on the point of view of enslaved men and women, this group of top Africanist scholars has examined both conventional historical sources (such as European travel accounts, colonial documents, court cases, and missionary records) and less-explored sources of information (such as folklore, oral traditions, songs and proverbs, life histories collected by missionaries and colonial officials, correspondence in Arabic, and consular and admiralty interviews with runaway slaves). Each source has a short introduction highlighting its significance and orienting the reader. This first of two volumes provides students and scholars with a trove of African sources for studying African slavery and the slave trade.

sunjata pdf: Wa and the Wala Ivor Wilks, 2002-07-04 In the late seventeenth century Wala

emerged as a small state in what is now northwestern Ghana. Its creation involved on the one hand warrior groups of Mande, Dagomba and Mamprusi origins, and on the other hand scholars from the centres of Muslim learning on the Middle Niger. Ivor Wilks traces the history of Wala from its beginnings to the present, paying particular attention to relations between the Muslim and non-Muslim elements in its population. He also examines the impact of Zabarima, Samorian, British and French intrusions into Wala affairs. By the use of orally transmitted traditions and recensions of these in Arabic and Hausa, he is able to show how the Wala themselves view their past. Wala is periodically convulsed by crises often resulting in communal violence. He suggests that the policy maker involved in the region's political problems needs a sound knowledge of Wala history and an understanding of the deeper structures of Wala society, especially in the context of official support for decentralization.

sunjata pdf: *A Companion to World Literature* Ken Seigneurie, 2020-01-10 *A Companion to World Literature* is a far-reaching and sustained study of key authors, texts, and topics from around the world and throughout history. Six comprehensive volumes present essays from over 300 prominent international scholars focusing on many aspects of this vast and burgeoning field of literature, from its ancient origins to the most modern narratives. Almost by definition, the texts of world literature are unfamiliar; they stretch our hermeneutic circles, thrust us before unfamiliar genres, modes, forms, and themes. They require a greater degree of attention and focus, and in turn engage our imagination in new ways. This Companion explores texts within their particular cultural context, as well as their ability to speak to readers in other contexts, demonstrating the ways in which world literature can challenge parochial world views by identifying cultural commonalities. Each unique volume includes introductory chapters on a variety of theoretical viewpoints that inform the field, followed by essays considering the ways in which authors and their books contribute to and engage with the many visions and variations of world literature as a genre. Explores how texts, tropes, narratives, and genres reflect nations, languages, cultures, and periods Links world literary theory and texts in a clear, synoptic style Identifies how individual texts are influenced and affected by issues such as intertextuality, translation, and sociohistorical conditions Presents a variety of methodologies to demonstrate how modern scholars approach the study of world literature A significant addition to the field, *A Companion to World Literature* provides advanced students, teachers, and researchers with cutting-edge scholarship in world literature and literary theory.

sunjata pdf: *The Lieutenant of Kouta* Massa Makan Diabaté, 2017-02-01 *The Lieutenant of Kouta* is the first novel in Massa Makan Diabaté's award-winning trilogy. Featuring an introduction by leading Diabaté scholar Cheick M. Chérif Keita and Shane Auerbach, it tells the story, part tragicomic and part hagiographic, of an African lieutenant in the French Army who returns as a decorated hero from the battlefields of Europe to Kouta, a fictionalized version of the author's own birthplace, the Malian town of Kita. Upon his return, Siriman Keita finds it difficult to adjust to village life as he navigates traditional customs in his attempts to create his place in the predominantly Muslim Kouta. The novel offers a rich and nuanced representation of Mali on the brink of independence; it is a tapestry of traditional Mandinka society and the French colonial apparatus, illustrating the dynamic interplay between the two. This text is, ultimately, a story of one man's transformation coinciding with that of his country.

sunjata pdf: *A Fistful of Shells* Toby Green, 2019-03-21 By the time the "Scramble for Africa" among European colonial powers began in the late nineteenth century, Africa had already been globally connected for centuries. Its gold had fueled the economies of Europe and the Islamic world for nearly a millennium, and the sophisticated kingdoms spanning its west coast had traded with Europeans since the fifteenth century. Until at least 1650, this was a trade of equals, using a variety of currencies—most importantly, cowrie shells imported from the Maldives and nzimbu shells imported from Brazil. But, as the slave trade grew, African kingdoms began to lose prominence in the growing global economy. We have been living with the effects of this shift ever since. With *A Fistful of Shells*, Toby Green transforms our view of West and West-Central Africa by reconstructing

the world of these kingdoms, which revolved around trade, diplomacy, complex religious beliefs, and the production of art. Green shows how the slave trade led to economic disparities that caused African kingdoms to lose relative political and economic power. The concentration of money in the hands of Atlantic elites in and outside these kingdoms brought about a revolutionary nineteenth century in Africa, parallel to the upheavals then taking place in Europe and America. Yet political fragmentation following the fall of African aristocracies produced radically different results as European colonization took hold. Drawing not just on written histories, but on archival research in nine countries, art, oral history, archaeology, and letters, Green lays bare the transformations that have shaped world politics and the global economy since the fifteenth century and paints a new and masterful portrait of West Africa, past and present.

sunjata pdf: A Ritual Geology Robyn d'Avignon, 2022-07-11 Set against the ongoing corporate enclosure of West Africa's goldfields, *A Ritual Geology* tells the untold history of one of the world's oldest indigenous gold mining industries: Francophone West Africa's orpillage. Establishing African miners as producers of subterranean knowledge, Robyn d'Avignon uncovers a dynamic "ritual geology" of techniques and cosmological engagements with the earth developed by agrarian residents of gold-bearing rocks in savanna West Africa. Colonial and corporate exploration geology in the region was built upon the ritual knowledge, gold discoveries, and skilled labor of African miners even as states racialized African mining as archaic, criminal, and pagan. Spanning the medieval and imperial past to the postcolonial present, d'Avignon weaves together long-term ethnographic and oral historical work in southeastern Senegal with archival and archeological evidence from Burkina Faso, Côte d'Ivoire, Guinea, and Mali. *A Ritual Geology* introduces transnational geological formations as a new regional framework for African studies, environmental history, and anthropology.

sunjata pdf: *Teaching the Global Middle Ages* Geraldine Heng, 2022-10-28 While globalization is a modern phenomenon, premodern people were also interconnected in early forms of globalism, sharing merchandise, technology, languages, and stories over long distances. Looking across civilizations, this volume takes a broad view of the Middle Ages in order to foster new habits of thinking and develop a multilayered, critical sense of the past. The essays in this volume reach across disciplinary lines to bring insights from music, theater, religion, ecology, museums, and the history of disease into the literature classroom. The contributors provide guidance on texts such as the *Thousand and One Nights*, *Sunjata*, Benjamin of Tudela's *Book of Travels*, and the *Malay Annals* and on topics such as hotels, maps, and camels. They propose syllabus recommendations, present numerous digital resources, and offer engaging class activities and discussion questions. Ultimately, they provide tools that will help students evaluate popular representations of the Middle Ages and engage with the dynamics of past, present, and future world relationships.

sunjata pdf: The Anthropology of Texts, Persons and Publics Karin Barber, 2007-12-20

What can texts - both written and oral - tell us about the societies that produce them? How are texts constituted in different cultures, and how do they shape societies and individuals? How can we understand the people who compose them? Drawing on examples from Africa and other countries, this original study sets out to answer these questions, by exploring textuality from a variety of angles. Topics covered include the importance of genre, the ways in which oral genres transcend the here-and-now, and the complex relationship between texts and the material world. Barber considers the ways in which personhood is evoked, both in oral poetry and in written diaries and letters, discusses the audience's role in creating the meaning of texts, and shows textual creativity to be a universal human capacity expressed in myriad forms. Engaging and thought-provoking, this book will be welcomed by anyone interested in anthropology, literature and cultural studies.

sunjata pdf: From Timbuktu to the Mississippi Delta Pascal Bokar Thiam, 2015-01-16 *From Timbuktu to the Mississippi Delta* explores how West African standards of aesthetics and sociocultural traits have moved into mainstream American culture and become social norms. I was curious to know why African Americans (and the country as a whole, for that matter) began clapping

on beats two and four, and why we'd get dirty looks if we were caught clapping on the wrong beat. I had a desire to know why the identity of the music of our nation, with its majority population of European descent, had the musical textures, bent pitches, and blue notes of Africa. I wondered why a sense of swing developed here that was closer in syncopation to African culture than to the classical music of Vienna or the Paris Opera. And finally, I wanted to know why our nation's youth moved suggestively on the dance floor with their hips-movements that are closer in aesthetics to African dance than to ballet. The journey began on the banks of the mighty Niger River. Pascal Bokar Thiam, Ed.D., is on the faculty of the University of San Francisco, California, and the French American International School where he teaches jazz and world music courses in the Performing Arts Division. He is a jazz guitarist and vocalist of Senegalese and French background. His CD *Savanna Jazz Club*, which combines the music of Charlie Parker and Dizzy Gillespie with Senegalese rhythms, made the top 40 of U.S. jazz radio stations nationwide. He is the owner of the award-winning Savanna Jazz Club of San Francisco. His areas of interest include jazz education, social justice, and diversity.

sunjata pdf: Mande Music Eric Charry, 2000-10 With *Mande Music*, Eric Charry offers the most comprehensive source available on one of Africa's richest and most sophisticated music cultures. Using resources as disparate as early Arabic travel accounts, oral histories, and archival research as well as his own extensive studies in Mali, Guinea, Senegal, and the Gambia, Charry traces this music culture from its origins in the thirteenth-century Mali empire to the recording studios of Paris and New York. He focuses on the four major spheres of Mande music—hunter's music, music of the *jelis* or griots, *jembe* and other drumming, and guitar-based modern music—exploring how each evolved, the types of instruments used, the major artists, and how each sphere relates to the others. With its maps, illustrations, and musical transcriptions as well as an exhaustive bibliography, discography, and videography, this book is essential reading for those seeking an in-depth look at one of the most exciting, innovative, and deep-rooted phenomena on the world music scene. A compact disc is available separately.

sunjata pdf: The Language of Riddles W. J. Pepicello, Thomas A. Green, 2015-12-18 For the folklorists and linguists who are serious students of what has been designated a minor genre, the riddle is, in fact, a complex linguistic and aesthetic structure that, when subjected to systematic and scientific study, reveals a great deal about the major human systems—such as language, culture, and art—with which it is inextricably bound up. Riddles conform to a model of communication made up of a code and an encoded message that is first transmitted and then decoded. As what Professors Pepicello and Green term a licensed artful communication, the riddle employs quite ordinary language in conventional ways to satisfy the demands placed upon it as the art form that it is. And as an art form, the riddle is subject to constraints that are semiotic (some primary graphic, aural, or other code), aesthetic (artistic conventions that are also semiotic), and grammatical (linguistic restrictions). The riddle operates, therefore, within a cultural framework that is entirely predetermined, and represents what Pepicello and Green designate a conventional performance. The signified of riddles is not easily defined; and indeed it is possible—perhaps even necessary—to distinguish several signata. All riddles, the authors point out, whether they are based on grammatical or metaphorical ambiguity or represent one of the transitional types they identify, are solvable within the confines of the culture in which they have been constructed and in which they are posed. But the signified of a riddle is not its answer. Nor is it an object or a situation. Rather it is the code employed by the riddle itself. Riddles are therefore metalinguistic: ways of using language to deal with language—ways of using language to gain mastery over language. W. J. Pepicello is director of humanities and social sciences in the School of Allied Health Professions at Hahnemann University in Philadelphia. Thomas A. Green is associate professor of English at Texas A&M University.
