the little herb encyclopedia pdf: *Ancient Herbs in the J. Paul Getty Museum Gardens* Jeanne D'Andrea, 1982-01-01 The Getty Museum building recreates an ancient Roman villa on the shores of the Pacific Ocean, where guests can feel that they are visiting the Villa dei Papiri before it was buried by the eruption of Mount Vesuvius in AD 79. The climate of southern California has made it possible to plant the gardens with dozens of herbs, flowers, and fruit trees known to the Greeks and Romans. In classical times they were practical as well as beautiful, providing color, perfume, home medicines, and flavorings for food and drink. Martha Breen Bredemeyer, a San Francisco Bay area artist, was inspired to paint two dozen of the garden's herbs. Her watercolor gouaches combine vibrant color with the fragile delicacy of these short-lived plants while her pen-and-ink drawings share their wiry grace. Jeanne D'Andrea discusses twenty-one of the herbs in detail after presenting their place in myth, medicine, and home in the introduction.

the little herb encyclopedia pdf: Popular Medicinal Plants in Portland and Kingston, Jamaica Ina Vandebroek, David Picking, 2020-12-05 This book highlights the results from over a year of ethnobotanical research in a rural and an urban community in Jamaica, where we interviewed more than 100 people who use medicinal plants for healthcare. The goal of this research was to better understand patterns of medicinal plant knowledge, and to find out which plants are used in consensus by local people for a variety of illnesses. For this book, we selected 25 popular medicinal plant species mentioned during fieldwork. Through individual interviews, we were able to rank plants according to their frequency of mention, and categorized the medicinal uses for each species as “major” (mentioned by more than 20% of people in a community) or “minor” (mentioned by more than 5%, but less than 20% of people). Botanical identification of plant specimens collected in the wild allowed for cross-linking of common and scientific plant names. To supplement field research, we undertook a comprehensive search and review of the ethnobotanical and biomedical literature. Our book summarizes all this information in detail under specific sub-headings.

the little herb encyclopedia pdf: *The Lost Book of Herbal Remedies* Nicole Apelian, Claude Davis, Sr., 2019-07-07 304 color pages, paperback, improved print quality, and a lot more plant identification details This unique book is written by Dr. Nicole Apelian, an herbalist with over 20 years of experience working with plants, and Claude Davis, a wild west expert passionate about the lost remedies and wild edibles that kept previous generations alive. The Lost Book of Herbal Remedies has color pictures of over 181 healing plants, lichens, and mushrooms of North America (2-4 pictures/plant for easy identification). Inside, you'll also discover 550 powerful natural remedies made from them for every one of your daily needs. Many of these remedies had been used by our forefathers for hundreds of years, while others come from Dr. Nicole's extensive natural practice. This book was made for people with no prior plant knowledge who are looking for alternative ways to help themselves or their families. This lost knowledge goes against the grain of mainstream medicine and avoids just dealing with symptoms. Instead, it targets the underlying root cause and strengthens your body's natural ability to repair itself. With the medicinal herbal reference guide included, it's very easy to look up your own condition and see exactly which herbs and remedies can help. Let me just offer you a small glimpse of what you'll find inside: On page 145 learn how to make a powerful relieving extract using a common backyard weed. This plant acts directly on the central nervous system to help with all kinds of pain and discomfort. You'll also discover the most effective natural antibiotic that still grows in most American backyards (page 150). Turn to page 43 for the natural protocol Dr. Nicole is recommending for a wide range of auto-immune conditions, after falling prey to MS herself at age 29. I could go on and on because this book contains no less than 800+ other medicinal plants and natural remedies.
