connect mhedu: World Report on Ageing and Health World Health Organization, 2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from

disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

connect mhedu: *Women of Algiers in Their Apartment* Assia Djebar, 1992 Translated for the first time into English, this collection of short fiction by one of the leading writers of North Africa details the plight of Algerian women and raises far-reaching issues that speak to us all. *Women of Algiers* quickly sold out its first printing of 15,000 in France and was hugely popular in Italy, but the book was denounced in Algeria for its criticism of the postcolonial socialist regime, which denied and subjugated women even as it celebrated the liberation of men. It was the first work to do so openly. These stylistically innovative, lyrical stories address the cloistering of women, the implications of reticence, and the significance of language and its connection to oppression (Djebar calls official Arabic an authoritarian language that is simultaneously the language of men). Mixing newly written pieces with older ones, Djebar attempts to bring the past into a dialogue with the present. The stories raise issues surrounding this passage from colonial to postcolonial culture - national literature, cultural authenticity, and the impact of war on both men and women. The book's title comes from a Delacroix painting that depicts a unique glimpse of the harem, an emblem of the dual violation of Algerian women, both colonial and gendered.

connect mhedu: Avanti!: Beginning Italian Janice Aski, Diane Musumeci, 2009-01-21 Welcome to the second edition of Avanti! In the new edition our priorities remain the same as those of the first edition, to provide an introductory language course that meets the needs of both instructors and learners. Three significant characteristics set Avanti! apart from other first-year Italian texts: First,

Avanti! satisfies students' desire to communicate in everyday situations right from the start and to explore Italy's rich and unique culture in meaningful ways. Second, Avanti! responds to instructors' concern that most textbooks attempt to cover too much material in the first year. We have designed an elementary course that reflects reasonable expectations for the amount of material that most beginning learners can acquire in one year of classroom instruction. Third, the methodology of Avanti! is firmly grounded in current findings of research in second language acquisition and foreign language pedagogy. The materials provide support for instructors, particularly those with limited experience, whose goals are to teach mainly, if not exclusively, in Italian, and to create the student-centered, communicative classroom environment that is promoted by this research. The title Avanti! was chosen to convey the forward-thinking approach of this exciting new program.
