Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

the jacket by gary soto pdf: The Cancer Journals Audre Lorde, 2020-10-13 Moving between journal entry, memoir, and exposition, Audre Lorde fuses the personal and political as she reflects on her experience coping with breast cancer and a radical mastectomy. A Penguin Classic First published over forty years ago, *The Cancer Journals* is a startling, powerful account of Audre Lorde's experience with breast cancer and mastectomy. Long before narratives explored the silences around illness and women's pain, Lorde questioned the rules of conformity for women's body images and supported the need to confront physical loss not hidden by prosthesis. Living as a black, lesbian, mother, warrior, poet, Lorde heals and re-envision herself on her own terms and offers her voice, grief, resistance, and courage to those dealing with their own diagnosis. Poetic and profoundly feminist, Lorde's testament gives visibility and strength to women with cancer to define themselves, and to transform their silence into language and action.

the jacket by gary soto pdf: The Social Media Reader Michael Mandiberg, 2012-03 The first collection to address the collective transformation happening in response to the rise of social media. With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

the jacket by gary soto pdf: Costa Rican Ecosystems Maarten Kappelle, 2016-04-15 In 1502, Christopher Columbus named Costa Rica, and while gold and silver never materialized to justify the moniker of rich coast in purely economic terms, scientists and ecotourists alike have long appreciated its incredible wealth. Wealth in Costa Rica is best measured by its biodiversity home to a dizzying number of plants and animals, many endemic, it is a country that has long encouraged and welcomed researchers from the world over, and is exemplary in the creation and commitment to indigenous conservation and management programs. Costa Rica is considered to have the best

preserved natural resources in Latin America. Approximately nine percent (about 1,000,000 acres) of Costa Rica has been protected in 15 national parks, and a comparable amount of land is protected as wildlife refuges, forest reserves or Indian reservations. This long-awaited synthesis of Costa Rican ecosystems is an authoritative presentation of the paleoecology, biogeography, structure, conservation, and sustainable use of Costa Rica's ecosystems. It systematically covers the entire range of Costa Rica's natural and managed, terrestrial, freshwater and marine ecosystems, including its island systems (Cocos Islands), the Atlantic and Pacific oceans and shores (coasts, coral reefs, mangrove forests), its lowlands (dry, season and wet forests), its highlands (the northern volcanoes and southern Talamancas), and its estuaries, rivers, lakes, swamps and bogs. The volume's integrated, comprehensive format will be welcomed by tropical and temperate biologists alike, by biogeographers, plant and animal ecologists, marine biologists, conservation biologists, foresters, policy-makers and all scientists, natural history specialists and all with an interest in Costa Rica's ecosystems.
