blue skies pdf: Beyond Blue Skies Christopher J. Petty, 2020-11 In 1945 some experts still considered the so-called sound barrier an impenetrable wall, while winged rocket planes remained largely relegated to science fiction. But soon a series of unique rocket-powered research aircraft and the dedicated individuals who built, maintained, and flew them began to push the boundaries of flight in aviation's quest to move ever higher, ever faster, toward the unknown. *Beyond Blue Skies* examines the thirty-year period after World War II during which aviation experienced an unprecedented era of progress that led the United States to the boundaries of outer space. Between 1946 and 1975, an ancient dry lakebed in California's High Desert played host to a series of rocket-powered research aircraft built to investigate the outer reaches of flight. The western Mojave's Rogers Dry Lake became home to Edwards Air Force Base, NASA's Flight Research Center, and an elite cadre of test pilots. Although one of them—Chuck Yeager—would rank among the most famous names in history, most who flew there during those years played their parts away from public view. The risks they routinely accepted were every bit as real as those facing NASA's astronauts, but no magazine stories or free Corvettes awaited them—just long days in a close-knit community in the High Desert. The role of not only the test pilots but the engineers, aerodynamicists, and support staff in making supersonic flight possible has been widely overlooked. *Beyond Blue Skies* charts the triumphs and tragedies of the rocket-plane era and the unsung efforts of the men and women who made amazing achievements possible.

blue skies pdf: Sustaining Mobile Learning Wan Ng, Therese M. Cumming, 2015-07-16 Mobile technologies are one of the fastest growing areas of technology in education. For learners, they offer an appealing opportunity to transcend teacher-defined knowledge and approaches by being able to access multiple, alternative sources of information anytime and anywhere. While the pace of engagement with and research into the educational applications of mobile technologies has picked up dramatically in the last decade, there is no consolidated view of how to sustain the practices or opportunities that are being explored. Sustainability is a complex but crucial issue in mobile learning as educational institutions are usually required to make substantial investments in mobile devices and associated technologies, time and training to initiate mobile learning programs. The complexity of sustainable mobile learning programs is further exacerbated by the fast pace of change of digital technologies, where with every change, new possibilities are opened up and investments required. In addition, educators are still attempting to reconcile institutions of formal education with informal mobile learning. The book addresses these issues, with a particular focus on: exploring the challenges surrounding the sustainability of mobile learning in K-12 and higher education investigating the importance of sustaining mobile learning for diverse populations of students globally discussing theoretical models for the sustainability of mobile learning providing the reader with strategies for sustaining mobile learning. Presenting new research alongside theoretical models and ideas for practice, the book will appeal to researchers, academics, and postgraduate students in the fields of education and mobile learning, as well as those working in teacher education.

blue skies pdf: Building Better Universities Jos Boys, 2014-11-13 *Building Better Universities* provides a wide-ranging summary and critical review of the increasing number of groundbreaking initiatives undertaken by universities and colleges around the world. It suggests that we have reached a key moment for the higher education sector in which the services, location, scale, ownership, and distinctiveness of education are being altered dramatically, whether universities and colleges want it or not. These shifts are affecting traditional assumptions about both the future 'shape' of higher education institutions, and the roles of—and relationships between—learners,

teachers, researchers, managers, businesses, communities and other stakeholders. Building Better Universities aims to bridge the gap between educational ideas about what the university is, or should be 'for', and its day-to-day practices and organisation. It roams across strategic, operational, and institutional issues; space planning and building design; and technological change, in order to bring together issues that are often dealt with separately. By analysing the many challenges faced by higher education in the contemporary period, and exploring the various ways universities and colleges are responding, this powerful book aims to support a 'step-change' in debates over the future of higher education, and to enable senior managers and faculty to develop more strategic and creative ways of enabling effective twenty-first-century learning in their own institutions.

blue skies pdf: Environmental Policies In Asia: Perspectives From Seven Asian Countries Jing Huang, Shreekant Gupta, 2014-06-13 Environmental Policies in Asia highlights the environmental challenges Asian planners and policymakers face as the continent undergoes rapid economic growth in the 21st Century. Edited by Jing Huang and Shreekant Gupta, with contributions from leading Asian scholar practitioners, this timely and unique volume is the first of its kind to look at environmental policies and governance from the perspective of seven dynamic Asian countries. These include developed economies of Japan and Singapore, emerging giants such as China and India and rapidly developing nations such as Vietnam, Indonesia and Malaysia. The volume discusses environmental challenges that stem from issues as local as poor recycling practices, to ones that are as vast and complex as global climate change. Engaging, accessible, and pan-Asian in scope, the essays also present creative ways in which these challenges are being addressed. This book is valuable to anyone who is keen on understanding Asia, its growth, and whether its rise is environmentally sustainable.

blue skies pdf: *Blue Skies* Helen Hodgman, 2017-05-29 In Helen Hodgman's dazzlingly written debut a young woman is trapped in a small city on an island at the end of the world—by motherhood and an absent husband, by busybody in-laws and neighbours, by a drab society yet to throw off the shackles of its colonial past. A darkly funny tale of a crack-up in stultifying suburbia, *Blue Skies* marked the emergence of a unique, acerbic voice in Australian fiction. This edition includes an introduction by the acclaimed Tasmanian author Danielle Wood. The clock always said three in the afternoon, no matter what you did to it...No matter what you tried, the day ran out then, and there was nothing left to fill it with. Helen Hodgman was the author of the novels *Blue Skies* (1976), *Jack*

and Jill (1978; winner of the Somerset Maugham Award), *Broken Words* (1988; winner of the Christina Stead Prize), *Passing Remarks* (1996), *Waiting for Matindi* (1998) and *The Bad Policeman* (2001). She died in June, 2022. 'Singularly searing and merciless prose.' Sunday Age 'As fresh, punchy and relevant now as it was on its [first] release...A compelling vision.' Australian 'Scarily unforgettable.' Peter Conrad 'Strange and memorable.' Eva Hornung 'The very essence of Tasmanian gothic.' Carmel Bird 'Sensuous...Prickly as a sea urchin.' Nicholas Shakespeare 'A convincing study of a woman slowly losing her mind.' Sunday Herald 'Elegantly written, atmospheric.' Brenda Niall, Australian Book Review 'Has a masterpiece's power to thrill and discomfort.' Sunday Tasmanian 'Stylistically assured...Daring and persuasive in its depiction of a controlled and vengeful anguish.' Peter Pierce, Sydney Morning Herald

blue skies pdf: Blue Skies, Blue Seas Martin Heger, Lukas Vashold, Anabella Palacios, Mala Alahmadi, Marcelo Acerbi, 2022-05-04 While economic and social indicators in many Middle East and North Africa (MENA) countries have improved over the past three decades, the region's blue natural assets—clean air, healthy seas, and coastlines—have degraded virtually everywhere. Air pollution levels in the region's cities are among the highest in the world. Per capita marine plastic pollution is among the highest in the world; coastal erosion rates are the second fastest in the world. These combined challenges threaten local communities, livelihoods, and economies. In fact, the economic cost of MENA's deteriorating skies and seas is estimated at more than 3 percent of GDP per year. *Blue Skies, Blue Seas: Air Pollution, Marine Plastics, and Coastal Erosion in the Middle East and North Africa* reviews integrated solutions that the authors identify as the "four I's":

- Inform stakeholders about the sources of these challenges.
- Provide incentives that improve environmental outcomes for the public and the private sector.
- Strengthen institutions to lower air and plastic pollution and to mitigate uncontrolled development and erosion of coastlines.
- Invest in abatement options and promote sustainable solutions.

Restoring MENA's blue skies and seas will benefit the health, livelihoods, and incomes of residents. There will inevitably be trade-offs, but choosing a path of green growth will create jobs, diversify economies, and make the region a better place for current and future generations. The actions of policy makers today will shape the trajectory of economies and communities for decades to come.

blue skies pdf: Five Feet Apart Rachael Lippincott, 2019-02-05 Also a major motion picture starring Cole Sprouse and Haley Lu Richardson! Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 New York Times bestselling novel that's perfect for fans of John Green's *The Fault in Our Stars*, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella, she could lose her spot on the transplant list. Either one of them could

die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too?

Educators need to understand the context of learning and for that they need to understand student interests in both local and global aspects. This book values young people's expression of their own culture and personal interests. It is unique in that the starting point is the drawings of the young people - not to illustrate a predetermined theory, but to enable young people from different countries to express their visions about the world - illustrati.

blue skies pdf: Foundations of Public Service Douglas F Morgan, Douglas F. Green, Richard T Green, Craig W Shinn, Robert K Robinson, 2015-07-17 Designed to serve as a basic text for an introductory course in Public Administration, this innovative work provides students with an understanding of the basic management functions that are covered in all standard textbooks with two important differences. First, it is written to address the needs of both the experienced practitioner and the entry-level public servant. Case examples bridge the content-rich environment of practitioners with the basic principles of public administration sought by pre-service students. Second, the discussion of basic management practices is grounded in the political and ethical tensions inherent in the American constitutional form of governance. This reflects the authors' belief that public administration operates as an integral part of the country's political traditions, and thereby helps define the political culture. The book provides a framework for understanding American political traditions and how they inform public administration as a political practice. Key Changes in the Second Edition include: A new introductory chapter that explains what the authors mean by a constitutional approach and why that is important. An expanded discussion of the role of civil society in promoting the common good. A new section in chapter 5 on New Public Governance. Updated exhibits that incorporate up-to-date census data and revenue figures (chapter 10). A new section in chapter 14 that recognises the importance of maintaining accountability in contract and networked systems of governance. Significantly rewritten chapters to add emphasis on the relevance of the chapter material to nonprofit organisations. A significantly revised bibliography which incorporates new bodies of research that have appeared since the first edition.

blue skies pdf: *The Relive Box and Other Stories* T.C. Boyle, 2017-10-03 While T.C. Boyle is known as one of our greatest American novelists, he is also an acknowledged master of the short story and is perhaps at his funniest, his most moving, and his most surprising in the short form. In *The Relive Box*, Boyle's sharp wit and rich imagination combine with a penetrating social consciousness to produce raucous, poignant, and expansive short stories defined by an inimitable voice. From the collection's title story, featuring a Halcom X1520 Relive Box that allows users to experience anew almost any moment from their past to *The Five-Pound Burrito*, the tale of a man aiming to build the biggest burrito in town, the twelve stories in this collection speak to the humor, the pathos, and the struggle that is part of being human while relishing the whimsy of wordplay and the power of a story well told. In stories that span a variety of styles and genres, Boyle addresses the enduring concerns of the human mind and heart while taking on timely social concerns. *The Relive Box* is an exuberant, linguistically dazzling effort from a vibrant sensibility fully engaged with American society. blue skies pdf: Towards more effective collaboration by higher education institutions for greater regional development in the Gauteng City-Region Robert Bergman, 2014-11-19 Higher education institutions (HEIs) in the Gauteng City-Region (GCR) and elsewhere are increasingly being called upon to do more than their traditional roles of teaching and research. They are now expected to collaborate and engage with other stakeholders with a view to contributing directly and indirectly to social and economic development in their localities. Such an orientation includes having HEIs actively fostering public-private partnerships and other initiatives that enhance equitable regional development. The adoption of such a focus has implications for all aspects of these institutions' activities, as well as for the policy and regulatory framework in which they operate. This Occasional Paper reflects critically on the role of HEIs in regional development. It surveys current debates on the matter and draws out some of the implications on how we ought to think further about the current state of government-industry-academia interaction and collaboration for development in the GCR. It is motivated by an awareness of the increasing importance of higher education in the regional development discourse, alongside a body of international theory and practice on the contribution of HEIs to regional development. A cornerstone of this body of literature is the so-called 'triple helix' framework within which government, industry and academia work intimately, intensely and collaboratively towards a common vision of regional development. Within this framework, HEIs are considered to be a public good that must play a large, meaningful and relevant role in the development and improvement of the cities and regions where they are located.^{1, 2} They do not, and cannot, stand completely outside the realities of their geographic, social, cultural and political environment. The intended audience for this report extends beyond academics and HEI administrators to include government officials, business and labour leaders, civil society and citizens, because a discussion on stimulating and improving the GCR must be much more than an academic exercise. The collaboration that is essential to regional development requires stakeholders to be familiar with a wide spectrum of issues of importance to individual constituencies. Each constituency must add value and insight to the discussion by drawing on their specific knowledge, experience and self-interests. Establishing this common ground is fundamental to initiating meaningful debate about what the GCR can and should be, and how regional HEIs can work more collaboratively, creatively and effectively to improve and advance the region.
