inglisur qartuli leqsikoni: Malraux Olivier Todd, 2007-12-18 Writer, publisher, war hero, French government minister, André Malraux was renowned as a Renaissance man of the twentieth century. Now, Olivier Todd--author of the acclaimed biography Albert Camus--gives us this life, in which fact competes dramatically with his subject's previously little-known mythomania. We see the adventurous young Malraux move from 1920s literary Paris to colonial Cambodia, Cochinchina, and Spain in its civil war. Todd charts the thrilling exploits that would inspire such novels as *Man's Fate*, but, just as fascinating, he also traces Malraux's lifelong pattern of lies: claiming friendship with Mao, he was called to tutor Nixon, despite having met the Great Helmsman only once; a minor injury becomes in recollections a near-mortal battlefield wound; stories of heroism in the French Resistance omit to mention that Malraux joined up just a few weeks before the Allied landings. With meticulous research, Todd separates myth from reality to throw light on a brilliant con man who would become a national hero, but he also lets us see Malraux's genuine achievements as both writer and man of action. His real life and the one he embroidered come together in this superb biography to reveal how Malraux, the protean genius, became his own greatest character.

inglisur qartuli leqsikoni: Valley of the Sorcerers Kamal Abdulla, 2014 Kamal Abdulla is a well-known Azerbaijani writer and scholar. He has written works on linguistics, culturology and

mythology, and is the author of poetry, essays, plays, stories, and novels. His prose has been published and translated into French, Turkish, Russian, English, Portuguese, German, Polish, Bulgarian, Georgian, Arabic, Lithuanian, Japanese, and other languages. His plays have been performed in Azerbaijan, Georgia, and Estonia. His work is not without its detractors. Many articles and books have been written about his work, some positive, some negative. He has won literary awards in his own country, and been subject to unfair criticism. In the early years of Azerbaijan's independence, liking his novels was considered a sign of good literary taste. In later years, not liking these works is considered a sign of good literary taste. Original language, world view, philosophical foundation, and mythological sense characterize his work. His writing features mountains invisible to the eye, and valleys of sorcerers where it is forever spring. Here ancient manuscripts come to life and history is re-read in a completely different way. Centaurs roam his favourite city, Baku, while in ancient Egypt, people turn into flowers, and flowers into people. The idolized heroes of his mythological texts are fleshed out as ordinary, everyday people. Sometimes dead people emerge from their images, restore justice, and then return to their images. Not satisfied with living in their own worlds, characters lead very different lives in parallel worlds. The story of Theseus and the Minotaur enters our own time, and finally the phantasmagoria reaches such a point that Paris gives the apple to Hera, not Aphrodite...

inglisur qartuli leqsikoni: Innovation Dynamism and Economic Growth Masaaki Hirooka, 2006-01-01 I think this book is a great achievement. It is packed with useful information and thought-provoking analysis and discussion. The work on technological development is, especially, a very valuable original contribution to the work in this field. The book illuminates the technological trajectory so often ignored by economists, but which underlies Schumpeter's clusters of innovations, and the emphasis on trunk innovations and analysis of their role is of particular interest. Christopher Freeman, SPRU Science and Technology Policy Research, University of Sussex, UK and Maastricht University, The Netherlands This pathbreaking book addresses the economics of technological change as revealed by a unique methodology that uncovers the true nature of technological development. Masaaki Hirooka bases this new approach to the economics of technological change on the recognition of the nonlinear dynamic nature of innovation. In order to provide a richer understanding of technological development, the book focuses on the period of innovation prior to market launch, grounding the analysis within a distinct innovation paradigm. This is expressed using

three logistic trajectories technology, development and diffusion which make it possible to interpret and better understand technology foresight, infrastructure formation, long business cycles and national innovation systems. The author emphasizes the importance of the timing of innovation commitment, knowledge transfer between and within these trajectories, and the evolutionary character of innovation. Those with an interest in economics, macroeconomics, technological change and evolutionary economics will find this book to be a highly stimulating and fascinating read.
