henretta pdf: *Toxic Inequality* Thomas M. Shapiro, 2017-03-14 From a leading authority on race and public policy, a deeply researched account of how families rise and fall today Since the Great Recession, most Americans' standard of living has stagnated or declined. Economic inequality is at historic highs. But inequality's impact differs by race; African Americans' net wealth is just a tenth that of white Americans, and over recent decades, white families have accumulated wealth at three times the rate of black families. In our increasingly diverse nation, sociologist Thomas M. Shapiro argues, wealth disparities must be understood in tandem with racial inequities -- a dangerous combination he terms toxic inequality. In *Toxic Inequality*, Shapiro reveals how these forces combine to trap families in place. Following nearly two hundred families of different races and income levels over a period of twelve years, Shapiro's research vividly documents the recession's toll on parents and children, the ways families use assets to manage crises and create opportunities, and the real reasons some families build wealth while others struggle in poverty. The structure of our neighborhoods, workplaces, and tax code--much more than individual choices--push some forward and hold others back. A lack of assets, far more common in families of color, can often ruin parents' careful plans for themselves and their children. Toxic inequality may seem inexorable, but it is not inevitable. America's growing wealth gap and its yawning racial divide have been forged by history and preserved by policy, and only bold, race-conscious reforms can move us toward a more just society. Everyone concerned about the toxic effects of inequality must read this book. -- Robert B. Reich This is one of the most thought-provoking books I have read on economic inequality in the US. -- William Julius Wilson

henretta pdf: *Inheritance in Contemporary America* Jacqueline L. Angel, 2008-01-28 With the baby boom generation on the cusp of retirement, life expectancies on the rise, and the nation's cultural makeup in flux, the United States is faced with social and policy quandaries that demand attention. How are elders to balance the competing claims of helping family members during their lifetime, saving for old age, and planning estates? What roles should the state, family, and individuals play in supporting people during later life? Are new familial gift-giving trends sustainable, and, if so, what effects might they have on future generations? *Inheritance in Contemporary America* tackles the complex legal, policy, and emotional issues that surround bequests and inheritances in an era of increasing longevity, broadening ethnicity, and unraveling social safety nets. Through empirical analyses, case studies, interviews, and anecdotes, Jacqueline L. Angel explains the historical nature of familial giving and how it is changing as the nation's

demographics shift. She explores the legal, personal, and policy complexities involved in passing wealth down through generations and provides a cross-disciplinary context for exploring the indelible effects that newly unfolding inheritance practices will have on various societal cohorts and the nation in general. From nuclear and extended families to the state and nongovernmental bodies, Angel's engaging study explores how attitudes toward giving are evolving and confronts in stark terms the legacy that these shifts in attitude will leave. This book will be a vital tool for scholars and practitioners in gerontology, sociology, psychology, anthropology, economics, political science, and public policy.

henretta pdf: *Sources of Power* Manfred Weissenbacher, 2009-09-30 A landmark book rolls out a bold, new, energy-based theory of human history based on a simple, yet powerful law: whoever controls the world's effective energy supplies during a given energy age will inevitably dominate the economic, political, and cultural history of that age. The innovative theory articulated in *Sources of Power: How Energy Forges Human History* parses history into four ages: the foraging, agriculture, coal, and oil ages, each defined by the dominant source of power. Manfred Weissenbacher tests this sweeping theory against the panorama of world history, combining formidable powers of synthesis with a specialist's deep understanding of energy systems and technologies. After proving the operation of his law through history and into the present, Weissenbacher applies it to global geopolitical trends. He assesses the prospects of the various candidate technologies to succeed oil and charts future scenarios based on the distribution of energy reserves. Finally, he forecasts the fates of the American and Chinese empires in the twilight of the oil age: the United States as a mature superpower forced to deploy military might to occupy oilfields in the Middle East; China as an emerging superpower forced to deploy economic might to muscle in on the development of Third World oilfields.

henretta pdf: *Bridge Employment* Carlos-María Alcover, Gabriela Topa, Emma Parry, Franco Fraccaroli, Marco Depolo, 2014-04-16 With the long-term trend toward earlier retirement slowing, and the majority of older workers remaining in employment up to and beyond statutory retirement age, it is increasingly important that we understand how to react to these changes. Bridge employment patterns and activities have changed greatly over the past decade, yet there is little information about the benefits of the various different forms this can take, both for employees and employers. This comparative international collection provides the first comprehensive summary of the literature on bridge employment, bringing together experiences from Europe, the United States, Canada, Australia and Japan. It identifies the opportunities, barriers and gaps in knowledge and practice, whilst offering recommendations on how organisations and individuals can cope with future challenges in aging and work. Written by international experts in the field, each chapter also makes substantive and contextualized suggestions for public policy and organizational decision-makers, providing them with a roadmap to implement and integrate bridge employment into policies and practices designed to prolong working life - a priority for workers, organizations and societies in the coming decades. This unique research handbook will be useful to a wide range of readers with an interest in the new concept of bridge employment and the extension of working life, and of interest to researchers and practitioners in organizational behavior, labor market analysis, human resource management, career development/counselling, occupational health, social economy and public policy administration

henretta pdf: Wealth Accumulation and Communities of Color in the United States

Jessica Gordon Nembhard, Ngina S. Chiteji, 2006-11-06 Congratulations to Drs. Nembhard and Chiteji and the authors included in this much needed volume of work! Their book offers the perspective and insight of scholars of color that are too often missing from information produced by the asset building field (people and organizations seeking to help low-income people develop assets). Communities served by the asset building field are disproportionately made up of people of color. This book captures work produced by scholars representing these communities and offers innovative and thought provoking analyses of wealth inequality. Decision-making on research, policy, and practice that fails to incorporate the knowledge of these and other asset accumulation experts of color runs the risk of being fatally flawed and irrelevant to the communities the asset building field intends to serve. --Kilolo Kijakazi, Ph.D., The Ford Foundation An important contribution to the economics literature on wealth and to our understanding of racial and ethnic inequality. This book adds to our knowledge and understanding of the wealth positions of Latinos, Asian Americans, Hawaiians, and Native Americans and places this information in the context of black-white wealth inequality. --Cecilia A. Conrad, Department of Economics, Pomona College This book does an outstanding job of introducing readers to a host of interesting questions related to racial and ethnic minority status and wealth composition and accumulation. The chapters on wealth accumulation among Native Americans, Latinos, and Asian Americans offer one of the few places where this information is readily available. The recent disaster in New Orleans has shown the nation that there is a strong interaction between wealth, race, and social outcomes. This book not only fills a void in understanding the black-white wealth inequality that was apparent after Hurricane Katrina, but it also provides great insight into the wealth status of other racial and ethnic minorities. --Patrick L. Mason, Department of Economics, Florida State University This edited volume takes up an important, indeed, fundamental, topic, bringing together leading scholars to assess wealth accumulation among people of color. No other book or research report covers as many groups of color as appear in this volume, devoting chapters to African Americans, Latinos, Native Americans, Asian Americans, and Native Hawaiians. The result is a noteworthy achievement. --Michael Sherraden, Benjamin E. Youngdahl Professor of Social Development, Washington University in St. Louis Jessica Gordon Nembhard is Assistant Professor and Economist, African American Studies Department, and co-founder of the Democracy Collaborative at the University of Maryland, College Park. Her work on the history of black cooperatives is well known in progressive circles. Ngina Chiteji is Associate Professor of Economics, Skidmore College. henretta pdf: The Immortal Life of Henrietta Lacks Rebecca Skloot, 2010-02-02 #1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

henretta pdf: For Love or Money Nancy Folbre, 2012-09-06 As women moved into the formal labor force in large numbers over the last forty years, care work – traditionally provided primarily by women – has increasingly shifted from the family arena to the market. Child care, elder care, care for the disabled, and home care now account for a growing segment of low-wage work in the United States, and demand for such work will only increase as the baby boom generation ages. But the expanding market provision of care has created new economic anxieties and raised pointed questions: Why do women continue to do most care work, both paid and unpaid? Why does care

work remain low paid when the quality of care is so highly valued? How effective and equitable are public policies toward dependents in the United States? In *For Love and Money*, an interdisciplinary team of experts explores the theoretical dilemmas of care provision and provides an unprecedented empirical overview of the looming problems for the care sector in the United States. Drawing on diverse disciplines and areas of expertise, *For Love and Money* develops an innovative framework to analyze existing care policies and suggest potential directions for care policy and future research. Contributors Paula England, Nancy Folbre, and Carrie Leana explore the range of motivations for caregiving, such as familial responsibility or limited job prospects, and why both love and money can be efficient motivators. They also examine why women tend to specialize in the provision of care, citing factors like job discrimination, social pressure, or the personal motivation to provide care reported by many women. Suzanne Bianchi, Nancy Folbre, and Douglas Wolf estimate how much unpaid care is being provided in the United States and show that low-income families rely more on unpaid family members for their child and for elder care than do affluent families. With low wages and little savings, these families often find it difficult to provide care and earn enough money to stay afloat. Candace Howes, Carrie Leana and Kristin Smith investigate the dynamics within the paid care sector and find problematic wages and working conditions, including high turnover, inadequate training and a “pay penalty” for workers who enter care jobs. These conditions have consequences: poor job quality in child care and adult care also leads to poor care quality. In their chapters, Janet Gornick, Candace Howes and Laura Braslow provide a systematic inventory of public policies that directly shape the provision of care for children or for adults who need personal assistance, such as family leave, child care tax credits and Medicaid-funded long-term care. They conclude that income and variations in states’ policies are the greatest factors determining how well, and for whom, the current system works. Despite the demand for care work, very little public policy attention has been devoted to it. Only three states, for example, have enacted paid family leave programs. Paid or unpaid, care costs those who provide it. At the heart of *For Love and Money* is the understanding that the quality of care work in the United States matters not only for those who receive care but also for society at large, which benefits from the nurturance and maintenance of human capabilities. As care work gravitates from the family to the formal economy, this volume clarifies the pressing need for America to fundamentally rethink its care policies and increase public investment in this increasingly crucial sector.

henretta pdf: Will You Still Need Me? Angela Brownemiller Ph.D., 2010-04-09 This insightful and moving book looks at how people of various ages view the process of aging and the social and emotional perspectives it evokes. Will You Still Need Me?: Feeling Wanted, Loved, and Meaningful as We Age is a touching and incisive book organized around interviews with individuals of various ages who have responded to questions about aging. They reveal their self-perceptions, their feelings about the future, their self-image as it relates to aging, and their expectations and impressions of aging itself. Psychotherapist Angela Browne-Miller weaves the findings into a philosophical, research-based overview of cross-generational concerns and feelings about aging. Her book opens a window into the hearts and minds of our parents, our peers, and our children as they look at the aging process and at how individuals, society, and families treat aging. Through the sensitive, up-close-and-personal, bird's-eye view of the people interviewed for this book, aging unfolds into a deeply moving experience, one we all share.

henretta pdf: Prejudential Margaret Kimberley, 2020-02-04 “This book is an effort to shed light on the truth. . . . To the extent that our leaders embody aspects of who we are as a people, studying how each president has participated in our nation’s complicated and often shameful treatment of Black people is as good a place as any to start.” — Margaret Kimberley from the Preface Margaret Kimberley gives us an intellectual gem of prophetic fire about all the U.S. presidents and their deep roots in the vicious legacy of white supremacy and predatory capitalism. Such truths seem more

than most Americans can bear, though we ignore her words at our own peril! — Cornel West, author of *Race Matters* PREJUDENTIAL is a concise, authoritative exploration of America's relationship with race and Black Americans through the lens of the presidents who have been elected to represent all of its people. Throughout the history of the United States, numerous presidents have left their legacies as slaveholders, bigots, and inciters of racial violence, but were the ones generally regarded as more sympathetic to the plight and interests of Black Americans—such as Lincoln, FDR, and Clinton—really much better? And what of all the presidents whose relationship with Black America is not even considered in the pages of most history books? Over the course of 45 chapters—one for each president—Margaret Kimberley enlightens and informs readers about the attitudes and actions of the highest elected official in the country. By casting sunlight on an aspect of American history that is largely overlooked, *Prejudential* aims to increase awareness in a manner that will facilitate discussion and understanding.

henretta pdf: Salutory Neglect James A. Henretta, 2015-03-08 During the remarkably long period (1724-1754) that Thomas Pelham-Holles, Duke of Newcastle, served as England's secretary of state, private interests and the exigencies of domestic politics rather than a rational assessment of England's stake in America determined colonial policy. As no purposeful effort was made to administer the colonies political life, they enjoyed in effect relatively little interference in their internal affairs. The reasons for this salutary neglect and the lack of a vigorous colonial program are analyzed now by James Henretta. His study, though focusing on the politics and patronage of the Duke, brings into view the entire range of men and agencies that had a hand in making colonial policy and dispensing patronage. It thus illuminates the political and administrative system that developed in England during the first half of the century and continued in effect at the time of the American Revolution. henretta pdf: New Life Courses, Social Risks and Social Policy in East Asia Raymond K. H. Chan, Jens Zinn, Lih-Rong Wang, 2015-10-30 Social policy in modern industrialised societies is

increasingly challenged by new social risks. These include insecure employment resulting from ever more volatile labour markets, new family and gender relationships resulting from the growing participation of women in the labour market, and the many problems resulting from very much longer human life expectancy. Whereas once social policy had to be in step with a standardised, relatively stable and predictable life course, it now has to cope with non-standardised individual preferences, life courses and families, and the consequent increased risks and uncertainties. This book examines these new life courses and their impact on social policy across a range of East Asian societies. It shows how governments and social welfare institutions have been slow to respond to the new challenges. In response, we propose a life-course sensitised policy as an approach to manage these risks. Overall, the book provides many new insights which will assist advance social policy in East Asia.

henretta pdf: *Do the Crime, Do the Time* G. Larry Mays, Rick Ruddell, 2012-03-09 This book provides a fresh look at the way the United States is choosing to deal with some of the serious or persistent youth offenders: by transferring juvenile offenders to adult courts. For more than 20 years now, the attitude in some jurisdictions has been if you're old enough to do the crime, you're old enough to do the time. After two decades of applying this increasingly punitive mindset to juvenile offenders, it is possible to see the actual consequences of transferring more and younger offenders to adult courts. In *Do the Crime, Do the Time: Juvenile Criminals and Adult Justice in the American Court System*, the authors apply their decades of experience, both in the practical world and from unique research perspectives, to shed light on the influence of public opinion and the political forces that shape juvenile justice policy in the United States. The book provides a fresh look at the way the United States is choosing to deal with some of the serious or persistent juvenile offenders, utilizing real-life examples and cases to draw connections between transfer policies and individual outcomes.
