geoengineeringwatch org: Geoengineering Dane Wigington, 2017-01-01

geoengineeringwatch org: Weather Warfare Jerry E. Smith, 2011-08-07 In April 1997, United States Secretary of Defense William Cohen declared that there are terrorists at work who "... are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves..." Weather modification in the form of cloud seeding to increase snow packs in the Sierras or suppress hail over Kansas is now an everyday affair. Hundreds of environmental and weather modifying technologies have been patented in the United States alone-and hundreds more are being developed in civilian, academic, military and quasi-military laboratories around the world at this moment! This book lays bare the grim facts of who is doing it and why. The earth and the sky have themselves been turned into weapons! Underground nuclear tests in Nevada have set off earthquakes. A Russian company has been offering to sell typhoons on demand since the 1990s. Scientists have been searching for ways to move hurricanes for over 50 years-the same timeframe that took us from the Wright Brothers to Neil Armstrong. In this book, Jerry E. Smith picks up where his 1998 book about the High-frequency Active Auroral Research Program (HAARP) left off. He reports on recent developments at HAARP, including its possible connection to the crash of the Space Shuttle Columbia and what role, if any, it played in certain "natural" disasters, like Hurricane Katrina. Tackling the chemtrail controversy, Smith examines claims that particles called aerosols are being deliberately injected into the atmosphere. Edward Teller, father of the hydrogen bomb, proposed putting up a "sun screen" of aerosols to save the earth from global warming-is someone actually doing it? Numerous ongoing military programs do inject aerosols at high altitude for communications and surveillance operations. Could these include mind control or population control applications? Smith puts these technologies into context by examining the geopolitical conflicts that are driving their development from Globalization to the rise of Neo-Con Neo-Fascism.

geoengineeringwatch org: Geoengineering Mark M. Rich, 2023-11-11 Deadly aerosols that poison the air, food, and water supplies have been injected into the atmosphere since the late 1940s. The program, known as geoengineering, has been implemented by wealthy eugenicists to deliberately sabotage the planet and commit mass murder. By directly poisoning the Earth's life-sustaining natural resources, geoengineering offers a compound approach to depopulation. The ionospheric heaters, which are used in conjunction with geoengineering, allow for the creation of artificial droughts and floods that are impacting many nations. Geoengineering has unleashed fatal climate feedback loops that have set the planet on a doomful course. The fallouts and weather attacks further a deceptive gambit for global feudalism known as Agenda 21. With obstructive policies and rising costs, they intend to seize private property and herd citizens into megacities with towering prisons that hold hundreds of thousands of people.

geoengineeringwatch org: Climate Intervention National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Board on Atmospheric Sciences and Climate, Committee on Geoengineering Climate: Technical Evaluation and Discussion of Impacts, 2015-06-23 The growing problem of changing environmental conditions caused by climate destabilization is well recognized as one of the defining issues of our time. The root problem is greenhouse gas emissions, and the fundamental solution is curbing those emissions. Climate geoengineering has often been considered to be a last-ditch response to climate change, to be used only if climate change damage should produce extreme hardship. Although the likelihood of eventually needing to resort to these efforts grows with every year of inaction on emissions control, there is a lack of information on these ways of potentially intervening in the climate system. As one of a two-book report, this volume of Climate Intervention discusses albedo modification - changing the fraction of incoming solar radiation that reaches the surface. This approach would deliberately modify the energy budget of Earth to produce a cooling designed to compensate for some of the effects of warming associated with greenhouse gas increases. The prospect of large-scale albedo modification raises political and governance issues at national and global levels, as well as ethical concerns. Climate Intervention: Reflecting Sunlight to Cool Earth discusses some of the social, political, and legal issues surrounding

these proposed techniques. It is far easier to modify Earth's albedo than to determine whether it should be done or what the consequences might be of such an action. One serious concern is that such an action could be unilaterally undertaken by a small nation or smaller entity for its own benefit without international sanction and regardless of international consequences. Transparency in discussing this subject is critical. In the spirit of that transparency, Climate Intervention: Reflecting Sunlight to Cool Earth was based on peer-reviewed literature and the judgments of the authoring committee; no new research was done as part of this study and all data and information used are from entirely open sources. By helping to bring light to this topic area, this book will help leaders to be far more knowledgeable about the consequences of albedo modification approaches before they face a decision whether or not to use them.

geoengineeringwatch org: *Mass Awakening* Shoshi Herscu, 2018-10-08 The Truth has been hidden from us while a global policy of mass depopulation and exploitation has been carried out behind the scenes for the past half-century. The author, an independent journalist, became aware of this agenda only in the past few years. She found it hard to believe, but in-depth research and the testimony of whistleblowers worldwide have exposed these strategies. They include geoengineering (chemtrails), fluoridation of water supplies, GMOs, vaccinations, false flag terrorist attacks, and economic warfare by the group David Wilcock calls the Cabal. However, despite this grim reality, a positive shift of mass awakening is occurring worldwide. Tribunals are being established to prosecute elite offenders; revelations of hidden technology like free-energy and new economic models are being put forth. The author shows how humanity is claiming its rightful heritage as spiritual beings and charts the course of our elevation of consciousness. *MASS AWAKENING* gives us all real hope for an amazing future. *Mass Awakening* is Shoshi Herscu's well researched and yet profoundly personal handling of intensely shocking material, rarely covered in print. It is both a true inspiration and a much-needed breath of fresh air. —Ada Tourtsakis

geoengineeringwatch org: The Inconvenient Skeptic John H. Kehr, 2011-10-24 The story of our Earth is one of constant change. Only by understanding why the Earth has changed in the past is it possible to predict how it will change in the future. Four years ago I considered the theory of global warming to be a real possibility, but I found that I could not wholly commit to it without understanding the science of the Earth's climate. With my background as an engineer in the private R&D field as my guide, I decided to understand the Earth's climate and the theory of global warming for myself. This book tells of my journey through the science and the controversy that surrounds the global warming debate. It tells the history of the Earth's past climate and how it became the climate of today. It is this knowledge that made me a global warming skeptic. This book is not for those that wish to ignore the science of the debate, it is for those that want to learn about why the Earth changes. Climate will change in the future, if you want to know why, then read this book.

geoengineeringwatch org: Under an Ionized Sky Elana Freeland, 2018-02-13 It is difficult to believe that our planet has been weaponized before our very eyes, but that is exactly what has happened. First, we were seduced by the convenience of a wireless world; then, atmospheric weather experimentation in the guise of carbons "climate change" converted the air we breathe into an antenna. Now, the geo-engineering we've been subjected to for two decades is being normalized as the "Star Wars" Space Fence rises around and within us. Is this the Space Age we were promised?

geoengineeringwatch org: Geoengineering, the Anthropocene and the End of Nature Jeremy Baskin, 2019-05-17 This book takes a critical look at solar geoengineering as an acceptable means for addressing climate change. Baskin explores the assumptions and imaginaries which animate 'engineering the climate' and discusses why this climate solution is so controversial. The book explains geoengineering's past, its revival in the mid-2000s, and its future prospects including its shadow presence in the Paris climate accord. The main focus however is on dissecting solar geoengineering today - its rationales, underpinning knowledge, relationship to power, and the stance towards nature which accompanies it. Baskin explores three competing imaginaries associated with geoengineering: an Imperial imaginary, an oppositional Un-Natural imaginary, and a conspiratorial Chemtrail imaginary. He seeks to explain why solar geoengineering has struggled to gain approval and why resistance to it persists, despite the support of several powerful actors. He provocatively suggests that reconceptualising our present as the Anthropocene might unwittingly facilitate the normalisation of geoengineering by providing a sustaining socio-technical imaginary. This book is essential reading for those interested in climate policy, political ecology, and science & technology studies.

geoengineeringwatch org: Chemtrails, HAARP, and the Full Spectrum Dominance of Planet Earth Elana Freeland, 2014-05-26 We are entering a Space Age, but not the kind President Kennedy originally envisioned. This Space Age is replacing resource wars and redefines planet earth as a battlespace in accordance with the military doctrine of Full-Spectrum Dominance. This book

examines how chemtrails and ionospheric heaters like the High-frequency Active Auroral Research Project (HAARP) in Alaska services a full-spectrum dominance. This Revolution in Military Affairs needs an atmospheric medium to assure wireless access to the bodies and brains of anyone on Earth—from heat-seeking missiles to a form of mind control. How sinister are these technologies? Are we being prepared for a global village lockdown? The recent release of NSA records have reminded Americans that eyes in the sky are tracking us as supercomputers record the phone calls, e-mails, internet posts, and even the brain frequencies of millions. Elana M. Freeland's startling book sifts through the confusion surrounding chemtrails-versus-contrails and how extreme weather is being geo-engineered to enrich disaster capitalists and intimidate nations. A deconstruction of Bernard J. Eastlund's HAARP patent points to other covert agendas, such as a global Smart Grid infrastructure that enables access to every body and brain on Earth, a Transhumanist future that erases lines between human and machine, and Nanobiological hybrids armed with microprocessors that infest and harm human bodies.

geoengineeringwatch org: Has It Come to This? J.P. Sapinski, Holly Jean Buck, Andreas Malm, 2020-11-13 Geoengineering is the deliberate and large-scale intervention in the Earth's climate system in an attempt to mitigate the adverse effects of global warming. Now that a climate emergency is upon us, claims that geoengineering is inevitable are rapidly proliferating. How did we get into this? What options make it onto the table? Which are left out? Whom does geoengineering serve? These are some of the questions that the thinkers contributing to this volume are exploring.

geoengineeringwatch org: Killing the Planet Rodney Howard-Browne, Paul L. Williams, 2019-11-05 In *Killing the Planet: How A Financial Cartel Doomed Mankind*, best-selling authors Rodney Howard-Browne and Paul L. Williams investigate the true motives and consequences of the Pilgrim Society. Early members of the Society included J. P. Morgan, Andrew Carnegie, Andrew Mellon, Cornelius Vanderbilt, Paul Warburg, Mortimer I. Schiff, Otto Kahn, and John D. Rockefeller. Although the Pilgrim Society and the powerful men involved are often praised for their philanthropic actions, Howard-Browne and Williams show that the Society was self-serving and subjected the American people to a brutal system of economic tyranny, one which is still in place today. As a sequel to *The Killing of Uncle Sam*, *Killing the Planet* is a thoroughly documented and impeccably researched book, with over 1,500 footnotes. It shows how mankind has become enslaved within the Luciferian world system that is managed and controlled by the world's wealthiest families. The book is not full of conspiracy theories but instead, unfortunately for all of humanity, full of gut-wrenching facts.

geoengineeringwatch org: Leadership for Sustainability David Dixon, 2022-03-17 Mobilised by the rousing words and protests of Greta Thunberg, young people all over the globe are calling for more action to combat climate change and better protect their futures. Yet they cannot do this alone. They are reliant on people in positions of power to set the necessary changes in motion - and these people include their own school leaders operating within their own local communities. This book is a rallying cry for all schools to unleash their potential to deliver a brighter future for both their pupils and society at large. David Dixon draws on both his doctoral research and his 20 years' experience as a head teacher to set out how school leaders can embed eco-friendly practices in the day-to-day running of their schools that will also contribute to overall school improvement, including that recognised by inspectors. David weaves his guidance around the 'five Cs of sustainability' - captaincy, curriculum, campus, community and connections - to position sustainability as a natural vehicle for developing a type of fully integrated learning ecology and culture for the benefit of all. The book provides a detailed analysis of where we are now in terms of environmental impact, and lays out a road map to help schools move towards more effective eco-friendly provision. It shares practical examples of sustainability in schools and how these contribute to school improvement in the wider, more conventional sense too. Furthermore, each chapter concludes with a series of suggested strategies to encourage further thought and discussions among school stakeholders. Suitable for school leaders, teachers and teacher trainers - in both primary and secondary settings - and for any professionals who work in schools on environmental education or improvement projects.

To have all countries use free energy will give humanity a new world and the opportunity to enjoy living entities throughout the universe.

geoengineeringwatch org: Chemtrails James Handen, 2022-01-29 Most experts agree that the lines in the sky produced by some aircraft are harmless contrails, that these emissions have always been produced and that they can be explained by the interaction of atmospheric gases. However, different people around the world are astonished by the amount of time these dubious contrails persist, and how they end up looking like indelible clouds. How can it be explained that the analysis of the samples taken from these trails reveal the presence of aluminum, barium and strontium? And more importantly: why would they secretly release dangerous chemicals, how does

this relate to climate manipulation and geoengineering? Throughout this book, several of the silenced scientists will deliver what their research shows.

geoengineeringwatch org: Death by Technology John R. Cook, 2020-12-28 This book refutes the 21st-century notion that advancing technology is an unambiguous social good, and examines the effects of this uncritical acceptance and dependence. The author argues that technology has become the new religion for the digital age, and that elevating technology to nearly the status of a deity allows for the denial of problems created by reliance upon machines. From the release of toxins into the environment to the unsustainable energy demands of the modern era, technological dependence is driving humanity near the brink of extinction. Despite these problems, and existential issues such as artificial intelligence and the proliferation of nuclear weapons, many people have an unwavering belief in the ability of technology, particularly any device labeled smart, to create a perfect future--while denying the history of unmet promises and unintended consequences of technological innovation. The author explores the psychological underpinnings of these beliefs from both a clinical and a cognitive perspective. The social and economic forces that maintain our reliance on, or addiction to, technology are critiqued as are the ethical and security issues associated with the control of advanced technology.

geoengineeringwatch org: *Final Apostasy* Linda L. Evans, 2022-11-04 In *Final Apostasy*, author Linda L. Evans reveals the relevant steppingstones in history that caused the world to be in its current state. In modern times, we must learn the nature of the beast, its system, the players, and learn of Jesus Christ according to His instruction. Without this information, no substantial evidence or understanding will be realized, and people will stay in their slumber. Throughout her thirty years of prophecy studies, Evans has explored the foundations of the world's established institutions from the ancients to modern time, uncovering the evil that has infiltrated them. She shatters long-standing paradigms while providing evidence that a pre tribulation rapture, from Paul's teachings, is imminent. Through information revealed from God, *Final Apostasy* explores a host of subjects including presumptuous sin, Zionism, the death of the middle class, DNA tampering, and more. Evans implores Christians to get spiritually ready for the coming rapture by becoming more informed.

geoengineeringwatch org: *The Global Conspiracy Exposed* The Whistleblower, 2021-10-28 America is no longer a government by the people and for the people. According to information retrieved from the Council on Foreign Relations website, in 1921 a group of diplomats, financiers, generals, and lawyers concluded that Americans needed to be better prepared for significant responsibilities and decision making in world affairs, with this in mind they founded the 'Council on Foreign Relations.' In other words, a group of elites created a government independent of our elected government. Diplomats, financiers, generals, and lawyers created their own government in 1921 which continues to operate and circumvent our elected government to this very day. Readers will learn from this book that the Council on Foreign Relations, the Establishment, the Deep State, and the Shadow Government are all one and the same. Their goal is a corporate controlled one world government, and it appears as if the majority of our representatives are serving them. Many

Americans are just recently becoming aware of and thus concerned with the establishments GREEN NEW DEAL and are totally unaware that it is already the law of the land via Executive Order No. 12852. In 1993 President Bill Clinton DAMNED the United States with the creation of the President's Council on Sustainable Development which is the original title for the GREEN NEW DEAL.

geoengineeringwatch org: The Battle of The Sexes: It's Been Downhill Since The Garden H.R. Boaz, 2021-05-08 "The Battle of the Sexes" explores how the Word of God (YHWH), both the Old Testament and the New Testament, has been twisted to support a narrative that is not in the Scriptures. Traditional translations and teachings of the Bible have either presumed or assumed that men are given power and dominion over women. But nowhere in the Bible is this statement made, not even in Genesis (Bereishis) 3:16, "And your husband will rule over you," which is not spoken as an imperative but rather as a prophecy. The original Hebrew language of the first five books of Moses, also known as the Torah (Old Testament), tells a very different story of the primal couple. A story that is contrary to what is often taught in all religions that use the Word of YHWH as their foundation - namely, Judaism, Christianity and Islam. With an abbreviated overview of human history as told from YHWH's point of view, we discover a connection of how all cultures have come to share similar myths, legends and stories with the Torah. And how these ancient archetypes of good and evil have been misused to support a psychological and socio-political advantage of men over women. Likewise, a brief foray into the unique Hebrew language, the ancient language in which YHWH created our world, and dictated the Torah to Moses provides proof that the Word of God is indeed communication from another dimension. Like a massive encrypted message, the Torah includes multiple levels of God-given "fences" that protect the Word of God from man's distorted perspective. The Hebrew language itself provides the most significant "fence." Like no other language each Hebrew word defines itself by the letters that make up the word. This is only one feature of the holy text that assures that the instructions of YHWH remain intact, regardless of man's interpretations. "The Battle of the Sexes" is an examination, from a fresh viewpoint, into the issues that arise between the genders, which stem from the original disobedience of God's one instruction by the primal couple in the Garden of Eden (Gan Eden). We see a more complete perspective of who did what in the initial defiance, and how we continue to struggle in the female/male relationship with those very same issues first raised in Gan Eden. Moreover, with clarity, the Hebrew language reveals a much greater significance of the female to the human experience than is typically taught in any religion. Exposed in her Hebrew name (which is not usually translated properly) is her irrefutable role in God's plan of salvation for the human race. God did not make women subservient to men, and YHWH did not give men or women dominion over anything but the animals, and the earth to utilize as God intends. Humanity is to work together, not to manipulate or fight to assume power over one another. Nowhere is this idea more consequential than in the marriage relationship. Being the preeminent human relationship, YHWH presents marriage as the foundation for all other human relationships, from Bereishis, the beginning creation of our world, and the human creature. Undergirding the arrogant, impudent presumption that men are to rule over women is the equally destructive fallacy that God is masculine. The Battle of the Sexes explores how from the initial verses and chapters of the first book of Torah, the book of Genesis, we begin to understand how, as the Jewish Sages say, with the change of one letter the world is destroyed. With the misinterpretation and misunderstanding of one Hebrew word, adam, our modern grasp of the essence of YHWH and the female/male relationship, as described in Torah, has been distorted, and all but destroyed. The Battle of the Sexes is sure to, not only answer, but raise many questions regarding the female/male relationship as well as humanities' relationship with God.

geoengineeringwatch org: End Times Dawning: Get Ready! Steve Ashburn, 2021-03-13 We are rapidly approaching a period in time that the Bible refers to as the End Times. This book explains the end times drawing from Old Testament prophecies, with an emphasis on the book of Isaiah. This 40-year period will begin with nuclear war in the Middle East, then the rapture, the

Russian invasion of North America, the Russian invasion of Israel, the Tribulation, and ends with the glorious Second Coming of Christ. This book systematically and concisely goes through these prophecies and puts them in their proper place in history, current events, and future events, along with a proper timeline of this End-Times period. After reading this book, the Christian will be able to understand: The definition of "End Times" and similar terms in the Bible. The role of various nations such as Egypt, Libya, Sudan, Lebanon, Syria, Gaza and West Bank in conflict with Israel. The role of the United States as a world power and the specific parts it plays in the end times.

geoengineeringwatch org: Health Disclosure Adam Masters, 2013-11-01 A team of doctors and I figured out how to eliminate pain, inflammation, obesity, disease, and cancer to 5 basic elements of health, arranged as a pyramid of priorities. Pain, inflammation and unhealthy weight are simply precursors to disease and obesity arranged in a sequence that begin at the precise point where 1 or more of the 5 imbalances occur. All are symptoms of inflammation, all are caused by imbalances in the pyramid I call the Matrix. Where you are in the Matrix is measured by pH, 7.2 being perfect. By using the Matrix for anyone, for any condition reverses and accelerates recovery past the point of curing to a point of thriving. It makes pain, inflammation, obesity, disease, medication, cancer, and for most, mental illness irrelevant. That pyramid is the fulcrum point from where the sequence of obesity and disease begins. You can stop and reverse ill-health in its tracks by balancing the 5 elements at any point. Blood only becomes alkaline pH 7.0(+/- 0.2) absent of inflammation, to sustain life. PH is the report card of the 5 elements that make up the Matrix pyramid of patient health. The Matrix is the roadmap and the sequence is the path. The difference between existing in a hospital bed, requiring a walker, living with a sore back to thriving can be manipulated by how much you invest in optimizing the 5 elements. The easy part is, prevention and cure for anyone of any disease. Optimization and thriving is where this book wants to take you! Profit has no incentive to change, since profit is working well for individuals that currently control the system, and doctors cant disclose this information without repercussions. The trouble with the health care system is that it is driven by profit and not by incentive for cures. Trauma-care-trained doctors are practicing health care and the symptom is sick care. Treating symptoms intensifies problems because it ignores the factor of time. Health Disclosure is about health care for the 21st century and its about time!

geoengineeringwatch org: *Establishing Norms in a Kaleidoscopic World* Edith Brown Weiss, 2022-02-22 We live in a kaleidoscopic world in the new Anthropocene Epoch. This calls for a more inclusive public international law that accepts diverse actors in addition to States and other sources of law, including individualized voluntary commitments. Norms are critical to the stability and legitimacy of this international system. They underlie responses to rapid change, to new technological developments and to problems of protecting commons, promoting public goods, and providing social and economic justice. Certain fundamental norms can be identified ; others are emerging. The norm of mutual accountability underpins the implementation of other norms. Norms are especially relevant to frontier doit-yourself technologies, such as synthetic biology, digital currencies, cyber activity, and climate interventions, as addressed in the book. Reconceiving public international law lessens the sharp divide between public and private law and between domestic and international law.

geoengineeringwatch org: *Soul Breathing* Carrie L'Esperance, 2016-05-17 An exploration of the multidimensional interplay between body, mind, and spirit • Identifies the frequencies that support life and the dissonant frequencies incompatible with life, such as the imbalances of EMFs • Explains how to cultivate higher consciousness by building a strong light body • Includes techniques and exercises for psychic cleansing, physical and emotional detox, chakra and aura strengthening, and oracular dreaming Civilization has reached a critical threshold in time unlike any other. Whether life continues to evolve or devolve depends upon our ability to reach higher states of consciousness en masse. This requires calling upon the transformative power of the soul--a power not handed to us, but earned. We are living proof that the physical and spiritual realms of existence work together in unity. Yet for many of us our natural soul light and inner spiritual intuition are

suppressed due to the distractions of day-to-day living and the electromagnetic pollution of our screen-filled technological world. In this exploration of the multidimensional interplay between the body, mind, and spirit, Carrie L'Esperance reveals how we can restore the flow of spiritual light in everyday living through the art of self-mastery. She explains how technology has severely reduced humanity's natural abilities and spiritual power. She shows how EMFs and wi-fi toast our energetic bodily systems and suppress our immune systems, blocking the ethereal frequencies of light and suppressing our creative intuition and higher powers. Detailing the spiritual bio-geometry of light and the holographic principle, she explores how the cells of our bodies receive light's deeper vibratory frequencies to support conscious evolution and soul development as well as explaining near-death and out-of-body experiences. She identifies the dissonant energies that endanger mind/body health and reveals new advances in brain science that allow us to transcend the malignant influences that hamper human evolution. She provides exercises and techniques for spiritual alignment and receptivity, including psychic cleansing, physical and emotional detox, chakra and aura strengthening, and oracular dreaming. Preparing us for the new cosmology and the greater community of worlds that is being revealed, L'Esperance shows that when we are properly connected with our soul's intelligence and cultivate the reception of higher frequencies of consciousness, then we are able to soul breathe, to absorb more pranic energy, the electromagnetic force and cosmic radiation that is the sustaining element of all life and consciousness.

geoengineeringwatch org: Climate Change Geoengineering Wil C. G. Burns, Andrew L. Strauss, 2013-07-22 In this book, eleven prominent authorities on climate change consider the legal, policy, and philosophical issues presented by geoengineering. The book asks: When, if ever, are decisions to embark on potentially risky climate modification projects justified? If such decisions can be justified, in a world without a central governing authority, who should authorize such projects and by what moral and legal right?

geoengineeringwatch org: Risks and Regulation of New Technologies Tsuyoshi Matsuda, Jonathan Wolff, Takashi Yanagawa, 2020-12-01 How should we proceed with advanced research of humanities and social sciences in collaboration? What are the pressing issues of this new trend in a cataclysmic time for civilization? This book, originated with a Japan Society for the Promotion of Science (JSPS) Topic-Setting Program, addresses these challenging questions in four parts for innovating twenty-first-century humanities and social sciences. It broadens the horizon for reviewing multi-disciplinary landscapes of risks and regulation of new technologies by focusing on paradigmatic cases from the fields of life and environment. Here, genome editing for reproductive treatment and renewable energy under the constraint of climate change in Japanese and global contexts are involved. The volume comprises a combination of topics and aspects such as public policy and philosophy of science, medicine and law, climate ethics, and the economics of electricity. This edited collection will thus motivate forward-thinking readers across the diverse spectrum of social sciences and humanities to survey themes of their own interests in multi-disciplinary studies. In so doing, they can explore the evolving frontiers of those disciplines and the depths of individual contributions by experts in philosophy, ethics, law, economics, and science, technology, and society (STS), including bioscience.

geoengineeringwatch org: The Anthropocene in Global Media Leslie Sklair, 2020-11-22 This book offers the first systematic study of how the 'Anthropocene' is reported in mass media globally, drawing parallels between the use (or misuse) of the term and the media's attitude towards the associated issues of climate change and global warming. Identifying the potential dangers of the Anthropocene provides a useful path into a variety of issues that are often ignored, misrepresented, or sidelined by the media. These dangers are widely discussed in the social sciences, environmental humanities, and creative arts, and this book includes chapters on how the contributions of these disciplines are reported by the media. Our results suggest that the natural science and mass media establishments, and the business and political interests which underpin them, tend to lean towards optimistic reassurance (the 'good' Anthropocene), rather than pessimistic alarmist stories, in reporting the Anthropocene. In this volume, contributors explore how dangerous this 'neutralizing'

of the Anthropocene is in undermining serious global action in the face of the potential existential risks confronting humanity. The book presents results from media in more than 100 countries in all major languages across the globe. It covers the reporting of key environmental issues, such as the impact of climate change and global warming on oceans, forests, soil, biodiversity, and the biosphere. We offer explanations for differences and similarities in how the media report the Anthropocene in different regions of the world. In doing so, the book argues that, though it is still controversial, the idea of the Anthropocene helps to concentrate minds and behaviour in confronting ongoing ecological (and Coronavirus) crises. The Anthropocene in Global Media will be of interest to students and scholars of environmental studies, media and communication studies, and the environmental humanities, and all those who are concerned about the survival of humans on planet Earth.

geoengineeringwatch org: Beyond Esoteric Brad Olsen, 2021-01-14 Nothing in this world works the way you think it does; there is always more to the story. Be aware that there is a war for your mind and your soul. Corporations have taken over governments in a new form of Fascism that now incorporates high technology and artificial intelligence. The survival of the human race may depend on breaking the Embargo of truth, and collectively developing an ÜberMind. But truth always resonates! Beyond Esoteric takes off the kids gloves, and exposes the control grid extending its tentacles across the planet. The word occult means nothing more than to study the realm of the hidden. So much of real knowledge and wisdom is disguised because the people who run the planet feel that true information of how the world works and how to manifest reality is something you do not need to know. Everything we think we know about the world and the universe in which we live, whatever we have been led to believe concerning the course of human history, could very well be completely wrong, distorted and misinformed. The 19th century teachers of the occult could never have imagined The Ultimate Journey of the 21st century we now face, one that extends far Beyond Esoteric.
