As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like play, design, and interactivity. They look at games through a series of eighteen game design schemas, or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. easter pictiography words: *Edible Insects* Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

easter pictionary words: Banana Girl Jada Tan Rufo, 2015-06-23 It's not easy being an Asian American in China, where residents of big cities believe that Asians, including those born and raised in English-speaking countries, are not qualified to teach English. In a country of 1.3 billion people where studying English is as popular as having the latest electronic gadget, this can be a huge problem. Author Jada Tan Rufo, descended from a Chinese immigrant who took a Filipino name when he came to the United States, takes up the challenge to teach in the country of her ancestors. Her detailed memoir *Banana Girl* takes readers on a journey throughout China, describing the lows—such as working for a corrupt and inept boss— to the highs, the time she spends with her eager young students and the chance to travel inside the beautiful country. The vast nation incorporates 55 recognized minorities in addition to the Han majority, each with its own language and identity. During her free time, Jada explores China's wonders, walking along the Great Wall, visiting the Olympic Stadium in Beijing and riding camels in Inner Mongolia. It is her work with her students, however, that will define Jada's experience. Although she may be a cultural banana, falling into the Asian American way of thinking of herself as looking yellow on the outside and white on the inside, Jada leaves an indelible impression on the students and fellow teachers whose lives intersected with hers. In *Banana Girl*, she freely shares the frustration, joy and laughter experienced during her time in China.
