sxs Irani: Indian Sex Life Durba Mitra, 2020-01-07 During the colonial period, Indian intellectuals--philologists, lawyers, scientists and literary figures--all sought to hold a mirror to their country. Whether they wrote novels, polemics, or scientific treatises, all sought a better understanding of society in general and their society in particular. Curiously, female sexuality and sexual behavior play an outside role in their writing. The figure of the prostitute is ubiquitous in everything from medical texts and treatises on racial evolution to anti-Muslim polemic and studies of ancient India. In this book, Durba Mitra argues that between the 1840s and the 1940s, the new science of sexuality became foundational to the scientific study of Indian social progress. The colonial state and an emerging set of Bengali male intellectuals extended the regulation of sexuality to far-reaching projects that sought to define what society should look like and how modern citizens should behave. An exploration of this history of social scientific thought offers new perspectives to understand the power of paternalistic and deeply violent claims about sexual norms in the postcolonial world today. These histories reveal the enduring authority of scientific claims to a tradition that equates social good with the control of women's free will and desire. Thus, they managed to dramatically reorganize their society around upper-caste Hindu ideals of strict

sxs Irani: *Classification and Modeling with Linguistic Information Granules* Hisao Ishibuchi, Tomoharu Nakashima, Manabu Nii, 2004-11-19 Many approaches have already been proposed for classification and modeling in the literature. These approaches are usually based on mathematical models. Computer systems can easily handle mathematical models even when they are complicated and nonlinear (e.g., neural networks). On the other hand, it is not always easy for human users to intuitively understand mathematical models even when they are simple and linear. This is because human information processing is based mainly on linguistic knowledge while computer systems are designed to handle symbolic and numerical information. A large part of our daily communication is based on words. We learn from various media such as books, newspapers, magazines, TV, and the Internet through words. We also communicate with others through words. While words play a central role in human information processing, linguistic models are not often used in the fields of classification and modeling. If there is no goal other than the maximization of accuracy in classification and modeling, mathematical models may always be preferred to linguistic models. On the other hand, linguistic models may be chosen if emphasis is placed on interpretability.

sxs Irani: *Modernizing Women* Valentine M. Moghadam, 2003 Extrait de la préface : The subject of this study is social change in the Middle East, North Africa, and Afghanistan ; its impact on women's legal status and social positions ; and women's varied responses to, and involvement in, change processes. It also deals with constructions of gender during periods of social and political change. Social change is usually described in terms of modernization, revolution, cultural challenges, and social movements. Much of the standard literature on these topics does not examine women or gender, and thus [the author] hopes this study will contribute to an appreciation of the significance of gender in the midst of change. Neither are there many sociological studies on MENA and Afghanistan or studies on women in MENA and Afghanistan from a sociological perspective. Myths and stereotypes abound regarding women, Islam, and the region, and the events of September 11 and since have only compounded them. This book is intended in part to normalize the Middle East by underscoring the salience of structural determinants other than religion. It focuses on the major social-change processes in the region to show how women's lives are shaped not only by Islam and culture, but also by economic development, the state, class location, and the world system. Why the focus on women? It is [the author's] contention that middle-class women are consciously and unconsciously major agents of social change in the region, at the vanguard of movements for modernity, democratization and citizenship.

sxs Irani: *Persian Girls* Nahid Rachlin, 2007-12-27 For many years, heartache prevented Nahid Rachlin from turning her sharp novelist's eye inward: to tell the story of how her own life diverged from that of her closest confidante and beloved sister, Pari. Growing up in Iran, both refused to accept traditional Muslim mores, and dreamed of careers in literature and on the stage. Their lives changed abruptly when Pari was coerced by their father into marrying a wealthy and cruel suitor.

Nahid narrowly avoided a similar fate, and instead negotiated with him to pursue her studies in America. When Nahid received the unsettling and mysterious news that Pari had died after falling down a flight of stairs, she traveled back to Iran--now under the Islamic regime--to find out what happened to her truest friend, confront her past, and evaluate what the future holds for the heartbroken in a tale of crushing sorrow, sisterhood, and ultimately, hope.

Moghadam, 2005-02-16 Winner of the Victoria Schuck award given by the American Political Science Association and an Honorable Mention in the Distinguished Book Award given by the Political Economy of World Systems section of the American Sociological Association Globalization may offer modern feminism its greatest opportunity and greatest challenge. Allowing communication and information exchange while also exacerbating economic and social inequalities, globalization has fostered the growth of transnational feminist networks (TFNs). These groups have used the Internet to build coalitions, lobby governments, and advance the goals of feminism. Globalizing Women explains how the negative and positive aspects of globalization have helped to create transnational networks of activists and organizations with common agendas. Sociologist Valentine M. Moghadam discusses six such feminist networks to analyze the organization, objectives, programs, and outcomes of these groups in their effort to improve conditions for women throughout the world. Moghadam also examines how globalizing women are responding to and resisting growing inequalities, the exploitation of female labor, and patriarchal fundamentalisms. This book is an important addition to literature exploring feminism as well as to the broader discussion of the impact of transnational social movements and organizations in the globalized world.

sxs Irani: Voice and Agency Jeni Klugman, Lucia Hanmer, 2014-09-29 The 2012 report recognized that expanding women's agency - their ability to make decisions and take advantage of opportunities is key to improving their lives as well as the world. This report represents a major advance in global knowledge on this critical front. The vast data and thousands of surveys distilled in this report cast important light on the nature of constraints women and girls continue to face globally. This report identifies promising opportunities and entry points for lasting transformation, such as interventions that reach across sectors and include life-skills training, sexual and reproductive health education, conditional cash transfers, and mentoring. It finds that addressing what the World Health Organization has identified as an epidemic of violence against women means

sharply scaling up engagement with men and boys. The report also underlines the vital role information and communication technologies can play in amplifying women's voices, expanding their economic and learning opportunities, and broadening their views and aspirations. The World Bank Group's twin goals of ending extreme poverty and boosting shared prosperity demand no less than the full and equal participation of women and men, girls and boys, around the world. -- Publisher's description.

sxs Irani: Religious Minorities in Iran Eliz Sanasarian, 2000-04-13 Eliz Sanasarian's book explores the political and ideological relationship between non-Muslim religious minorities in Iran and the state during the formative years of the Islamic Republic to the present day. Her analysis is based on a detailed examination of the history and experiences of the Armenians, Assyrians, Chaldeans, Jews, Zoroastrians, Bahais and Iranian Christians, and describes how these communities have responded to state policies regarding minorities. Many of her findings are constructed out of personal interviews with members of these communities. While the book is essentially an empirical study, it also highlights more general questions associated with exclusion and marginalization and the role of the state in defining these boundaries. This is an important and original book which will make a significant contribution to the literature on minorities and to the workings of the Islamic Republic.

sxs Irani: Globalization and Social Movements Valentine M. Moghadam, 2008-10-17 This clear and concise book examines the crucial relationship between globalization and social movements. Deftly combining nuanced theory with rich empirical examples, leading scholar Valentine M. Moghadam focuses especially on three transnational social movements-Islamism, feminism, and global justice. Defining globalization as a complex process in which the mobility of capital, peoples, organizations, movements, and ideas takes on an increasingly transnational form, the author shows how both physical and electronic mobility has helped to create dynamic global social movements. Globalization has engendered the spread of neoliberal capitalism across the world, but it also has engendered opposition and collective action.

sxs Irani: 2019 RAJDEEP SARDESAI, 2019-11-26 On 23 May 2019, when the results of the general elections were announced, Narendra Modi and the BJP-led NDA coalition were voted back to power with an overwhelming majority. To some, the numbers of Modi's victory came as something of a surprise; for others, the BJP's triumph was a vindication of their belief in the government and its policies. Irrespective of one's political standpoint, one thing was beyond dispute: this was a landmark verdict, one that deserved to be reported and analysed with intelligence -- and without

bias. Rajdeep Sardesai's new book, 2019: How Modi Won India, does just that. What was it that gave Modi an edge over the opposition for the second time in five years? How was the BJP able to trounce its rivals in states that were once Congress bastions? What was the core issue in the election: a development agenda or national pride? As he relives the excitement of the many twists and turns that took place over the last five years, culminating in the 2019 election results, Rajdeep helps the reader make sense of the contours and characteristics of a rapidly changing India, its politics and its newsmakers. If the 2014 elections changed India, 2019 may well have defined what 'new India' is likely to be all about. 2019: How Modi Won India takes a look at that fascinating story, which is still developing.

sxs Irani: A History of Iran Michael Axworthy, 2016-05-24 The definitive history of Iran, from the ancient Persian empires to today Iran is a land of contradictions. It is an Islamic republic, but one in which only 1.4 percent of the population attend Friday prayers. Iran's religious culture encompasses the most censorious and dogmatic Shi'a Muslim clerics in the world, yet its poetry insistently dwells on the joys of life: wine, beauty, sex. Iranian women are subject to one of the most restrictive dress codes in the Islamic world, but make up nearly 60 percent of the student population of the nation's universities. In A History of Iran, acclaimed historian Michael Axworthy chronicles the rich history of this complex nation from the Achaemenid Empire of sixth century BC to the revolution of 1979 to today, including a close look at Iran's ongoing attempts to become a nuclear power. A History of Iran offers general readers an essential guide to understanding this volatile nation, which is once again at the center of the world's attention.

sxs Irani: The Last Girl Nadia Murad, 2017-11-07 WINNER OF THE NOBEL PEACE PRIZE • In this "courageous" (The Washington Post) memoir of survival, a former captive of the Islamic State tells her harrowing and ultimately inspiring story. Nadia Murad was born and raised in Kocho, a small village of farmers and shepherds in northern Iraq. A member of the Yazidi community, she and her brothers and sisters lived a quiet life. Nadia had dreams of becoming a history teacher or opening her own beauty salon. On August 15th, 2014, when Nadia was just twenty-one years old, this life ended. Islamic State militants massacred the people of her village, executing men who refused to convert to Islam and women too old to become sex slaves. Six of Nadia's brothers were killed, and her mother soon after, their bodies swept into mass graves. Nadia was taken to Mosul and forced, along with thousands of other Yazidi girls, into the ISIS slave trade. Nadia would be held captive by several militants and repeatedly raped and beaten. Finally, she managed a narrow escape through the streets of Mosul, finding shelter in the home of a Sunni Muslim family whose eldest son risked his life to smuggle her to safety. Today, Nadia's story—as a witness to the Islamic State's brutality, a survivor of rape, a refugee, a Yazidi—has forced the world to pay attention to an ongoing genocide. It is a call to action, a testament to the human will to survive, and a love letter to a lost country, a fragile community, and a family torn apart by war.

sxs Irani: The Spartans Paul Cartledge, 2003-05-26 "Remarkable . . . [The author's] crystalline prose, his vivacious storytelling and his lucid historical insights combine here to provide a first-rate history." —Publishers Weekly Sparta has often been described as the original Utopia—a remarkably evolved society whose warrior heroes were forbidden any other trade, profession, or business. As a people, the Spartans were the living exemplars of such core values as duty, discipline, the nobility of arms in a cause worth dying for, sacrificing the individual for the greater good of the community (illustrated by their role in the battle of Thermopylae), and the triumph over seemingly insuperable obstacles—qualities often believed today to signify the ultimate heroism. In this book, distinguished

scholar and historian Paul Cartledge, long considered the leading international authority on ancient Sparta, traces the evolution of Spartan society—the culture and the people as well as the tremendous influence they had on their world and even ours. He details the lives of such illustrious and myth-making figures as Lysander, King Leonidas, Helen of Troy (and Sparta), and Lysander, and explains how the Spartans, while placing a high value on masculine ideals, nevertheless allowed women an unusually dominant and powerful role—unlike Athenian culture, with which the Spartans are so often compared. In resurrecting this culture and society, Cartledge delves into ancient texts and archeological sources and includes illustrations depicting original Spartan artifacts and drawings, as well as examples of representational paintings from the Renaissance onward—including J.L. David's famously brooding Leonidas. "A pleasure for anyone interested in the ancient world." —Kirkus Reviews "[An] engaging narrative . . . In his panorama of the real Sparta, Cartledge cloaks his erudition with an ease and enthusiasm that will excite readers from page one." —Booklist "Our greatest living expert on Sparta." —Tom Holland, prize-winning author of *Rubicon: The Last Years of the Roman Republic*

Originally published in 1989. This detailed bibliography focuses on women's education in the developing nations of Asia, Africa, Latin America and the Caribbean and the Middle East. It contains annotations for about 1200 published works in English, French, Spanish, Portuguese and German. The entries include extensive research journal, monograph and book literature items, including chapters hidden in books that don't have women or education as their main theme. The citations are organised thematically but with geographic divisions within each of the 15 sections and each entry has a decently detailed summary. It is prefaced by a useful article written by Gail Kelly on the directions in research at the time and the development of women-centric approaches.

sxs Irani: "Years Don't Wait for Them" Bede Sheppard, Hye Jung Ha, Elin Martínez, 2021
The Covid-19 pandemic disrupted the education of an estimated 90 percent of the world's school-aged children. [This report] is based on over 470 interviews with students, parents, and teachers in 60 countries between April 2020 and April 2021. It documents how Covid-related school closures did not affect all children equally, as governments failed to provide all children with the opportunity, tools, or access needed to keep learning during the pandemic. Students from groups already facing discrimination and exclusion from education even before the pandemic were disproportionately adversely affected. Governments' long-term failures to remedy discrimination and inequalities in their education systems, and often to ensure basic government services, such as affordable, reliable electricity in homes, or facilitate affordable internet access, meant schools entered the pandemic ill-prepared to deliver remote education to all students equally. Children from low-income families were more likely to be excluded from online learning because they did not have reliable electricity or

sufficient access to the internet or devices. Historically under-resourced schools particularly struggled to reach their students.--Page 4 of cover.
