Ackerman, Graydon Parrish, 2019-11-30 * Two hundred lithographs that comprised a famous late nineteenth-century drawing course* Introduces the work of a hitherto neglected master: Charles Bargue* Of interest to artists, art students, art historians, and lovers and collectors of art The Bargue-Gérôme Drawing Course is a complete reprint of a famous, late nineteenth-century drawing course. It contains a set of almost two hundred masterful lithographs of subjects for copying by drawing students before they attempt drawing from life or nature. Consequently, it is a book that will interest artists, art students, art historians, and lovers and collectors of drawings. It also introduces us to the work and life of a hitherto neglected master: Charles Bargue. The Drawing Course consists of three sections. The first consists of plates drawn after casts, usually of antique examples. Different parts of the body are studied in order of difficulty, until full figures are presented. The second section pays homage to the western school of painting, with lithographs after exemplary drawings by Renaissance and modern masters. The third part contains almost 60 académies, or drawings after nude male models, all original inventions by Bargue, the lithographer. With great care, the student is introduced to continually more difficult problems in the close observing and recording of nature. Charles Bargue started his career as a lithographer of drawings by hack artists for a popular market in comic,

sentimental and soft-porn subjects. By working with Gérôme, and in preparing the plates for the course, Bague was transformed into a spectacular painter of single figures and intimate scenes; a master of precious details that always remain observation and never became self-conscious virtuosity, and color schemes that unified his composition in exquisite tonal harmonies. The last part of the book is a biography of Bague, along with a preliminary catalogue of his paintings, accompanied by reproductions of all that have been found and of many of those lost.

charles bargue pdf: Vincent Van Gogh: Wilfred Niels Arnold, 1992-11 As a five year old I encountered a picture of a young man in a rakish hat and a yellow coat, on the wall of a large classroom. There was something instantly intriguing about the image, but it was also puzzling because it represented neither politician nor prince, the usual fare for Australian school decorations. I was eventually told that this was a reproduction of a painting, the artist was Vincent van Gogh, and that the subject was some young Frenchman. On special days we assembled in that room and during the next several years I found myself gazing beyond visiting speakers at the fellow in the yellow jacket. It was almost another fifty years before I felt properly conversant with the portrait and realized that van Gogh's subject, Armand Roulin, was seventeen at the time of the original painting and had died at seventy-four during my schoolboy contemplations. In the interim my enjoyment of the works of the Impressionists and Post Impressionists had grown and I occasionally ran into the name of Dr. Gachet, Vincent's last attending physician, in books and catalog essays. The doctor was my entree to the overlapping charms of medical and art histories. In 1987 I had the good fortune to participate as a biochemist in the centenary celebration of the Pasteur Institut in Paris.

charles bargue pdf: *Drawing in the Twenty-First Century* Elizabeth A. Pergam, 2017 As a response to the ubiquity of drawing in contemporary consciousness and a corresponding dearth of critical engagement with the medium, these collected essays provide original interpretations of artists' drawing today. Questions of process, politics, scale, and community raised in the work of the diverse group of artists are situated within the historic discourse on drawing and demonstrate the extent to which contemporary practice challenges previous definitions of the medium. From the room-encompassing drawings of Monika Grzymala and Barbara Bernstein or Sophie Calle's expansive exploration of the Jerusalem eruv to Andrea Bowers's graphite renditions of protest to Ellsworth Kelly's proposal for a memorial to September 11, the essays explore the implications of drawings' departure from the confines of a sheet of paper. Essential reading for both the academic and general audience, this book provides in-depth discussions of artists and projects that have never been treated in a sustained, analytical way; each essay will interest the wider contemporary art audience, as well as students of drawing. Taken as a whole, the volume represents a pertinent and stimulating engagement with issues of paramount importance to our understanding of contemporary

art and its place in museums, galleries, and the public sphere.--Provided by publisher.

charles bargue pdf: *On Line* Cornelia H. Butler, M. Catherine de Zegher, 2010 *On Line: Drawing Through the Twentieth Century* explores the radical transformation of drawing that began during the last century as numerous artists critically re-examined the traditional concepts of the medium. In a revolutionary departure from the institutional definition of drawing and from reliance on paper as the fundamental support material, artists instead pushed the line into real space, expanding the medium's relationship to gesture and form and connecting it with painting, sculpture, photography, film and dance. Published in conjunction with an exhibition at The Museum of Modern Art, *On Line* presents a discursive history of mark-making through nearly 250 works by 100 artists, including Aleksandr Rodchenko, Alexander Calder, Karel Malich, Eva Hesse, Anna Maria Maiolino, Richard Tuttle, Mona Hatoum and Monika Grzymala, among many others. Essays by the curators illuminate individual practices and examine broader themes, such as the exploration of the line by the avant-garde and the relationship between drawing and dance.
