ivanhoe pdf: *The Oneness Hypothesis* Philip J. Ivanhoe, Owen Flanagan, Victoria S. Harrison, Eric Schwitzgebel, Hagop Sarkissian, 2018-06-26 The idea that the self is inextricably intertwined with the rest of the world—the “oneness hypothesis”—can be found in many of the world’s philosophical and religious traditions. Oneness provides ways to imagine and achieve a more expansive conception of the self as fundamentally connected with other people, creatures, and things. Such views present profound challenges to Western hyperindividualism and its excessive concern with self-interest and tendency toward self-centered behavior. This anthology presents a wide-ranging, interdisciplinary exploration of the nature and implications of the oneness hypothesis. While fundamentally inspired by East and South Asian traditions, in which such a view is often critical to their philosophical approach, this collection also draws upon religious studies, psychology, and Western philosophy, as well as sociology, evolutionary theory, and cognitive neuroscience. Contributors trace the oneness hypothesis through the works of East Asian and Western schools, including Confucianism, Mohism, Daoism, Buddhism, and Platonism and such thinkers as Zhuangzi, Kant, James, and Dewey. They intervene in debates over ethics, cultural difference, identity, group solidarity, and the positive and negative implications of metaphors of organic unity. Challenging dominant views that presume that the proper scope of the mind stops at the boundaries of skin and skull, *The Oneness Hypothesis* shows that a more relational conception of the self is not only consistent with contemporary science but has the potential to lead to greater happiness and well-being for both individuals and the larger wholes of which they are parts.

ivanhoe pdf: *Transformation of Love* Elif Güvendi Yalçın, 2022-11-03 Romances date back to the creation of stories. Although the definition of the genre has changed in time from the Ancient Greeks to the Bildungsromans, to the 19th century and today’s courtship novels, both scholarship and widely-held attitudes towards romance has remained fixedly and prioritized only the universality, unoriginality, and continuity of romance fiction instead of its sociocultural effect of promoting positive ideals like female empowerment. The portrayal of women in social roles has been in a state of constant change including their relationship with and relation to men. This book explores only medieval historical romance fictions and their changes through the course of the time. I examine three medieval romances’ content—Walter Scott’s *Ivanhoe* (1920), Kathleen Woodiwiss’ *The Wolf and the Dove* (1974), and Amanda Quick’s *Mystique* (1995)-- written in different time periods based on content analysis using Anthony Giddens’s (1992) theories of intimacy. In addition, it will address romance novels’ views about sex, gender and love roles.

ivanhoe pdf: *Law and Development in Asia* Gerald Paul McAlinn, Caslav Pejovic, 2012-03-15 This book fills a gap in the literature by presenting a comprehensive overview of the key issues relating to law and development in Asia. Over recent decades, experts in law and development have

produced multiple theories on law and development, none of which were derived from close study of Asian countries, and none of which fit very well with the existing evidence of how law actually functioned in these countries during periods of rapid economic development. The book discusses the different models of law and development, including both the developmental state model of the 1960s and the neo-liberal model of the 1980s, and shows how development has worked out in practice in relation to these models in a range of Asian countries, including Japan, Korea, China, Thailand, Singapore, India and Mongolia. Particular themes examined include constitutionalism, judicial and legal reform; labour law; the growing importance of private rights; foreign investment and the international law of development. Reflecting the complexity of Asian law and society, both those who believe in an Asian Way which is radically different from law and development in other parts of the world, as well as those who believe the arc of law and development is essentially universal, will find support in this book.

ivanhoe pdf: Mortality in Traditional Chinese Thought Amy Olberding, Philip J. Ivanhoe, 2012-01-02 Mortality in Traditional China is the definitive exploration of a complex and fascinating but little-understood subject. Arguably, death as a concept has not been nearly as central a preoccupation in Chinese culture as it has been in the West. However, even in a society that seems to understand death as a part of life, responses to mortality are revealing and indicate much about what is valued and what is feared. This edited volume fills the lacuna on this subject, presenting an array of philosophical, artistic, historical, and religious perspectives on death during a variety of historical periods. Contributors look at material culture, including findings now available from the Mawangdui tomb excavations; consider death in Confucian, Daoist, and Buddhist traditions; and discuss death and the history and philosophy of war.

ivanhoe pdf: The Skeptical Environmentalist Bjørn Lomborg, 2001-08-30 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse. The author, himself a former member of Greenpeace, is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence. Using the

best available statistical information from internationally recognised research institutes, Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world. His arguments are presented in non-technical, accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves. Concluding that there are more reasons for optimism than pessimism, Bjørn Lomborg stresses the need for clear-headed prioritisation of resources to tackle real, not imagined problems. The *Skeptical Environmentalist* offers readers a non-partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media.

ivanhoe pdf: *Transnational Law and State Transformation* Jennifer Lander, 2019-11-07 This book contributes new theoretical insight and in-depth empirical analysis about the relationship between transnational legality, state change and the globalisation of markets. The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism: the power to institute new rules and limits for national states. This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives. While leading scholars in the field have emphasised the much-needed value of case studies, there are no studies available which consider the cumulative impact of multiple axes of transnational legal ordering on the national state or its constitution. This monograph addresses this empirical gap, whilst expanding the theoretical scope of the field. Mongolia's recent transformation as a mineral-exporting country provides a rare opportunity to witness economic and legal globalisation in process. Based on careful empirical analysis of national law and policy-making, the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia's mining sector, specifically by redistributing state power in relation to the market, sub-national administrations and civil society. The book investigates the role of international financial institutions, multinational corporations and non-governmental organisations in normative transmission, as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy environment. As the book demonstrates, however, the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation, institutionally and ideologically. The book will be of interest to scholars of international law, global governance and the political economy of development.

ivanhoe pdf: *Hydrogen Economy* P K Pahwa, G K Pahwa, 2014-04-15 As the dependence on the depleting fossils fuels continues and global warming increases, we need to find an energy system that is renewable and sustainable, efficient and cost-effective, convenient and safe. ivanhoe pdf: Sources of Power Manfred Weissenbacher, 2009-09-30 A landmark book rolls out a bold, new, energy-based theory of human history based on a simple, yet powerful law: whoever controls the world's effective energy supplies during a given energy age will inevitably dominate the economic, political, and cultural history of that age. The innovative theory articulated in *Sources of Power: How Energy Forges Human History* parses history into four ages: the foraging, agriculture, coal, and oil ages, each defined by the dominant source of power. Manfred Weissenbacher tests this sweeping theory against the panorama of world history, combining formidable powers of synthesis with a specialist's deep understanding of energy systems and technologies. After proving the operation of his law through history and into the present, Weissenbacher applies it to global geopolitical trends. He assesses the prospects of the various candidate technologies to succeed oil and charts future scenarios based on the distribution of energy reserves. Finally, he forecasts the fates of the American and Chinese empires in the twilight of the oil age: the United States as a mature superpower forced to deploy military might to occupy oilfields in the Middle East; China as an emerging superpower forced to deploy economic might to muscle in on the development of Third World oilfields.

ivanhoe pdf: Health Impact Assessment Martin Birley, 2013-10-18 Health Impact Assessment (HIA) is primarily concerned with the future consequences of plans, proposals and policies on the health of communities. It is a rapidly growing complement to Environmental Impact Assessment, increasingly mandated by national and international requirements. Guidelines have been produced by many national and international organizations and it is being introduced in a number of undergraduate or postgraduate university curricula. However, there has been until now no broad-based, introductory text of international scope to the subject, suitable for both these courses and for professional training. The purpose of this book is to fill this gap and to introduce the subject of Health Impact Assessment using plain language, in both general and specific contexts and with reference to both market and less developed economies. As a result, the reader should be able to describe what HIA can and cannot achieve, identify the components of a successful HIA and participate in an assessment as a member of a team. Examples are provided from a number of planning and development sectors, including extractive industry, water resource management, and housing. The reader, whether student or professional, need not be a health specialist, although prior knowledge of some public or environmental health would be an advantage.

ivanhoe pdf: Traditional Leaders in a Democracy MISTRA MISTRA, 2019-03-29 Post-1994, South Africa's traditional leaders have fought for recognition, and positioned themselves as major players in the South African political landscape. Yet their role in a democracy is contested, with leaders often accused of abusing power, disregarding human rights, expropriating resources and promoting tribalism. Some argue that democracy and traditional leadership are irredeemably opposed and cannot co-exist. Meanwhile, shifts in the political economy of the former bantustans - the introduction of platinum mining in particular - have attracted new interests and conflicts to these areas, with chiefs often designated as custodians of community interests. This edited volume explores how chieftancy is practised, experienced and contested in contemporary South Africa. It includes case studies of how those living under the authority of chiefs, in a modern democracy, negotiate or resist this authority in their respective areas. Chapters in this book are organised

around three major sites of contest: leadership, land and law.

ivanhoe pdf: *Moral Economic Transitions in the Mongolian Borderlands* Hedwig Amelia Waters, 2023-06-15 Since the early 1990s, Mongolia began its hopeful transition from socialism to a market democracy, becoming increasingly dependent on international mining revenue. Both shifts were promised to herald a new age of economic plenty for all. Now, roughly 30 years on, many of Mongolia's poor and rural feel that they have been forgotten. *Moral Economic Transitions in the Mongolian Borderlands* describes these shifts from the viewpoint of the self-proclaimed 'excluded': the rural township of Magtaal on the Chinese border. In the wake of socialism, the population of this resource-rich area found itself without employment and state institutions, yet surrounded by lush nature 30 kilometres from the voracious Chinese market. A two-tiered resource-extractive political-economic system developed. Whilst large-scale, formal, legally sanctioned conglomerates arrived to extract oil and land for international profits, the local residents grew increasingly dependent on the Chinese-funded informal, illegal cross-border wildlife trade. More than a story about rampant capitalist extraction in the resource frontier, this book intimately details the complex inner worlds, moral ambiguities and emergent collective politics constructed by individuals who feel caught in political-economic shifts largely outside of their control. Offering much needed nuance to commonplace descriptions of Mongolia's post-socialist transition, this study presents rich ethnographic detail through the eyes and voices of the state's most geographically marginalized. It is of interest not only to experts of political-economy and post-socialist transition, but also to non-academic readers intrigued by the interplay of value(s) and capitalism.

ivanhoe pdf: The Material Limits of Energy Transition: Thanatia Alicia Valero, Antonio Valero, Guiomar Calvo, 2021 Earth has become a huge mine, with a greater quantity and variety of fundamental mineral resources being extracted year after year. Technology, from electric cars to everyday electrical equipment, consume vast amounts of scarce raw materials. On a planet with limited resources, are these minerals being properly assessed? Will there be enough raw materials to meet the demand of a world population on track to reach 10 billion people? What will be the consequences of accelerated resource depredation? Will the planet one day become 'Thanatia', a resource-exhausted Earth? This book allows readers to understand the mineral heritage of the Earth, considering the demand for raw materials in society, comparing it with the availability of resources on Earth and the impact of mining. The basics of physical geonomics are explained, allowing readers to analyse the loss of mineral resources on the planet. The impact of renewable energies and technologies, including electric vehicles, are studied. The book concludes with possible solutions to mineral depletion, from increasing recycling rates, ecodesign measures or alternative sources of mineral resources. Providing numerous tables and illustrations, 'The Material Limits of Energy Transition: Thanatia' gives readers a thorough understanding of mineral depletion. Exploring geology, geochemistry, mining, metallurgy, the environment and thermodynamics, this is a truly holistic book.

ivanhoe pdf: *Ethics in the Confucian Tradition* P. J. Ivanhoe, 2002-01-01 This volume serves both as an introduction to the thought of Mengzi (Mencius) and Wang Yangming and as a comparison of their views. By examining issues held in common by both thinkers, Ivanhoe illustrates how the Confucian tradition was both continued and transformed by Wang Yangming, and shows the extent to which he was influenced by Buddhism. Topics explored are: the nature of morality; human nature; the nature and origin of wickedness; self cultivation; and sagehood. In addition to revised versions of each of these original chapters, Ivanhoe includes a new chapter on Kongzi's (Confucius') view of the Way.

ivanhoe pdf: *Myanmar* Monique Skidmore, Trevor Wilson, 2007-10-01 Despite deteriorating economic and developmental conditions, worsening environmental problems, and troubles arising from the unresolved status of its ethnic minorities, Myanmar seems no closer to a political

resolution. Myanmar's economy continues to stagnate, with severe implications for its people. Low levels of international assistance have exacerbated the situation. Myanmar the state, community and the environment examines the missed opportunities by government and opposition groups to find a way out of the political impasse and improve the standard of living of the people of Myanmar. This collection provides insights into the country's economic development, in particular the vital rice-marketing sector and the attempts to expand existing industrial zones. It focuses, for the first time, on Myanmar's environmental governance with in-depth case studies, and on the increasing need for effective environmental protection and sustainability..

ivanhoe pdf: *To Kill a Mockingbird* Harper Lee, 2014-07-08 Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

ivanhoe pdf: *Three Streams* P. J. Ivanhoe, 2016 Recent interest in Confucianism has a tendency to suffer from essentialism and idealism, manifested in a variety of ways. One example is to think of Confucianism in terms of the views attributed to one representative of the tradition, such as Kongzi (Confucius) (551-479 BCE) or Mengzi (Mencius) (372 - 289 BCE) or one school or strand of the tradition, most often the strand or tradition associated with Mengzi or, in the later tradition, that formed around the commentaries and interpretation of Zhu Xi (1130-1200). Another such tendency is to think of Confucianism in terms of its manifestations in only one country; this is almost always China for the obvious reasons that China is one of the most powerful and influential states in the world today. A third tendency is to present Confucianism in terms of only one period or moment in the tradition; for example, among ethical and political philosophers, pre-Qin Confucianism--usually taken to be the writings attributed to Kongzi, Mengzi, and, if we are lucky, Xunzi (479-221 BCE)--often is taken as Confucianism. These and other forms of essentialism and idealism have led to a widespread and deeply entrenched impression that Confucianism is thoroughly homogenous and monolithic (these often are facts mustered to support the purportedly oppressive, authoritarian, and constricted nature of the tradition); such impressions can be found throughout East Asia and dominate in the West. This is quite deplorable for it gives us no genuine sense of the creatively rich, philosophically powerful, highly variegated, and still very much open-ended nature of the Confucian tradition. This volume addresses this misconstrual and misrepresentation of Confucianism by presenting a philosophically critical account of different Confucian thinkers and schools, across place (China, Korea, and Japan) and time (the 10th to 19th centuries).

ivanhoe pdf: *Future Park* Amalie Wright, 2013-09-19 The first public parks were created on urban 'greenfields'. Once these designated sites had been used, cities looked towards post-industrial sites, and built parks in places that had suffered from environmental degradation, neglect, abandonment and conflict. With finite stocks of urban post-industrial land now also approaching exhaustion, more ways of making parks are required to create inclusive, accessible and resilient urban places. *Future Park* invites Australian built environment professionals and policymakers to

consider the future of parks in our cities. Including spectacular images of public spaces throughout the world, the book describes the economic, social and environmental benefits of urban parks, and then outlines the threats and challenges facing cities and communities in an age when more than half the world's population are urban dwellers. Future Park introduces the need to embrace new public park thinking to ensure that benefits continue to be realised. Future Park illustrates imaginative and resourceful responses to real challenges by highlighting recent proposals and projects. These projects coalesce around four broad themes – linkages, obsolescences, co-locations and installations – responding to contemporary urban paradoxes, and ensuring parks continue to play a vital role in the lives of our cities.

ivanhoe pdf: *When We Were Orphans* Kazuo Ishiguro, 2001-01-16 From the winner of the Nobel Prize in Literature and author of the Booker Prize-winning novel *The Remains of the Day* comes this stunning work of soaring imagination. Born in early twentieth-century Shanghai, Banks was orphaned at the age of nine after the separate disappearances of his parents. Now, more than twenty years later, he is a celebrated figure in London society; yet the investigative expertise that has garnered him fame has done little to illuminate the circumstances of his parents' alleged kidnappings. Banks travels to the seething, labyrinthine city of his memory in hopes of solving the mystery of his own painful past, only to find that war is ravaging Shanghai beyond recognition—and that his own recollections are proving as difficult to trust as the people around him. Masterful, suspenseful and psychologically acute, *When We Were Orphans* offers a profound meditation on the shifting quality of memory, and the possibility of avenging one's past.
