Introduction: Understanding the Regents Exam Format & Structure

The New York State US History Regents exam is a significant hurdle for high school students. Understanding its structure is the first step to conquering it. The exam typically consists of three parts:

Part I: Multiple Choice Questions: This section tests your knowledge of factual information, key events, and important figures throughout US history. It requires a broad understanding of the timeline and significant developments. Practice is key to mastering this section.

Part II: Thematic Essay: This section requires you to analyze a historical theme or topic, using specific examples from your knowledge base to support your arguments. Strong essay-writing skills are essential here. You'll need to be able to craft a well-structured argument, supported by concrete evidence.

Part III: DBQ (Document-Based Question): This is arguably the most challenging part of the exam. You'll be presented with several primary source documents (letters, excerpts, images, etc.) and asked to analyze them and answer a specific question using both the documents and your own knowledge. This requires you to interpret evidence, synthesize information from multiple sources, and formulate a coherent argument.

Understanding the weighting of each section and the types of questions asked is crucial for effective studying. This introduction section in the full ebook will provide a detailed breakdown of the exam's

structure, including time allocation for each section, and strategies for optimizing your performance. This lays the groundwork for targeted preparation throughout the following chapters.

us history regents review 2023: An Indigenous Peoples' History of the United States (10th Anniversary Edition) Roxanne Dunbar-Ortiz, 2023-10-03 New York Times Bestseller Now part of the HBO docuseries Exterminate All the Brutes, written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, An Indigenous Peoples' History of the United States is an essential resource providing historical threads that are crucial for understanding the present. In An Indigenous Peoples' History of the United States, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. An Indigenous Peoples' History of the United States is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

us history regents review 2023: Our Fight Has Just Begun

Cheryl Redhorse Bennett, 2022-03-01 Our Fight Has Just Begun is a timely and urgent work. The result of more than a decade of research, it revises history, documents anti-Indianism, and gives voice to victims of racial violence. Navajo scholar Cheryl Redhorse Bennett reveals a lesser-known story of Navajo activism and the courageous organizers that confronted racial injustice and inspired generations.

Illuminating largely untold stories of hate crimes committed against Native Americans in the Four Corners region of the United States, this work places these stories within a larger history, connecting historical violence in the United States to present-day hate crimes. Bennett contends that hate crimes committed against Native Americans have persisted as an extension of an “Indian hating” ideology that has existed since colonization, exposing how the justice system has failed Native American victims and families. While this book looks deeply at multiple generations of unnecessary and ongoing pain and violence, it also recognizes that this is a time of uncertainty and hope. The movement to abolish racial injustice and racially motivated violence has gained fierce momentum. *Our Fight Has Just Begun* shows that racism, hate speech, and hate crimes are ever present and offers recommendations for racial justice.

us history regents review 2023: Mexican Waves Sonia Robles, 2019-10-08 Mexican Waves is the fascinating history of how borderlands radio stations shaped the identity of an entire region as they addressed the needs of the local population and fluidly reached across borders to the United States. In so doing, radio stations created a new market of borderlands consumers and worked both within and outside the constraints of Mexican and U.S. laws. Historian Sonia Robles examines the transnational business practices of Mexican radio entrepreneurs between the Golden Age of radio and the early years of television history. Intersecting Mexican history and diaspora studies with communications studies, this book explains how Mexican radio entrepreneurs targeted the Mexican population in the United States decades before U.S. advertising agencies realized the value of the Spanish-language market. Robles's robust transnational research weaves together histories of technology, performance, entrepreneurship, and business into a single story. Examining the programming of northern Mexican commercial radio stations, the book shows how radio stations from Tijuana to Matamoros courted Spanish-language listeners in the U.S. Southwest and local Mexican audiences between 1930 and 1950. Robles deftly demonstrates Mexico's role in creating the borderlands, adding texture and depth to the story. Scholars and students of radio, Spanish-language media in the United States, communication studies, Mexican history, and border studies will see how Mexican radio shaped the region's development and how transnational listening communities used broadcast media's unique programming to carve out a place for themselves as consumers and citizens of Mexico and the United States.

us history regents review 2023: Diné Identity in a Twenty-First-Century World Lloyd L. Lee, 2020-05-19 Diné identity in the twenty-first century is distinctive and personal. It is a mixture of traditions, customs, values, behaviors, technologies, worldviews, languages, and lifeways. It is a holistic experience. Diné identity is analogous to Diné weaving: like weaving, Diné identity intertwines all of life's elements together. In this important new book, Lloyd L. Lee, a citizen of the Navajo Nation and an associate professor of Native American studies, takes up and provides insight

on the most essential of human questions: who are we? Finding value and meaning in the Diné way of life has always been a hallmark of Diné studies. Lee's Diné-centric approach to identity gives the reader a deep appreciation for the Diné way of life. Lee incorporates Diné baa hane' (Navajo history), Sa'áh Naaghái Bik'eh Hózhóón (harmony), Diné Bizaad (language), K'é (relations), K'éí (clanship), and Níhi Kéyah (land) to address the melding of past, present, and future that are the hallmarks of the Diné way of life. This study, informed by personal experience, offers an inclusive view of identity that is encompassing of cultural and historical diversity. To illustrate this, Lee shares a spectrum of Diné insights on what it means to be human. *Diné Identity in a Twenty-First-Century World* opens a productive conversation on the complexity of understanding and the richness of current Diné identities.

us history regents review 2023: *Menace to Empire* Moon-Ho Jung, 2023-12-12 *Menace to Empire* is a profoundly original and ambitious book, a history of race and empire that traces both the colonial violence and the anticolonial rage that the United States spread across the Pacific between the Philippine-American War and World War II. Author Moon-Ho Jung argues that the US national security state as we know it was born out of attempts to repress and silence colonized subjects, from the Philippines and Hawai'i to California and beyond, whose anticolonial aspirations challenged US claims to sovereignty. Jung examines how the contradictions of race, nation, and empire generated waves of revolutionary movements spanning the Pacific--anticolonial, antiracist, and labor movements that exposed and confronted the US empire. In response, the US state closely monitored and brutally suppressed those movements by racializing particular politics and distinct communities as seditious, exaggerating fears of pan-Asian solidarities and sowing anti-Asian racism under the guise of national security. *Menace to Empire* transforms familiar themes in American history to highlight the critical role of colonial violence in the formation of radical movements and the antiradical origins of anti-Asian racism. Radicalized by their opposition to the US empire and racialized as threats to US security, peoples in and from Asia pursued a revolutionary politics that gave rise to the national security state--the heart and soul of the US empire ever since--Provided by publisher.

us history regents review 2023: Long Journey to Justice Molly Todd, 2021-02-23

As bloody wars raged in Central America during the last third of the twentieth century, hundreds of North American groups "adopted" villages in war-torn Guatemala, Nicaragua, and El Salvador. Unlike government-based cold war-era Sister City programs, these pairings were formed by ordinary people, often inspired by individuals displaced by US-supported counterinsurgency operations. Drawing on two decades of work with former refugees from El Salvador as well as unprecedented access to private archives and oral histories, Molly Todd's compelling history provides the first in-depth look at "grassroots sistering." This model of citizen diplomacy emerged in the mid-1980s out of relationships between a few repopulated villages in Chalatenango, El Salvador, and US cities. Todd shows how the leadership of Salvadorans and left-leaning activists in the US concerned with the expansion of empire as well as the evolution of human rights-related discourses and practices created a complex dynamic of cross-border activism that continues today.

us history regents review 2023: Dust in the Blood Jessica Coblentz, 2022-01-15

2023 College Theology Society Best Book Award 2023 Catholic Media Association Third Place Award, Theology - Morality, Ethics, Christology, Mariology, and Redemption 2023 Association of Catholic Publishers Second Place Award, Theology Dust in the Blood considers the harrowing realities of life with depression from a Christian theological perspective. In conversation with popular Christian theologies of depression that justify why this suffering exists and prescribe how people ought to relate to it, Jessica Coblentz offers another Christian approach to this condition: she reflects on depression as a wilderness experience. Weaving first-person narratives of depression, contemporary theologies of suffering, and ancient biblical tales of the wilderness, especially the story of Hagar, Coblentz argues for and contributes to an expansion of Christian ideas about what depression is, how God relates to it, and how Christians should understand and respond to depression in turn.

us history regents review 2023: How the Clinic Made Gender Sandra Eder, 2022-06-07

An eye-opening exploration of the medical origins of gender in modern US history. Today, a world without "gender" is hard to imagine. Gender is at the center of contentious political and social debates, shapes policy decisions, and informs our everyday lives. Its formulation, however, is lesser known: Gender was first used in clinical practice. This book tells the story of the invention of gender in American medicine, detailing how it was shaped by mid-twentieth-century American notions of culture, personality, and social engineering. Sandra Eder shows how the concept of gender transformed from a pragmatic tool in the sex assignment of children with intersex traits in the 1950s

to an essential category in clinics for transgender individuals in the 1960s. Following gender outside the clinic, she reconstructs the variable ways feminists integrated gender into their theories and practices in the 1970s. The process by which ideas about gender became medicalized, enforced, and popularized was messy, and the route by which gender came to be understood and applied through the treatment of patients with intersex traits was fraught and contested. In historicizing the emergence of the sex/gender binary, Eder reveals the role of medical practice in developing a transformative idea and the interdependence between practice and wider social norms that inform the attitudes of physicians and researchers. She shows that ideas like gender can take on a life of their own and may be used to question the normative perceptions they were based on. Illuminating and deeply researched, the book closes a notable gap in the history of gender and will inspire current debates on the relationship between social norms and medical practice.

us history regents review 2023: California Exposures: Envisioning Myth and History

Richard White, 2020-03-17 Winner of the 2021 California Book Award (Californiana category) A brilliant California history, in word and image, from an award-winning historian and a documentary photographer. "This is the West, sir. When the legend becomes fact, print the legend." This indelible quote from *The Man Who Shot Liberty Valance* applies especially well to California, where legend has so thoroughly become fact that it is visible in everyday landscapes. Our foremost historian of the West, Richard White, never content to "print the legend," collaborates here with his son, a talented photographer, in excavating the layers of legend built into California's landscapes. Together they expose the bedrock of the past, and the history they uncover is astonishing. Jesse White's evocative photographs illustrate the sites of Richard's historical investigations. A vista of Drakes Estero conjures the darkly amusing story of the Drake Navigators Guild and its dubious efforts to establish an Anglo-Saxon heritage for California. The restored Spanish missions of Los Angeles frame another origin story in which California's native inhabitants, civilized through contact with friars, gift their territories to white settlers. But the history is not so placid. A quiet riverside park in the Tulare Lake Basin belies scenes of horror from when settlers in the 1850s transformed native homelands into American property. Near the lake bed stands a small marker commemorating the Mussel Slough massacre, the culmination of a violent struggle over land titles between local farmers and the Southern Pacific Railroad in the 1870s. Tulare is today a fertile agricultural county, but its population is poor and unhealthy. The California Dream lives elsewhere. The lake itself disappeared when tributary rivers were rerouted to deliver government-subsidized water to big agriculture and cities. But climate change ensures that it will be back—the only question is when.

us history regents review 2023: The Wongs of Beloit, Wisconsin

Beatrice McKenzie, 2022-04-26 Through family interviews, original photographs, and national records, Beatrice Loftus McKenzie traces the many lives of a resilient multigenerational family whose experiences parallel the complicated relationship between America and China in the twentieth century. In the early 1900s, Charles Wong moved from Guangdong Province to the United States and opened the Nan King Lo Restaurant in Beloit, Wisconsin. Soon after, his wife Yee Shee joined him to build the Chop House into a local institution and start a family. When the Great Depression hit, the Wongs shared what they had with their neighbors. In 1938, Charles's tragic murder left Yee Shee to raise their seven children—ages one through fourteen—on her own. Rather than return to family property in Hong Kong, she and her children stayed in Beloit, buoyed by the friendships they had forged during the worst parts of the 1930s. The Wongs thrived in Beloit despite facing racism and classism, embracing wartime opportunities, education, love, and careers within the U. S. McKenzie's collaboration with descendent Mary Wong Palmer reveals a poignant story of Chinese immigrant life in the Upper Midwest that adds a much-needed Wisconsin perspective to existing literature by and about Asian Americans.

us history regents review 2023: The New Sultan Soner Çağaptay, 2017 In a world of rising tensions between Russia and the United States, the Middle East and Europe, Sunnis and Shiites, Islamism and liberalism, Turkey is at the epicentre. And at the heart of Turkey is its right-wing populist president, Recep Tayyip Erdoğan. Since 2002, Erdoğan has consolidated his hold on domestic politics while using military and diplomatic means to solidify Turkey as a regional power. His crackdown has been brutal and consistent - scores of journalists arrested, academics officially banned from leaving the country, university deans fired and many of the highest-ranking military officers arrested. In some senses, the nefarious and failed 2016 coup has given Erdoğan the licence to make good on his repeated promise to bring order and stability under a 'strongman'. Here, leading Turkish expert Soner Cagaptay will look at Erdoğan's roots in Turkish history, what he believes in and how he has cemented his rule, as well as what this means for the world. The book will also unpick the 'threats' Erdogan has worked to combat - from the liberal Turks to the Gulen movement, from coup plotters to Kurdish nationalists - all of which have culminated in the crisis of modern Turkey.--Bloomsbury Publishing.
