Position Sizing

Position sizing refers to determining the amount of capital allocated to each trade. The PDF teaches methods to calculate position sizes that align with the trader's risk tolerance and account balance, ensuring no single trade can cause catastrophic losses.

Diversification and Trade Selection

day trading made easy pdf: [How to Day Trade for a Living](#) Andrew Aziz, 2016-07-28 Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In [How to Day Trade for a Living](#), I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. day trading made easy pdf: The Simple Strategy - A Powerful Day Trading Strategy For Trading Futures, Stocks, ETFs and Forex Markus Heitkoetter, Mark Hodge, 2014-11-04 Learn A Powerful Day Trading Strategy In Less Than 60 Minutes A profitable trading strategy is the most important tool for a trader. This book explains a powerful trend-following day trading strategy for trading futures, stocks, ETFs and Forex. The Simple Strategy Is Easy To Understand And To Trade The Simple Strategy is very popular amongst traders for the following reasons: Clear Entry Rules When trading The Simple Strategy, there's no second-guessing. As you will see, the entry rules are

based on indicators - and these rules are black and white. Either the MACD is above the zero line or it isn't. And either the RSI is above 70 or it isn't. The entries are easy to identify and execute. That's why this strategy is called The Simple Strategy Clear Exit Rules When trading The Simple Strategy you'll know when to exit even before you enter the trade. So, you know exactly how much to risk on any given trade which is essential for precise position sizing and money management. Plus, you can put the trade on auto-pilot once your entry order is filled. This keeps trade management to a minimum. It's easy and simple. Taking advantage of small intraday trends These days trends are short-lived. The times when you could enter the market in the morning and exit the market in the afternoon are over. These days the markets can turn on a dime. Low trading commissions and computerized trading have destroyed the nice and long intraday trends. However, with The Simple Strategy you can take advantage of the small intraday trends that we are seeing in today's markets. You don't need a sophisticated trading software If you want to trade The Simple Strategy, you only need a charting software with basic charting capabilities: Your charting software needs to be able to plot RANGE BARS, BOLLINGER BANDS, MACD and RSI. More than 90% of the charting software packages that are available today have these capabilities. There's no need to buy any proprietary indicators or expensive charting software! In short: The Simple Strategy can greatly simplify your trading. *** WARNING: This Book Is NOT For Everybody! *** Do NOT buy this book if... .. You Are Looking For The Holy Grail Because it doesn't exist! When trading The Simple Strategy, there will be losses! Losses are part of our business as traders. The good news: If you follow the rules of The Simple Strategy, then you will make more money on your profitable trades than you lose on your losing trades. In fact, the risk/reward ratio of this strategy is 1: 1.5, so you can expect to make \$150 for every \$100 you risk. ... You Want To Automate Your Trading Strategies The Simple Strategy will give you clear entry signals, but it's up to YOU to decide if you want to take the signal. As an example, I personally do NOT trade right into a major report. And I only trade the first two hours after the markets open, since most trends occur during this time. Makes sense?

What started as a bet about whether great traders were born or made became a legendary trading experiment that, until now, has never been told in its entirety. *Way of the Turtle* reveals, for the first time, the reasons for the success of the secretive trading system used by the group known as the “Turtles.” Top-earning Turtle Curtis Faith lays bare the entire experiment, explaining how it was possible for Dennis and Eckhardt to recruit 23 ordinary people from all walks of life and train them to be extraordinary traders in just two weeks. Only nineteen years old at the time—the youngest Turtle by far—Faith traded the largest account, making more than \$30 million in just over four years. He takes you behind the scenes of the Turtle selection process and behind closed doors where the Turtles learned the lucrative trading strategies that enabled them to earn an average return of over 80 percent per year and profits of more than \$100 million. day trading made easy pdf: The Truth About Day Trading Stocks Josh DiPietro, 2009-07-08
The Truth About Day Trading Stocks A realistic guide to day trading today's stock market In terms of the potential for heavy financial losses, day trading is a high-risk profession. No one should contemplate day trading without giving thought to the ways he can lose, and all the ways to lessen or avoid them. Yet many people enter the game with unrealistic expectations, unaware of what it takes to succeed. Seminars and software alone do not make a successful day trader, cautions author Josh DiPietro. Instead, a trader must learn hard lessons of self-discipline, consistency, and staying in the game for the long haul to have a real chance of success. In The Truth About Day Trading Stocks, DiPietro offers the amateur day trader a brutally honest look at the pitfalls of day trading—and how to hopefully avoid them. Written in an engaging and sometimes humorous tone, The Truth About Day Trading Stocks draws on the author's own experiences as a day trader to offer a clear-cut departure from typical golden goose strategies promising instant wealth. Instead, he attempts to slow down the dangerous fervor of the average amateur and demonstrate the ways you can become a professional and not lose your shirt in the process. The Truth About Day Trading Stocks shows how trading decisions are bent and shaped by emotions, and why it is critical to know yourself, understand risk, and remember that increasing your skill level is a gradual, ongoing process—there's always more to learn! After dispensing with popular illusions, DiPietro proceeds to offer realistic, practical trading advice—comparing pay-per-trade with pay-per-share brokers, determining which works best and when, offering suggestions on how to avoid the prospect of perfect trades turning ugly, and more. At the end of the book, he also includes a section called Rules to Remember, a list of over eighty rules, simply stated and easy to grasp, to benefit amateurs' performance. Throughout the book, the author describes his development of acute self-awareness while figuring out how to succeed. Through that blunt self-portrayal, the goal of The Truth About Day Trading Stocks is to help you create a disciplined mind-set and apply it to your own successful trading style.
